Empirical Studies In Comparative Politics:

Empirical Studies in Comparative Politics Melvin J. Hinich, Michael C. Munger, 1999-01-31 Empirical Studies in Comparative Politics presents a collection of papers analyzing the political systems of ten nations. It intends to provoke a conscious effort to compare and investigate the public choice of comparative politics. There have been many publications by public choice scholars and many more by researchers who are at least sympathetic to the public choice perspective, yet little of this work has been integrated into the main stream of comparative political science literature. This work however presents an empirically oriented study of the politics, bureaucratic organization and regulated economies of particular nations in the canon of the comparativist. It therefore provides a public choice view at the level of nations, not of systems. This compendium of work on comparative politics meets two criteria. In every case, a model of human behavior or institutional impact is specified. Also in every case, this model is confronted with data appropriate for evaluating whether this model is useful for understanding politics in one or more nations.

Comparison Leonardo Morlino, 2018-01-15 Comparison is an essential research method in political science. This book helps students to understand comparison as a scientific instrument to grasp its necessity and its effective purpose for research. For that reason, it replies to three simple questions: why compare, what to compare, and how to compare. The introduction distinguishes itself by considering not only the comparative tradition but also by taking methodological innovations of the last two decades into account.

Rethinking Politicisation in Politics, Sociology and International Relations Claudia Wiesner, 2021-01-04 This book decisively advances the academic debate on politicisation beyond the state of the art. It is the first book to theorise and conceptualise politicisation across the epistemic communities of different subdisciplines, bringing together the different strands in the debate: international political theory, political sociology, comparative politics, EU studies, legal theory and international relations. This provides a comprehensive discussion of different concepts of politicisation, their ontological and theoretical backgrounds, and their analytical value, including speech act practice and actor-oriented approaches. Furthermore, the linkages of politicisation to the concepts of politics and the political democracy, depoliticisation, juridification, populism and Euroscepticism are clarified. Finally, the book shows how the methodological toolbox in empirical politicisation research can be completed regarding different arenas, actors and modes of politicisation. The volume thus provides a much-needed theoretical and conceptual reflection to the newly emerging research field of politicisation in order to recognise and define the key issues and build a solid foundation for further debate and empirical research. When does something come to be considered political, for good or for ill? In social scientific terms, what is politicisation, under what conditions does it occur, created by whom and with what consequences? These questions drive this outstanding collection of papers that explore how politicization is to be theorized and methodologies for its study. Rather than just a special sphere of activity, the volume demonstrates how politics is best thought of as an activity that can occur across individual and various collective levels. One of the signature contributions of this

volume is its exploration of these issues across disciplines political science philosophy sociology and international relations The texts will be of interest to all students of politics at a time when the very basis of political identity action and organization is contested normatively and analytically The texts will help bring clarity to these debates David L Swartz Department of Sociology Boston University USA Politization has become a widely used and disputed term In International Relations IR and more recently in comparative politics as well This edited volume tries to elevate the term politization onto an analytical concept by i a opening it up for action theoretical and organizational approaches One of the great achievements of the editor is to bring conceptual order into a dispersed debate across political science and its subdisciplines Moreover the contributions show how to apply the concept s of politization on such different subjects such as democratization de democratization transitions denationalization or the emergence of populism and Euroscepticism This is a much-awaited book which can become a conceptual point of reference for better understanding the evolution of national and international regimes Wolfgang Merkel Humboldt University of Berlin Germany [The Routledge Handbook of Civil-military Relations](#) Thomas C. The Democratic Politics of Military Interventions Wolfgang Wagner, 2020-07-09 According to a widely shared notion foreign affairs are exempted from democratic politics i e party political divisions are overcome and should be overcome for the sake of a common national interest This book shows that this is not the case Examining votes in the US Congress and several European parliaments the book demonstrates that contestation over foreign affairs is barely different from contestation over domestic politics Analyses of a new collection of deployment votes of party manifestos and of expert survey data show that political parties differ systematically over foreign policy and military interventions in particular The left right divide is the best guide to the pattern of party political contestation support is weakest at the far left of the spectrum and increases as one moves along the left right axis to green social democratic liberal and conservative parties amongst parties of the far right support is again weaker than amongst parties of the centre An analysis of parliamentary debates in Canada Germany and the United Kingdom about the interventions in Afghanistan and against Daesh in Iraq and Syria shows that political parties also differ systematically in how they frame the use of force abroad For example parties on the right tend to frame their country's participation in the US led missions in terms of national security and national interests whereas parties on the left tend to engage in spiral model thinking i e they critically reflect on the unintended consequences of the use of force in fuelling the conflicts with the Taliban and Daesh
