*Promises* Gauri Phape,2021-07-16 *Those Fake Promises* is an anthology compiled by Gauri Phape under Unvoiced Heart

Publication This is a compilation of feelings expressed by 99 Co Authors who has not only kept it in just in their diary but they had shared feelings under the theme Broken Promises      *False Premise, False Promise* Sally C. Pipes, 2020-01-07 American health care is at a crossroads Health spending reached 3 5 trillion in 2017 Yet more than 27 million people remain uninsured And it s unclear if all that spending is buying higher quality care Patients doctors insurers and the government acknowledge that the healthcare status quo is unsustainable America s last attempt at health reform Obamacare didn t work Nearly a decade after its passage in 2010 Democrats are calling for a government takeover of the nation s healthcare system Medicare for All The idea s supporters assert that health care is a right They promise generous universal high quality care to all Americans with no referrals copays deductibles or coinsurance With a sales pitch like that it s no wonder that seven in ten people now support Medicare for All Doctors especially young ones are coming around to the idea of single payer too Democrats led by the progressive wing of the party hope to capitalize on this enthusiasm In 2017 they introduced companion legislation in the House and Senate that would establish Medicare for All They have already promised to do the same when the next Congress convenes in 2019 More than 70 House Democrats have joined a new Medicare for All Caucus Senator Bernie Sanders is effectively already on the presidential campaign trail making his case for single payer If Democrats take the White House and Senate in 2020 and hold onto the House a Medicare for All bill could be among the first pieces of legislation presented to the new president for a signature In this book Sally C Pipes a Canadian native will make the case against Medicare for All She ll explain why health care is not a right and how progressives pressing for single payer are making a litany of promises they can t possibly keep Evidence from government run systems in Canada the United Kingdom and other developed countries proves that single payer forces patients to withstand long waits for poor care at high cost First she ll unpack the Medicare for All plans under consideration in Congress She ll explain how radical they truly are Medicare for All will not save 5 trillion as some of its proponents claim It will cost about 32 trillion over 10 years according to analyses from the Urban Institute and the Mercatus Center It will outlaw private health insurance It will raise taxes by trillions of dollars It will cut pay for doctors to the rates paid by Medicare and thereby exacerbate our nation s shortage of physicians And it will ration care Then Sally will detail the horrors of single payer She ll start in Canada whose single payer system most closely resembles the one progressives have in mind for the United States Analyses of the government run systems in the United Kingdom and a few other developed countries will follow with particular focus on the problems that these systems pose for patients and doctors To substantiate her indictment of single payer Sally will marshal both quantitative and qualitative evidence She ll highlight how Americans fare better than their peers in Canada and the United Kingdom on the health outcomes that are directly linked to the quality of a healthcare system including survival rates for patients with cancer and cardiovascular issues She ll also explain why the health outcomes where the United States performs poorly relative to other nations like infant mortality and life expectancy tell us little about our healthcare system Sally will pepper her text with

heart wrenching stories of the human costs of single payer of people who were injured were forced to remain in pain or even died because their government run healthcare system delayed or denied care Too often evangelists for free markets limit their arguments to facts and statistics and fail to appeal to the public s emotions Sally will feature the stories of individuals and families who have been victims of single payer systems These vignettes will help drive home the truth about single payer and why it must not come to the United States She ll conclude with her vision for delivering the affordable accessible quality care the American people are looking for

**Principles** Mark Tunick,2021-03-09 A Japanese woman living in California attempts parent child suicide an ancient Japanese custom called oyako shinju in order to rid herself of shame upon learning that her husband has a mistress She survives but her two children are drowned in the attempt Since her attempt was made in accordance with the standards of Japanese culture should she be tried by the standards and laws of the United States Are there universally valid moral principles that dictate what is right Or are moral judgments culturally relative ultimately dictated by conventions and practices that vary among societies In Practices and Principles Mark Tunick takes up the debate between universalists and relativists and in political philosophy between communitarians and liberals each of which has roots in an earlier debate between Kant and

Hegel Tunick focuses on three case studies promises contract law and the Fourth Amendment issue of privacy In his analysis he rejects both uncritical deference to social practice and draconian adherence to principles when making legal and ethical judgments He argues that we do not always need to choose between abstract principles and social practices Sometimes we appeal to both sometimes we need to appeal to shared social norms and sometimes where there is no ethical community we can appeal only to principles Ultimately Tunick rejects simplified arguments that force us to choose between either practices or principles universalism or relativism and liberalism or communitarianism

ethical considerations challenging traditional notions of ethical research It highlights the ethical and axiological dilemmas faced by anthropologists in the modern era emphasizing the need for a more community centric approach that actively benefits the studied communities     Values and the Reflective Point of View Robert Dunn,2016-02-17 Values are inescapable They pervade and shape our psychology our agency and our lives as reflective and self knowing subjects This book explores the crucial ways in which values figure within reflection and thereby shape our theoretical and practical lives against the backdrop of an expressivist moral psychology that is sensitive to the vicissitudes of valuing Combining a discussion of the role that values play within reflection with a critique of a range of influential contemporary views in moral psychology and the theory of agency Dunn shows how such views obscure or distort the nature of that role and that there is a natural fit between an expressivist account of values and the best account of the role of values in the lives of reflective agents Writers discussed include Simon Blackburn Michael E Bratman Donald Davidson Harry Frankfurt Christine Korsgaard Thomas Nagel and J David Velleman The book is also an important addition to the literature on self knowledge Dunn argues that by reasoning about truth and values we possess a unique non observational way of coming to know our own minds and hearts together with what we are going to make happen in the world The discussion criticizes recent contributions to the theory of self knowledge by Richard Moran and J David Velleman     **Records and Briefs of the United States Supreme Court**

**How Governments Deceive You** Charles Nehme, Governments play a crucial role in shaping societies enacting policies and making decisions that affect the lives of their citizens While many governments work with transparency and integrity there have been instances throughout history where deception and manipulation have been employed to achieve certain objectives It is important to acknowledge that not all governments engage in deceptive practices and this preface should not be interpreted as a blanket statement about all governing bodies Instead it aims to shed light on some historical and potential methods governments could use to deceive their citizens Governments may deceive their citizens through various means including

- 1 Propaganda Governments can use propaganda to control the narrative and shape public opinion They may disseminate biased information or misleading narratives through state controlled media censorship or manipulation of social media platforms to influence public perception
- 2 Censorship and Information Control By controlling the flow of information governments can restrict access to certain facts or ideas that might challenge their authority or contradict their agenda This can be done through internet censorship media control or limiting academic freedoms
- 3 Half Truths and Spin Governments may present information selectively emphasizing certain aspects of an issue while downplaying or omitting others to manipulate public perception and opinion
- 4 False Flags In some cases governments may orchestrate or allow incidents to occur to manipulate public sentiment or justify certain actions These false flag operations can create a sense of crisis and rally support for government actions that might otherwise be met with resistance
- 5 Surveillance and Privacy Concerns Governments may employ extensive surveillance measures often justified in the name of national security to monitor their citizens activities This can lead to concerns about privacy violations and potential misuse of collected data
- 6 Corruption and Bribery Instances of corruption within the government can lead to dishonest decision making with policies influenced by personal gain rather than the best interests of the citizens
- 7 Divide and Conquer Strategies Governments might exploit existing societal divisions such as along ethnic religious or socio economic lines to maintain power by pitting different groups against each other
- 8 Scapegoating Governments may blame certain groups or individuals for societal problems to divert attention from their own shortcomings or to rally support for specific policies
- 9 Manipulation of Elections By tampering with electoral processes or engaging in voter suppression governments can influence election outcomes and maintain their hold on power
- 10 Complex Legislation and Bureaucracy The use of complex legislation and bureaucratic

processes can make it difficult for citizens to fully understand the implications of certain policies making it easier for governments to pass controversial measures without widespread public scrutiny It is essential for citizens to be vigilant and well informed questioning information sources and demanding transparency and accountability from their governments A robust civil society free press and active public engagement can act as safeguards against deception and misuse of power by those in authority
