*International Aid and China's Environment* Katherine Morton, 2005 Katherine Morton analyses the relationship between international and local responses to environmental problems in China challenging the prevailing wisdom that weak compliance is the only constraint upon local environmental management in China [International Aid and China's Environment](#)

Katherine Morton, 2006-05-17 Rapid economic growth in the world's most populous nation is leading to widespread soil erosion desertification deforestation and the depletion of vital natural resources The scale and severity of environmental problems in China now threaten the economic and social foundations of its modernization Using case studies Morton analyzes the relationship between international and local responses to environmental problems in China challenging the prevailing wisdom that weak compliance is the only constraint upon local environmental management in China It advances two interrelated discussions first it constructs a conceptual framework for understanding the key dimensions of environmental capacity This is broadly defined to encompass the financial institutional technological and social aspects of environmental management Second the book presents the results of an empirical inquiry into the implementation of donor funded environmental projects in both China's poorer and relatively developed regions By drawing upon extensive fieldwork it seeks to explain how and under what conditions international donors can strengthen China's environmental capacity especially at the local level It will be of interest to those studying Chinese politics environmental studies and international relations

**China's Environmental Foreign Relations** Heidi Wang-Kaeding, 2021-03-01 Over recent decades China has moved from being a follower towards taking on a leadership role in global environmental governance This book discusses this important development It examines the key role of Chinese interest groups showing how through various domestic dynamics they have influenced how China has approached issues such as climate change and the environment Focusing on examples of multilateral environmental treaties bilateral cooperation and the proposition of alternative norms the idea of China as an ecological civilisation the book provides crucial insights on the evolution of China's approach to international relations and engagement with global environmental governance and contributes to the discussion of what kind of power China is poised to become

**China Engages Global Health Governance** L. Chan, 2011-01-03 This book explores public health in China in particular the management of the HIV AIDS epidemic with the goal of understanding China's compliance with and resistance to the norms and rules embedded in the global health regime

**China's International Transboundary Rivers** Lei Xie, Jia Shaofeng, 2017-12-06 China has forty major transboundary watercourses with neighbouring countries and has frequently been accused of harming its downstream neighbours through its domestic water management policies such as the construction of dams for hydropower This book provides an understanding of water security in Asia by investigating how shared water resources affect China's relationships with neighbouring countries in South East Southeast and Central Asia Since China is an upstream state on most of its shared transboundary rivers the country's international water policy is at the

core of Asia's water security. These water disputes have had strong implications for China's interstate relations and also influenced its international water policy alongside domestic concerns over water resource management. This book investigates China's policy responses to domestic water crises and examines China's international water policy as well as its strategy in dealing with international cooperation. The authors describe the key elements of water diplomacy in Asia which demonstrate varying degrees of effectiveness of environmental agreements. It shows how China has established various institutional arrangements with neighbouring countries primarily in the form of bilateral agreements over hydrological data exchange. Detailed case studies are included of the Mekong, Brahmaputra, Ili and Amur rivers. **Global Governance and China** Scott Kennedy, 2017-09-18

This volume offers systematic analysis of China's growing engagement in global governance institutions over the past three decades. During this period China has gone from outsider to observer to insider. The volume is based on studies of Chinese involvement in a wide cross section of regimes including trade, finance, intellectual property rights, foreign aid and climate change. The contributions show that China's participation in global governance reflects the mutually interactive processes of China's own socialization into the global community and the simultaneous adaptation of global institutions and actors to China's growing activism. Both China and the international system are internally complex. Hence Chinese engagement varies across economic regimes yielding different results in terms of Chinese compliance, its influence on regimes and the extent of cooperation and conflict in addressing challenges in international society. The chapters reveal that China is neither purely a savior nor scofflaw of the global economic system and while China is a defender of the status quo in some areas it is a reformer in others and occasionally a revisionist in still other spheres. A detailed analysis of many areas of global governance, this volume will be essential reading for students and scholars of international relations, Chinese studies and global governance. *China and the International System* Xiaoming Huang, 2013. This book considers the evolving relationship between China and the international system and the interaction between a China of profound change in its identity, capability and influence and an international system that is itself experiencing a process of far-reaching transformation. It develops an analytical framework that allows us to capture, understand and explain a more dynamic pattern of agent-structure interaction in China's relationship with the international system. By demonstrating a more dynamic and mutually constitutive relationship between China and the international system, the book explores the extent to which both transform themselves in the process and provides a fuller and more effective assessment of the evolving nature of the relationship. In doing so it addresses key issues in the current literature on the relationship of China and the international system and helps close the gap in our knowledge of the conditions and consequences of change and stability in the international system as a result of the change in distributions of power, capability and influence among nation states.

Critical Issues in Contemporary China Czeslaw Tubilewicz, 2016-12-12. Critical Issues in Contemporary China: Unity, Stability and Development comprehensively examines key problems crucial to understanding modern day China. Organized

around three interrelated themes of unity stability and development each chapter explores distinct issues and debate their significance for China domestically and for Beijing's engagement with the wider world While presenting contending explanatory approaches contributors advance arguments to further critical discussion on selected topics Main issues analysed include political change military transformation legal reforms economic development energy security environmental degradation food security and safety demographic trends migration and urbanization labour unrest health and education social inequalities ethnic conflicts Hong Kong's integration cross Strait relations Given its thorough and up to date assessment of major political social and economic challenges facing China this fully revised and substantially expanded new edition is an essential read for any student of Chinese Studies

**Politics in China** William A. Joseph, 2019 On October 1 2019 the People's Republic of China PRC will celebrate the 70th anniversary of its founding And what an eventful and tumultuous seven decades it has been During that time under the leadership of the Chinese Communist Party CCP China has been transformed from one of world's poorest countries into one of its fastest growing economies and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence But in the late 1950s the PRC experienced the most deadly famine in human history caused largely by the actions and inactions of its leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy And in 1989 the CCP unleashed the army to brutally crush demonstrations by students and others calling for political reform China is now for the most part peaceful prospering and proud The CCP maintains a firm grip on power through a combination of harsh repression and popular support largely based on its recent record of promoting rapid economic growth Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities ethnic unrest and a rising

tide of social protest Politics in China provides an accessible yet authoritative introduction to how the world's most populous nation and rapidly rising global power is governed today The third edition has been extensively revised thoroughly updated and includes a new chapter on the internet and politics in China The book's chapters provide overviews of major periods in China's modern political history from the mid nineteenth century to the present examinations of key topics in contemporary Chinese politics and analyses of developments in four important areas located on China's geographic periphery Tibet

Xinjiang Hong Kong and Taiwan **Local Climate Governance in China** M. Schröder, 2011-11-08 Based on the empirical analysis of the effectiveness of four provincial centres for the diffusion of the Clean Development Mechanism CDM a market mechanism for emission reductions Miriam Schröder scrutinizes the strengths and weaknesses of hybrid actors performance on the local Chinese carbon market China's Global Quest for Resources Fengshi Wu, Hongzhou Zhang, 2016-11-18

The world's key resources of energy food and water which are closely connected and interdependent on each other are coming under increasing pressure as a result of increasing population development and climate change In the case of China following its recent economic surge energy food and water are already nearing the point of shortage This book considers how China is working to avoid shortages of energy food and water and the effect this is having internationally Subjects covered include domestic policy debates on China's resource strategies challenges for managing transboundary waters related to China responses from various regions and countries to China's Go Out strategy and China's increasing energy links with Russia and declining agricultural trade with the United States The book concludes by discussing in comparative perspective China's outward resource acquisition activities and the consequent policy implications **Feeling the Heat** Ian

Bailey, Hugh Compston, 2012-02-17 To avoid uncontrolled climate change greenhouse gas emissions will have to be brought under control by major emitters outside the affluent West The authors investigate the political obstacles in BRIC countries and what their governments could do to strengthen climate policies without incurring serious political damage **Norms,**

**Storytelling and International Institutions in China** Xiaoyu Lu, 2021-02-15 This book is a political ethnography of norm diffusion and storytelling through international institutions in China It is driven by intellectual puzzles and realpolitik questions are we converging or diverging on values Do emerging powers reinforce or reshape the existing international order Are international institutions socialising emerging powers or being used to promote alternative norms This book addresses these questions through fieldwork research over three years at the United Nations Development Programme in China the first international development agency to enter post reform China in 1979 It provides a crucial case to study the everyday practices of norm diffusion in emerging powers and highlights the central role of storytelling in translating and contesting normative scripts The book selects norms in human rights rule of law and development cooperation to analyse how translators and brokers innovatively use stories to advocate and how these normative stories move back and forth between local global spaces and orders A fascinating ethnography that tells us much about international institutions and China's

changing role in the world of interest both to China specialists and theorists of international relations Rana Mitter Director of the University of Oxford China Centre University of Oxford UK Through pioneering ethnographic research Xiaoyu Lu s outstanding book makes a major contribution to our understanding of norm diffusion and the ways in which China is shaping and is shaped by international development norms Lu s richly textured analysis shows how norm translators use case studies personal stories and other narratives to negotiate between global and local normative orders and to facilitate the day to day processes of norm diffusion Amy King Associate Professor Strategic and Defence Studies Centre Australian National University Australia An intricate account of the everyday politics in international development institution that will enrich our understanding of emerging powers and their roles in global development Emma Mawdsley Director of the Margaret Anstee Centre for Global Studies University of Cambridge UK China and the Environment Sam Geall, 2013-04-11 Sixteen of the world s 20 most polluted cities are in China A serious water pollution incident occurs once every two to three days China s breakneck growth causes great concern about its global environmental impacts as others look to China as a source for possible future solutions to climate change But how are Chinese people really coming to grips with environmental problems This book provides access to otherwise unknown stories of environmental activism and forms the first real life account of China and its environmental tensions China and the Environment provides a unique report on the experiences of participatory politics that have emerged in response to environmental problems rather than focusing only on macro level ecological issues and their elite responses Featuring previously untranslated short interviews extracts from reports and other translated primary documents the authors argue that going green in China isn t just about carbon targets and energy policy China s grassroots green defenders are helping to change the country for the better Guanxi and Local Green Development in China Chunhong Sheng, 2019-06-19 This book examines the factors which contribute to local green development in China and employs political ecology to analyze the relationship between power and the environment Specifically it looks at which actors control access to resources and are therefore able to promote environmental progress Following the reform and opening up of China in the 1970s entrepreneurs and local officials profited economically and politically and formed close relationships known as guanxi in China As a result they have also been criticized as those responsible for the associated ecological damage This book does not contest this association but instead argues that the current literature places too much emphasis on their negative influence and the positive influence of their environmental work has been neglected Building on three case studies where local green development is being pursued Shanghai Pudong New Area Baoding and Wuning this book shows how local officials and entrepreneurs can also be the crusaders of a greener environment at the local level in China This book will be of great interest to students and scholars of Chinese studies with a particular interest in environmental policy and politics business and society as well as those interested in sustainable development more broadly
