structure procedures and likely judicial interpretation to determine whether it improves upon the traditional standard forms of contract. Special attention is given in the commentary to the development and the significance of the principles underlying preparation of the NEC as well as the arguments in favour of and against them. Throughout the detailed commentary upon the NEC clauses comparisons to the traditional forms are also made to highlight unique features and principles of general application. The conclusion reached is that the NEC does make a significant contribution to the development of standard forms of contract, addresses many of their shortcomings and offers one of the best models for their future development direction and design. The commentary draws upon the body of the project management literature and legal analysis to support its conclusions. *The New Engineering Contract: A legal commentary* will be essential reading for lawyers, barristers and solicitors as well as engineers and project managers.

**Smart Contracts** Marcelo Corrales Compagnucci, Mark Fenwick, Stefan Wrba, 2021-05-06. This book brings together a series of contributions by leading scholars and practitioners to examine the main features of smart contracts as well as the response of key stakeholders in technology, business, government and the law. It explores how this new technology interfaces with the goals and content of contract law, introducing and evaluating several mechanisms to improve the observability and reduce the costs of verifying contractual obligations and performance. It also outlines various design patterns that ensure that end users are protected from themselves, prevent cognitive accidents and translate expectations and values into more user-oriented agreements. Furthermore, the chapters map the new risks associated with smart contracts, particularly for consumers, and consider how they might be alleviated. The book also discusses the challenge of integrating data protection and privacy concerns into the design of these agreements and the broad range of legal knowledge and skills required. The case for using smart contracts goes beyond contracts narrowly defined and they are increasingly used to disrupt traditional models of business organisation. The book discusses so-called decentralised autonomous organisations and decentralised finance as illustrations of this trend. This book is designed for those interested in looking to deepen their understanding of this game-changing new legal technology.

*Governance Principles for Concessions and Contracts in Public Forests* Food and Agriculture Organization of the United Nations, Andrew Frank Howard, John A. Gray, 2001-01-01. This report reviews the types of contracts used in the management of public forests. Agreements for forest utilisation are analysed along with contracts for the acquisition of goods and services. The study illustrates the importance of an effective institutional and legal framework. The key elements to consider when awarding contracts are detailed along with valuation administration and ensuring the terms of the contract are fulfilled. Special attention is given to the importance of awarding contracts through a transparent and competitive process.
