International Business, 2000-2001 Fred H. Maidment, 1999-12 This reader of public press articles covers topics such as the nature of international business organizations and monetary systems in the international environment foreign environments and dynamics and how management deals with environmental forces **Proceedings of the 1998 ACM SIGMOD International Conference on Management of Data** Laura Haas, Ashutosh Tiwary, 1998 *International Business and National War Interests* Ben Wubs, 2008-06-11 This book ties together business history the history of the Nazi economic administration and European history It is relevant to several disciplines including international relations economic and business history European history and political science *RETRACTED, The Regulation of Transnational Mergers in International and European Law* Dimitris Liakopoulos, Armando Marsilia, 2009-12-07 The major problem associated with the regulation of transnational mergers which affect several national markets is the allocation of jurisdiction Each country concerned may wish to exert jurisdiction and apply its national competition law to regulate the anti competitive effects a merger may have in its territory However this approach may lead to risks of inconsistent decisions regarding the legality of mergers Indeed the national competition laws applied by the regulating authorities may diverge in several aspects which raise the likelihood of inconsistency Therefore it is desirable to opt for regulatory approaches which are more sensitive to the transnational nature of mergers and which allow cooperation between competition authorities A possible solution may be bilateral cooperation agreements through which two countries coordinate the enforcement activities of their national competition authorities However the benefits of these agreements are enjoyed only by the signatory parties The sole reliance upon bilateral agreements does not appear to be the optimal regulatory approach towards transnational mergers
