Higgins, 2017 The paradigm shift in globalization has transformed the world Our global society brings forth unprecedented opportunities and challenges economically environmentally and socially Each opportunity is intertwined with a global problem that poses a threat to sustainability The world has changed therefore we must shift the role and practice of current education Educational experts express an urgent need for schools to implement global education programs with a focus on students acquiring the skills of global competency Research shows that few students have this opportunity As global challenges continue to rise experts remind us that time is of the essence to infuse global education into our nation's schools This sense of urgency creates an obligation to discover best practice in global education To advance global education in our schools educators and policymakers must be informed of exemplary global education programs that not only teach global competency but also motivate students towards the ultimate goal acting as global citizens The purpose of this study was twofold first to identify an exemplary global classroom program and measure its impact on student development of global competency and global citizen skillsets and second to determine which educational components may influence best practice in global education In a school district in Pennsylvania a class of ninth grade students became partners across global boundaries with students in classes in Afghanistan and Pakistan This exemplary global education program combined a tri dimensional teaching and learning environment intercultural video conferences in a global classroom and a service learning component The students were studied using a qualitative case study research design and five methods of data collection documentation teacher interview student observations student focus groups and parent interviews The triangulation of data provided sound evidence and a heightened accuracy of this study's results Findings revealed that these students acquired the skill sets of global competency and are progressing toward global citizenship They developed a new global way of thinking connecting and acting in the world which was evidenced over three years The conclusions of this study provide a new theory for the field which will impact best practice and the advancement of global education **The Global Classroom** Jeffrey S. Lantis, Leigh A. Poole, 2025-08-06 *The Global Classroom An Essential Guide to Study Abroad* Second Edition is a unique international studies text that provides students and practitioners with valuable resources for success in education abroad The *Global Classroom* addresses the challenges and opportunities of study abroad by encouraging participants to think about their personal academic and professional goals during every step of the process Not only does it address different ways that study abroad has been re envisioned and strengthened in the post pandemic world it is also intentional in its design to speak

to a variety of contemporary issues and concerns For example the book addresses many different audiences including appealing to historically marginalized groups about the value of study abroad and addressing the rights of LGBTQ individuals at home and abroad It explores how social media has changed how we navigate distance in education abroad and a new section offers resources for mental health at home and abroad Critically the book also offers practitioners an academic up to date core text for pre departure orientation programs and provides readers with tools to better link student preparation with considerations like safety risk management and response
