Individual And The Universe An Introduction To Philosophy:

The Individual and the Universe Oliver A. Johnson,1981 In my various introductions in addition to offering a humanistic setting for the selections presented I have endeavored to provide an intellectual and historical context as well and survey of the main problems with which they are concerned plus a review of the alternative solutions to these problems that philosophers have offered

Being and Intelligibility Albert Peter Pacelli,2017-10-03 What do we mean when we say that something is What is the meaning of human experience These two most elementary philosophical questions have perplexed thinkers for thousands of years Being and Intelligibility explores them from the simple premise that all entities are essentially logical in their being The book develops its three central theses that the beingness of beings called Being and the intelligibility of Being are one and the same that nothingness i e absolute not Being is self contradictory and unintelligible and therefore Being is logically necessary and that the fullness of human rational experience cannot be explained in materially reducible terms and requires recognition of the existence of transcendent reality which includes God as self grounding good will moral obligation and freedom and the souls of men Being and Intelligibility thoroughly investigates the implications of the essential logicity of Being including that human Being shows itself to itself from within itself as a substantive persistent morally obligated unity among the ordered manifold of its life experiences whose essential Being is orientation toward God

Individuals, Minds and Bodies: Themes from Leibniz Massimiliano Carrara,Antonio-Maria Nunziante,2004 Is analytic metaphysics the kind of metaphysics that contemporary analytic philosophers study One of the aims of this special issue of the *Studia Leibnitiana* is to demonstrate that it would be misleading to think so The reason is simply that some important past metaphysicians also adopted an analytic style and G W Leibniz is surely one of them His analysis on the notion of identity and individuality on the difference between artifacts and biological entities are pieces of analytic metaphysics The other aim of the volume is to show that there is a close semantic connection between the concepts of individual mind and body in Leibniz The book tried to

demonstrate it from both an analytical and a historical point of view **The Neo-Kantian Reader** Sebastian Luft,2024-11-01 The latter half of the nineteenth and the early part of the twentieth century witnessed a remarkable resurgence of interest in Kant's philosophy in Continental Europe the effects of which are still being felt today The Neo Kantian Reader is the first anthology to collect the most important primary sources in Neo Kantian philosophy with many being published here in English for the first time It includes extracts on a rich and diverse number of subjects including logic epistemology metaphysics philosophy of science and transcendental idealism Sebastian Luft together with other scholars provides clear introductions to each of the following sections to the authors as well as to each text placing them in historical and philosophical context the beginnings of Neo Kantianism including the work of Hermann von Helmholtz Otto Liebman Friedrich Lange and Hermann Lotze the Marburg School including Hermann Cohen Paul Natorp and Ernst Cassirer the Southwest School including Wilhelm Windelband Heinrich Rickert Emil Lask and Hans Vaihinger responses and critiques including Moritz Schlick Edmund Husserl Rudolf Carnap and the Davos dispute between Martin Heidegger and Ernst Cassirer The Neo Kantian Reader is essential reading for all students of Kant nineteenth and twentieth century philosophy history and philosophy of science and phenomenology as well as to those studying important philosophical movements such as logical positivism and analytic philosophy and its history The Square of Life 2 Swami Ram Charran,2012-05-22 In the beginning there was Mythology and Magic then came Philosophy and Consciousness followed by Cosmology and Religion then Physics and Chemistry were developed into science Now in this series of books called the Square Of Life Swami Ram has been able to combine all of those in a simple science called the Vedic Sciences which explains all the phenomenon we sometimes though were not possible in life When compared to the subject of physics the Vedic Sciences have presented far more credible and practical explanations of the occurrences and events that happen in a human being's life than scientists of today can offer In this book we can see the way our Life and Physical experiences are influenced by the various Energies of the Universe and how our life will go through the cyclic vibrations of the universe on a daily monthly and yearly basis This book will help you assess that future experience and it will prepare you for it The Cambridge University Calendar University of Cambridge,1904 The Oxford Handbook of German Philosophy in the Nineteenth Century Michael N. Forster,Kristin Gjesdal,2015-02-05 The Oxford Handbook of German Philosophy in the Nineteenth Century is the first collective critical study of this important period in intellectual history The volume is divided into four parts The first part explores individual philosophers including Fichte Hegel Schopenhauer Marx and Nietzsche amongst other great thinkers of the period The second addresses key philosophical movements Idealism Romanticism Neo Kantianism and Existentialism The essays in the third part engage with different areas of philosophy that received particular attention at this time including philosophy of nature philosophy of mind philosophy of language philosophy of history and hermeneutics Finally the contributors turn to discuss central philosophical topics from skepticism to materialism from dialectics to ideas of historical

and cultural Otherness and from the reception of antiquity to atheism Written by a team of leading experts this Handbook will be an essential resource for anyone working in the area and will lead the direction of future research **Awakening**
