wanting to know more about the pre Columbian civilizations of Peru The Inca civilisation was in fact the culmination of cultural contributions from a dozen or so complex pre Columbian civilizations such as those of Chav n Nazca Wari or Tiwanaku Intensely spiritual the Inca people attributed metaphysical powers to all manner of objects and places they considered sacred but at the same time the numerous alignments in their buildings show that they result from careful observations of the Sun the Moon and the stars at different times of the year Indeed the Incas were an essentially agrarian people so time measurement and calendar devices were essential for the purely pragmatic problem of planning agricultural tasks during the tropical year The book sets out to describe the Incas in their historical and geographical context avoiding specialization or excessive technicality but retaining a certain scientific rigor and including a detailed consideration of their interest in the sky and astronomy

Buren,2000-12-07 Three terms Order Legitimacy and Wealth delineate a comparative approach to ancient civilizations initially developed by John Baines Professor of Egyptology at the University of Oxford and Norman Yoffee Professor of Archaeology and Near Eastern Studies at the University of Michigan in 1992 In an influential paper they compared and contrasted the nature of social and political power in Egypt and Mesopotamia This was the first analysis of the impact of wealth and high culture on the development of states The contributors to the present book first published in 2000 apply the classic Baines Yoffee model to a range of ancient states around the world providing documentary and archaeological evidence on the production and uses of high culture literature and monumental architecture There are chapters on Mesoamerica the Andes the Indus Valley the Han Dynasty of China and Greece during the Roman empire while others expand on the original Egypt Mesopotamia comparison **The Clique** ,1954 **Medieval Legal and Political Thought**

Larry May,2021-12-13 Medieval legal and political thought encompasses the period from approximately 500 CE to 1500 CE The term Medieval refers to the legal and political thought from the time of the late Roman Empire to that of the Renaissance The legal and political thought of the Middle Ages is overwhelmingly characterized by the increasing role that religion played in influencing politics and law By the high Middle Ages we find the great theorists Averroes Maimonides and Aquinas linking law to their respective religions of Islam Judaism and Christianity This book argues that the so called Dark Ages had very

significant ideas about the law especially how violence is to be contained which make this early Medieval period anything but Dark It suggests that the Christianization and Islamization of legal and political thought created almost as many problems as solutions to the increasingly diverse times that arose in the middle of the Middle Ages The book also shows that the late Middle Ages already held many of the most important legal and political ideas of the Renaissance showing that there was no clear break from the Medieval to the Modern periods of legal and political thought Of central importance is the way that the development of the idea of conscience made the natural law theories of the Medieval times a robust set of ideas that is still felt quite strongly today
