*The Story of Danish Museums* Thomas Bloch Ravn,2020-03-12 Endless rows of stone axe heads display after display Around 1900 a typical Danish museum would focus on finds research and prehistory But new thoughts were brewing Visions of focusing on lives lived and making museums for people not about things This shift gave birth to folk and open air museums where the distant past no longer eclipsed human memory The resulting clash the capital vs the provinces the National Museum vs the many new local museums The debate goes on but today s angle is different As Danes seek out cultural history museums like never before this success raises the eternal question Where should museums head in the future Perhaps we spy the contours of new clashes on the distant horizon Take a guided tour of Danish museum history with Thomas Bloch Ravn director of the open air museum Den Gamle By      Mid-Century Modern Interiors Lucinda Kaukas Havenhand,2019-01-24 *Mid Century Modern Interiors* explores the history of interior design during arguably its most iconic and influential period The 1930s to the 1960s in the United States was a key moment for interior design It not only saw the emergence of some of interior design s most globally important designers it also saw the field of interior design emerge at last as a profession in its own right Through a series of detailed case studies this book introduces the key practitioners of the period world renowned designers including Ray and Charles Eames Richard Neutra and George Nelson and examines how they developed new approaches by applying systematic and rational principles to the creation of interior spaces It takes us into the mind of the designer to show how they each used interior design to express their varied theoretical interests and reveals how the principles they developed have become embodied in the way interior design is practiced today This focus on unearthing the underlying ideas and concepts behind their designs rather than on the finished results creates a richer more conceptual understanding of this pivotal period in modernist design history With an extended introduction setting the case studies within the broader context of twentieth century design and architectural history this book provides both an introduction and an in depth analysis for students and scholars of interior design architecture and design history      **Official Gazette of the United States Patent Office** USA Patent Office,1901      *Schools and classes for delicate children* James Frederick Rogers,1931      Water Displays in Domestic Spaces across the Late Roman West Ginny Wheeler,2025-02-28 Analyzes the use of water features in late antique homes across the Western Roman Empire highlighting their aesthetic social and practical significance For ambitious late antique homeowners seeking to demonstrate their status and taste water and its display offered almost infinite possibilities *Water Displays in Domestic Spaces across the Late Roman West Cultivating Living Buildings* presents the first synthesis of the archaeological evidence for late antique water features in both urban houses and extra urban villas across the western Empire Ginny Wheeler examines a wide and varied range of examples from decorative basins and pools to fountains of all forms and water equipped dining couches Through careful analysis and evocative

reconstruction of the water displays in their diverse contexts this book explores how they were incorporated into late antique residences the different ways that they enhanced domestic spaces and the potential motives behind their insertion To assess the great efforts to which homeowners particularly in urban settings went to ensure their installation and continued operation one case study focuses on the best preserved cityscape of Ostia While the roles of water features ranged from practical to aesthetic social and symbolic this book highlights their previously under considered contributions to thermal comfort and sensory experience through in depth analyses of two Iberian villas Wheeler identifies broad patterns and regional distinctions in form and decor before reflecting on the multifaceted significance of water in the domestic sphere informed by literary epigraphic and iconographic sources Beyond contributing to the ongoing debate over fountains utility versus aesthetics this research offers new insights into the organization of life at household and neighborhood levels the social relations between homeowners occasioned by water installations and the understanding and application of environmental design in antiquity
