In The Wake Of Dreams:

What Do Dreams Do? Sue Llewellyn, 2020-10-09 We have puzzled over dreams for centuries From ancient societies believing dreams to be messages from the gods Freud's theory of dreams revealing our unconscious minds to modern day experiments in psychology and neuroscience dreams continue to fascinate but also be a source of mystery Are dreams just mental froth or do they have a purpose This book argues that originally we dreamed to survive Dreaming brains identify non obvious associations taking people places and events out of their waking life context to uncover complex and seemingly unrelated connections In our evolutionary past survival depended on being able to detect these divergent associative patterns to anticipate what predators and other humans might do as we moved around to secure food and water and meet potential mates Making associations drives many if not all brain functions In the present day dream associations may support memory emotional stability creativity unconscious decision making and prediction while also contributing to mental illness Written in a lively and accessible style and showing the reader how to identify patterns in their own dreams this book presents a highly original theory of dreaming and will be a compelling read for anyone interested in psychology consciousness and the arts as well as those involved in dream research

Modernism's Body Christine Froula, 1996 Froula argues that James Joyce's modernist portraits of the artist are also portraits of his culture

Zones of Re-membering Don Gifford, 2011-03 Don Gifford in Zones of Re-membering shows clearly thoughtfully yet entertainingly how no one explanation will account for the depth and complexity of human experience and its grounding in Memory Because consciousness is a function of Memory life without Memory is no life at all as Alzheimer s all too frequently demonstrates Both our individual and collective Memory is stored in the arts he contends which in turn provide a way of knowing and of nourishing Memory and consciousness Memory like language is never really stable or accurate but appears as narrative and these narratives collectively form our entire culture For Gifford the profoundest explorer of the human consciousness time and memory is James Joyce and in its range of reference wit and humanity the spirit of Joyce permeates this book
