Space and Time Perception by the Cosmonaut Alexei Leonov, Vladimir Lebedev, 2001 This is a book about the dynamics of spaceflight and the role of the cosmonaut in the man space craft system **Cosmonaut** Cathleen S. Lewis, 2023-08-08 Examining material and cultural representations of the cosmonaut program Cathleen Lewis discusses how the public image of the Soviet cosmonaut developed beginning in the 1950s and the ways this icon has been reinterpreted throughout the years and in contemporary Russia **The First Soviet Cosmonaut Team** Colin Burgess, Rex Hall, 2009-03-27 The First Soviet Cosmonaut Team will relate who these men were and offer far more extensive background

stories in addition to those of the more familiar names of early Soviet space explorers from that group. Many previously unpublished photographs of these missing candidates will also be included for the first time in this book. It will be a detailed but highly readable and balanced account of the history, training and experiences of the first group of twenty cosmonauts of the USSR. A covert recruitment and selection process was set in motion throughout the Soviet military in August 1959 just prior to the naming of America's Mercury astronauts. Those selected were ordered to report for training at a special camp outside of Moscow in the spring of 1960. Just a year later, Senior Lieutenant Yuri Gagarin of the Soviet Air Force, promoted in flight to the rank of major, was launched aboard a Vostok spacecraft and became the first person ever to achieve space flight and orbit the Earth.

The Secrets of Soviet Cosmonauts Maria Rosa Menzio, 2022-08-31. This book sheds new light on an amazing history only partially known in the west: Russian cosmonautics and its spectacular record. From Laika the cosmonaut dog to Yuri Gagarin the first man in space to Valentina Tereshkova the first woman in space to the first spacewalk, the Soviets set many goals that they subsequently achieved. But there are shadows behind these headline moments: moments involving human loss, some of which are known, others only rumored. Questions remain such as: What was the flying coffin? What secrets are still hidden inside the Russian archives despite two rounds of declassification? Why didn't Marina Popovich/Madame Mig become a cosmonaut? What problems made it necessary to film Valentina Tereshkova's return? What scientific hypotheses exist concerning Gagarin's mysterious disappearance? The author addresses all of these issues with help from the documents now available. This book will benefit a broad readership: from interested laypersons to graduate and undergraduate students to those who merely enjoy good history-based stories.
