Policy Making in Multilevel Systems

Jan Biela, Annika Hennl, André Kaiser, 2024-10-31

Does the territorial state organisation matter for effective policy making and if so in what way

So far we know relatively little about its effects on policy making and policy outputs

Starting from the hypothesis that decentralised policy making has positive effects whereas federalism has a slightly negative impact on policy performance this book systematically tests the independent and interdependent effects of different combinations of federal unitary and decentralised centralised structures of decision making and implementation

Based on a mixed methods design it first quantitatively tests the relationships for the OECD countries in cross sectional as well as panel designs

In a second step qualitative case studies are conducted for four countries

federal centralised Austria

federal decentralised Switzerland

unitary decentralised Denmark

and unitary centralised Ireland

The authors study two space related policy areas both with regard to the decision making and the implementation stage of the policy making process

regional policy and transport policy
