Pomeroy,2013-11-20 Population increases advances in technology and the continued trend towards inner city migration have
transformed the traditional city of spaces into the modern city of objects This has necessitated alternative spatial and
technological solutions to replenish those environments that were once so intrinsic to society s day to day interactions and
communal activities This book considers skycourts and skygardens as alternative social spaces that form part of a broader
multi level urban infrastructure seeking to make good the loss of open space within the built environment Jason Pomeroy
begins the discussion with the decline of the public realm and how the semi public realm has been incorporated into a spatial
hierarchy that supports the primary figurative spaces on the ground or in their absence creates them in the sky He then
considers skycourts and skygardens in terms of the social cultural economic environmental technological and spatial benefits
that they provide to the urban habitat Pomeroy concludes by advocating a new hybrid that can harness the social
characteristics of the public domain but be placed within buildings as an alternative communal space for the 21st century
Using graphics and full colour images throughout the author explores 40 current and forthcoming skycourt and skygarden
projects from around the world including the Shard London Marina Bay Sands Singapore the Shanghai Tower China and the
Lotte Tower South Korea **In the Sky Garden** Elizabeth Champney,2017-04-30 In the Sky Garden is an unchanged high

contemporary landscapes are produced This issue argues that landscapes are made and remade through interrelations
between people and the worlds around them from geographers investigating the lives of urban wastelands to landscape

architects projecting future cities and from migrants navigating border systems to artists working with local residents In contrast to tendencies to emphasise the physical forms of landscapes with their potential to be redesigned and represented in drawings this issue brings to the forefront the social constructedness of landscapes by focusing on a range of critical practices and daily actions As conventional frames of landscape are challenged other ways of measuring mapping imagining designing building and occupying them are revealed For centuries artists and designers have represented landscapes of power in paintings and have transformed them through their design proposals But in recent years a number of researchers designers artists and activists have explored an expanded field of landscape investigating populations fleeing conflict zones reimagining cities facing ecological challenges questioning territorial claims and critiquing processes of urbanisation This issue focuses on some of these individuals whose work and lives encompass a diverse range of practices brought together through their critical redefinition of landscape relations Contributors Pierre B langer Harry Bix Neil Brenner and Nikos Katsikis Luis Callejas and Charlotte Hansson James Corner Gareth Doherty and Pol Fit Matamoros Matthew Gandy Christina Leigh Geros Rania Ghosn and El Hadi Jazairy Nina Marie Lister Richard Mosse Kate Orff Toya Peal Neil Spiller Tiago Torres Campos and Tim Waterman Featured practices Advanced Landscape and Urbanism Design Earth East Anglia Records Estudio Teddy Cruz Fonna Forman Furtherfield James Corner Field Operations Larissa Fassler LCLA office OPSYS and SCAPE

Eco-Towers K. Al-Kodmany, 2015-05-05 Eco Towers introduces readers to groundbreaking designs most progressive projects and innovative ways of thinking about a new generation of green skyscrapers that could provide solutions to crises the world faces today including climate change depleting resources deteriorating ecology population increase decreasing food supply urban heat island effect pollution deforestation and more The book suggests that the eco tower culminates the cultural and technological evolutions of the 21st century by building and improving on the experiences of earlier designs of skyscrapers and philosophies particularly green sustainable and ecological It argues that the true green skyscraper is the one that engages successfully with its larger urban context by establishing symbiotic relationships with the social economic and environmental aspects Since tall buildings are becoming larger and taller serving greater number of people and exerting higher demand on the environment and existing infrastructure any improvements in their design and construction will significantly enhance urban conditions The book elucidates how green skyscrapers better serve tenants mitigate environmental impacts and improve integration with the city infrastructure It explains how skyscrapers long life cycle offers the greatest justifications for recycling precious resources and makes it a worthwhile to employ green features in constructing new skyscrapers and retrofitting existing ones Subsequently the book explores new designs that are employing cutting edge green technologies at a grand scale including water saving technologies solar panels helical wind turbines sunlight sensing LED lights rainwater catchment systems graywater and blackwater recycling systems seawater powered air conditioning and the like In the future new building materials and smart technologies will continue to offer innovative design
