Culture in Psychiatry (Psychology Revivals) Suman Fernando, 2014-10-14 As psychiatry has developed it has proved to be susceptible to the influence of contemporary social and political mores With its origins in nineteenth century Europe psychiatry evolved as an ethnocentric body of knowledge the vehicle of implicit and overt racism Originally published in 1988 this author however saw no reason why the contemporary psychiatrist should not challenge this ethnocentrism He provides a critical account of the development of psychiatry in relation to its cultural context and then examined contemporary practice of the time in the light of this development Throughout the book is informed by an awareness of issues of race and culture and of their difficult interactions the author emphasising both the frequency of racist attitudes and the very real cultural distinctions in our society distinctions that can be used to mask what are actually racist sentiments What emerges is not just a plea for an anti racist culture sensitive psychiatry but a blueprint for how this can be brought about He argued that the shift towards community work and social psychiatry could reorientate the profession by confronting it with its social setting and responsibilities This book represented a significant contribution to this literature for all mental health professionals and social scientists with an interest in this field at the time the author has gone on to write many more *A Resident's Guide to*

Psychiatric Education M. Thompson, 2012-12-06 This is the inaugural volume of the new series Critical Issues in Psychiatry An Educational Series for Residents and Clinicians It is an appropriate beginning for this book represents a milestone in the evolution of psychiatric education For the first time there will now be a single place where one can find a comprehensive collection of educational goals and objectives to define the broad spectrum of knowledge and skills essential for general and child psychiatry This collection does not represent the bias of a single educator or program Rather it consists of a consensually validated ranking of relative importance for each educational goal and objective as determined by a large and international sampling of experienced psychiatric educators as well as an editorial board with some of the most distinguished names in psychiatric education It is even possible to tell at a glance whether the ranked level of importance is the same or different within several national groups for example Canadians vs Americans This book is intended for all students of psychiatry It is particularly valuable to residents in training but equally so for experienced clinicians preparing for Board examination or simply attending to the process of continuing education and intellectual renewal While it might well

be used by an institution to delineate the dimensions of a training program in psychiatry it is intended primarily for the self evaluation and self monitoring of one's growth as a psychiatrist

Celibacy in Crisis A.W. Richard Sipe, 2004-03-01 In the midst of the worst crisis the Catholic Church has seen in almost 500 years this book challenges Catholic authorities to renew rethink or reform the long standing institution of celibacy

Making It Crazy Sue E. Estroff, 1985-06-06 Estroff describes a group of chronic psychiatric clients as they attempt life outside a mental hospital

Anthropological Approaches to Psychological Medicine Professor John Cox, Vieda Skultans, 2000-08-01 This text brings together clinicians and researchers in psychiatry and mental health The aim is to explore what we can learn from anthropology to achieve a contextual understanding of mental illness and health in contemporary society The book contains a wide selection of ideas and works well to bridge the gap between anthropology and psychiatry

Textbook of Cultural Psychiatry Dinesh Bhugra, Kamaldeep Bhui, 2018-04-05 Cultural psychiatry deals with the impact of culture on causation perpetuation and treatment of patients suffering with mental illness The role of culture in mental illness is increasingly being recognised and the misconceptions that can occur as a result of cultural differences can lead to misdiagnoses under or over diagnosis This second edition of the Textbook of Cultural Psychiatry has been completely updated with additional new chapters on globalisation and mental health social media and tele psychiatry Written by world leading experts in the field this new edition provides a framework for the provision of mental health care in an increasingly globalised world The first edition of the Textbook of Cultural Psychiatry was commended in the BMA Book Awards in 2008 and was the recipient of the 2012 Creative Scholarship Award from the Society for the Study of Psychiatry and Culture

Reimagining Psychiatric Epidemiology in a Global Frame Anne Lovell, Gerald M. Oppenheimer, 2022 Psychiatric epidemiology like cancer heart disease or AIDS epidemiology increasingly dominates the bio politics of nations and of worldwide health campaigns like the Global Burden of Disease Yet this is the first book length history of psychiatric epidemiology arguably the oldest of epidemiological disciplines albeit the slowest to develop intellectually and institutionally The epidemiology of mental disorders and mental health differs radically from that of other diseases and health conditions in that it studies subjective states difficult to objectify or precisely define Despite these obstacles over many decades researchers governments and international organizations have continually attempted to measure mental states their distribution and presumed causes in the hope of informing public policy clinical treatment social reform and population management Since the nineteenth century epidemiology and earlier proto epidemiology in dissimilar contexts have served strikingly different purposes from census counts of the insane to imperialist and racist psychological profiles of subaltern groups to attempts to measure diagnostic entities in an entire nation We argue that these multiple historical paths resulted not in a uniform field based on common paradigms as was the case for cardiovascular and cancer epidemiology but in a plurality of psychiatric epidemiologies driven by different intellectual questions reformist ideals national cultures and social control objectives

Mental Health Services for Minority Ethnic Children and Adolescents Carol Joughin, Mhemooda Malek, 2004-03-15 The authors consider how ethnicity is defined and how the field of mental health has developed in the West according to Western concepts of health and well being and show how an understanding of the key practice issues and policy and academic debates can enable professionals to develop and fine tune their cultural competence

Curandero Hispanic Ethno-Psychotherapy & Curanderismo Antonio Noé Zavaleta Ph.D, 2020-10-08 Curandero Ethno Psychotherapy Curanderismo Hispanic Mental Health in the 21st Century is the product of more than 50 years of the study of curanderismo and Hispanic mental health In this book Dr Zavaleta examines curanderismo and the folk beliefs carried by immigrants across the U S Mexico border In the United States the Hispanic population is notoriously underserved in both physical and mental health care In Curandero Dr Zavaleta reviews the history of curanderismo beginning with pre Columbian populations and traces the development of curanderismo over the past 500 years He also examines the history and practice of psychiatry and the emergence of ethno psychotherapy as well as psychiatry s historic failure to incorporate culture in the treatment of the mental health of Hispanic populations Dr Zavaleta seeks to introduce curanderismo to psychiatry with the intention of incorporating its important aspects in the treatment of Hispanic mental health

Formative Experiences Carol M. Worthman, Paul M. Plotsky, Daniel S. Schechter, Constance A. Cummings, 2010-04-07 The authors offer a unique exploration of the formative effects of children s early life experiences with an emphasis on interactions among neurodevelopmental behavioural and cultural dynamics Multidisciplinary case studies

focus on specific periods of development or windows of susceptibility during which care giving and other cultural practices potentially have a long lasting impact on brain and behaviour Chapters describe in detail how social experience interacts with neurodevelopmental disorders how epigenetic mechanisms mediate the effects of early environment the interaction of temperament and environmental influences the implications of early life stress or trauma for mental health and well being and the cultural shaping of sexual development and gender identity The final section translates insights from this work into a fresh appraisal of child rearing practices clinical interventions and global public health policy that affect the mental health and well being of children around the world

Psychiatry in Crisis Vincenzo Di Nicola, Drozd Stojanov, 2021-02-03 The field of academic psychiatry is in crisis everywhere It is not merely a health crisis of resource scarcity or distribution competing claims and practice models or level of development from one country to another but a deeper more fundamental crisis about the very definition and the theoretical basis of psychiatry The kinds of questions that represent this crisis include whether psychiatry is a social science like psychology or anthropology whether it is better understood as part of the humanities like philosophy history and literature or if the future of psychiatry is best assured as a branch of medicine based on genetics and neuroscience In fact the question often debated since the beginning of modern psychiatry concerns the biomedical model so that part of psychiatry's perpetual self questioning is to what extent it is or is not a branch of medicine This unique and bold volume offers a representative and critical survey of the history of modern psychiatry with deeply informed transdisciplinary readings of the literature and practices of the field by two professors of psychiatry who are active in practice and engaged in research and have dual training in scientific psychiatry and philosophy In alternating chapters presenting contrasting arguments for the future of psychiatry the two authors conclude with a dialogue between them to flesh out the theoretical research and practical implications of psychiatry's current crisis outlining areas of divergence consensus and fruitful collaborations to revision psychiatry today The volume is scrupulously documented but written in accessible language with capsule summaries of key areas of theory research and practice for the student and practitioner alike in the social and human sciences and in medicine psychiatry and the neurosciences

Out of Place Michael Goddard, 2011-04-01 The Kakoli of the Western Highlands of Papua New Guinea PNG the focus of this study did not traditionally have a concept of mental illness They classified madness according to social behaviour not mental pathology Moreover their conception of the person did not recognise the same physical and mental categories that inform Western medical science and psychiatry in particular was not officially introduced to PNG until the late 1950s Its practitioners claimed that it could adequately accommodate the cultural variation among Melanesian societies This book compares the intent and practice of transcultural psychiatry with Kakoli interpretations of and responses to madness showing the reasons for their occasional recourse to psychiatric services Episodes involving madness as defined by the Kakoli themselves are described in order to offer a context for the historical lifeworld and praxis of the community and raise fundamental questions

about whether a culturally sensitive psychiatry is possible in the Melanesian context
