## **Internat Financial Architecture:**

The Reform of the International Financial Architecture Rosa Lastra, 2001 Papers presented at a conference in London in May 1999      Out of the Box Thoughts about the International Financial Architecture Barry J. Eichengreen, 2009 The Global Credit Crisis of 2008-09 has underscored the urgency of reforming the international financial architecture While a number of short term reforms are already in train this paper contemplates more ambitious reforms of the international financial architecture that might be implemented over the next ten years It proposes routinizing the expansion of IMF quotas and the conduct of exchange rate surveillance It contemplates an expanded role for the SDR in international transactions which would require someone like the IMF to act as market maker It considers proposals for reimposing Glass Steagall like restrictions on commercial and investment banking something that will have to be coordinated internationally to be feasible Other proposals would require banks to purchase capital insurance here the question is who would be on the other side of the market Again there is likely to be a role for the IMF Then there are arguments for a new agency or institution to deal with cross border bank insolvencies Any such entity will require staff support which might plausibly come from the Fund Finally some insist that international colleges of regulators are not enough that it is desirable to create a World Financial Organization WFO with the power to sanction members whose national regulatory policies are not up to international standards A WFO will similarly need staff support of which the IMF would be one possible source All this of course presupposes meaningful IMF governance reform so that the institution has the legitimacy and efficiency to assume these additional responsibilities The paper therefore concludes with some conventional and unconventional proposals for IMF governance reform Abstract      The International Financial Architecture Stijn Claessens, 2003 Annotation This title can be previewed in Google Books <http://books.google.com/books/vid/ISBN9789056292669>      **The International Financial Architecture** Peter B. Kenen, 2001 Kenen economics and international finance Princeton University reviews the reform efforts that followed the 1994-95 Mexican crisis and evaluates their results in the time since then He compares the existing efforts with the more radical recommendations of the Meltzer Report and considers the implications of his analysis for the role of the IMF He then offers his own recommendations for further reform c Book News Inc      **International Financial Architecture** C.
