Feistner, 1993-12-31 Past progress and future challenges R J Wheeler Royal Zoological Society of Scotland Edinburgh UK In the past two decades much has been achieved in the sphere of breeding endangered species and we should be pleased that our co operative efforts have already borne so much fruit However on balance and despite the best efforts of conservationists the position of wildlife in the

wild places where they are best conserved has become worse often dramatically worse Before returning to the United Kingdom in 1972 I was in Uganda for 16 years most of which time was spent as Chief Warden of Murchison Falls National Park Our main problem was that an over population of large mammals was having a devastating impact on the habitat Devastation was being wrought on woodland areas by the arrival of large numbers of elephants into the sanctuary of the Park following changes in land use in the areas outside the Park These changes were in response to the requirements of an ever expanding human population

The Politics of Zoos Jesse Donahue, Erik Trump, 2006 Zoos have found themselves continually under fire in recent decades Animal rights activists initiated the attacks at the same time regulatory agencies anti tax advocates and an assortment of litigators have also targeted zoos In an effort to defend themselves in this hostile landscape zoos and aquariums joined forces under the leadership of the American Association of Zoological Parks and Aquariums now called the AZA They learned to use the political system to their own advantage while at the same time crafting a more progressive public mission In *The Politics of Zoos* Jesse Donahue and Erik Trump present a political biography of the AZA to show how the zoo community has emerged as a political player Rather than recount the history of a faceless institution the authors focus on the cohort of directors who navigated the political turbulence of the 1960s and 1970s and set the agenda for subsequent decades Ironically at a time when activists began to charge that zoos and aquariums did not know how to care for animals and did not care for the well being of endangered species the opposite was true These institutions were increasingly attracting well educated professionals who indeed cared a great deal Amidst controversies over ownership and funding capture and disposal and the health and well being of animals on display AZA leaders acted not merely to protect their own interests in the political arena but to ensure the welfare of captive animals and to assist with the conservation of wild species Donahue and Trump's original study of the politics of American zoos and aquariums from the 1960s to the present draws upon interviews archival sources congressional records court cases regulatory hearings media accounts and the authors ongoing field research It will appeal to zoo professionals political scientists historians and those concerned with animal welfare
