Neubig, Sacha Wunsch-Vincent, 2017 Understanding cross border flows of disembodied knowledge often associated with intellectual property IP is essential to analyzing how modern economies operate This paper documents how available data to document these IP flows are distorted by various factors including tax planning by multinational enterprises It finds that tax induced mismeasurement could be more than 35% and greater for individual countries particularly high tax rate countries *International Business* S. Wasko,2008 This volume addresses issues revolving around the production of mediated cultural products across borders More specifically the authors consider cross border cultural production in the film and television industries and how it affects and is affected by media centers and more recently established production locations The film and television industries have long been recognized as playing important economic political and cultural roles And while it could be argued that historically these forms of cultural production often have been international endeavors the choice of production sites has become an especially contentious issue during the last few decades as global production has expanded While some factions notably from the US film and television industries refer to this issue as runaway production this book takes a much broader look at the implications and consequences of this phenomenon Basically cross border production involves the expansion of production away from traditional centers whether to other countries or to other locations within the same country Thus this study covers a wide range of issues involving economic and political considerations as well as creative and aesthetic decision making
