Emerging zoonoses: eco-epidemiology, involved mechanisms and public health implications Rubén Bueno-Marí,A. Paulo Gouveia Almeida,Juan Carlos Navarro,2015-07-06 Zoonoses are currently considered as one of the most important threats for public health worldwide Zoonoses can be defined as any disease or infection that is naturally transmissible from vertebrate or invertebrate animals to humans and vice versa Approximately 75% of recently emerging infectious diseases affecting humans are diseases of animal origin approximately 60% of all human pathogens are zoonotic All types of potential pathogenic agents including viruses parasites bacteria and fungi can cause these zoonotic infections From the wide range of potential vectors of zoonoses insects are probably those of major significance due to their abundance high plasticity and adaptability to different kinds of pathogens high degrees of synanthropism in several groups and difficulties to apply effective programs of population control Although ticks flies cockroaches bugs and fleas are excellent insects capable to transmit viruses parasites and bacteria undoubtedly mosquitoes are the most important disease vectors Mosquito borne diseases like malaria dengue equine encephalitis West Nile Mayaro or Chikungunya are zoonoses with increasing incidence in last years in tropical and temperate countries Vertebrates can also transmit serious zoonoses highlighting the role of some carnivorous animals in rabies dissemination or the spread of rodent borne diseases in several rural and urban areas Moreover the significance of other food borne zoonoses such as taeniasis trichinellosis or toxoplasmosis may not been underestimated According to WHO FAO and OIE guidelines an emerging zoonotic disease can be defined as a zoonosis that is newly recognized or newly evolved or that has occurred previously but shows an increase of incidence or expansion in geographical host or vector range There are many factors that can provoke or accelerate the emergence of zoonoses such as environmental changes habitat modifications variations of human and animal demography pathogens and vectors anomalous mobilization related with human practices and globalization deterioration of the strategies of vector control or changes in pathogen genetics To reduce public health risks from zoonoses is absolutely

necessary to acquire an integrative perspective that includes the study of the complexity of interactions among humans animals and environment in order to be able to fight against these issues of primary interest for human health In any case although zoonoses represent significant public health threats many of them still remain as neglected diseases and consequently are not prioritized by some health international organisms The impact of nutrition on the health and welfare of horses A.D. Ellis,A.C. Longland,M. Coenen,N. Miraglia,2023-09-04 The impact of nutrition on the health and welfare of the horse whether performing at the highest athletic level or for leisure use cannot be underestimated To maintain good health and optimum performance the horse requires much more than just the correct levels of nutrients In addition to avoiding an excess or a deficiency of nutrients the packaging and form in which the horse ingests these nutrients plays an important role both for the horse s body and mind Incorrect nutrition contributes to occurrence of colic obesity metabolic syndrome laminitis rhabdomyolysis and stereotypic abnormal or unwanted behaviours This book explores the impact of nutrition on health and welfare in horses The chapters provide an up to date review and evaluation of our current understanding in the areas below Nutritional requirements and physiology Nutrition behaviour and welfare Promoting health and preventing disease Gastrointestinal health Metabolic disease Functional nutritional ingredients Nutrition and performance This book is the 5th volume in a series conceived through the European Workshop of Equine Nutrition EWEN which falls under the umbrella of the Horse Commission of the European Association of Animal Production EAAP The aim is to facilitate discussion between equine nutrition scientists and to create a bridge between scientists practitioners and the horse industry The ultimate aim is to support good equine health and welfare practice through the best nutrition science possible As such this book is a valuable compilation of knowledge for research scientists veterinarians nutritionists academics and students **Equine ER** Leslie Guttman,2009 Anecdotes from Rood Riddle Equine Hospital Lexington KY
