International Perspectives on Teaching about Hazards and Disasters, 1996 International Perspectives on Teaching about Hazards and Disasters John Lidstone, 1996 Discussing international perspectives on teaching about hazards and disasters this volume features examples from Germany France South Africa New Zealand Hong Kong and Nigeria

International Perspectives on Natural Disasters: Occurrence, Mitigation, and Consequences Joseph P. Stoltman, John Lidstone, Lisa M. DeChano, 2007-03-11 Reports of natural disasters fill the media with regularity Places in the world are affected by natural disaster events every day Such events include earthquakes cyclones tsunamis wildfires the list could go on for considerable length In the 1990s there was a concentrated focus on natural disaster information and mitigation during the International Decade for Natural Disasters Reduction IDNDR The information was technical and provided the basis for major initiatives in building structures designed for seismic safety slope stability severe storm warning systems and global monitoring and reporting Mitigation or planning in the event that natural hazards prevalent in a region would suddenly become natural disasters was a major goal of the decade long program During the IDNDR this book was conceptualized and planning for its completion began The editors saw the need for a book that would reach a broad range of readers who were not actively or directly engaged in natural disasters relief or mitigation planning but who were in decision making positions that provided an open window for addressing natural disaster issues Those people were largely elected public officials teachers non governmental organization staff and staff of faith based organizations Those people for the most part come to know very well the human and physical characteristics of the place in which they are based With that local outreach in mind the editors intended the book to encourage readers to 1 *Disaster Risk Management* Prof. Dr. Vladimir M.

Cvetković, 2024-04-22 The textbook is intended for students of basic and master academic studies as well as to a wider professional audience members of the emergency services etc who are increasingly faced with the need for a more thorough understanding of the problem of a multidisciplinary approach in the identification process disaster risk analysis and treatment The content of the textbook is in line with the curriculum of the subject Disaster Risk Management which is taught in the third year of basic academic studies of the Faculty of Security In the writing of the textbooks great attention was paid to meeting high standards in terms of scientific and professional and pedagogical and didactic requirements and extensive scientific and professional material of all relevant foreign and domestic authors was used Besides the author used a fair treasure trove of his scholarly and professional papers which have been scientifically verified by numerous international and national reviewers Also the author incorporated most of his research findings in the country and abroad into the text of the textbook to enrich it with scientifically verified facts Also invaluable experience in working with students has helped to release the textbook from the additional scientific reflection that would make it difficult to acquire basic knowledge in the field of disaster risk management The first edition of the textbook also has its limitations which are reflected in the

insufficient theoretical development of the scientific discipline which is relatively young and should contribute to creating additional conditions for the construction of the theory I would like to emphasize that the textbook represents the first such publication published in the Serbian language in our region which will greatly improve the knowledge and professional competencies of the general professional public

Issues in Teaching and Learning of Education for Sustainability Chew-Hung Chang, Gillian Kidman, Andy Wi, 2019-09-25 In a fast changing globalising world the teaching and implementation of a curriculum for Education for Sustainability EfS has been a challenge for many teachers Issues in Teaching and Learning of Education for Sustainability highlights the issues and challenges educators and academics face in implementing EfS and gives examples of what an EfS curriculum may look like and how some institutions translate the theory into practice Organised into three parts the volume looks at the who EfS for whom the what EfS curriculum and the how translating from theory to practice The concluding chapter provides ideas and directions on where the world can proceed regarding sustainability education and how it can help in the teaching and learning of sustainability Considering social issues such as poverty education health culture and the use of natural resources this book proposes a different path towards Education for Sustainability Providing concrete data on the realisation of sustainable development Issues in Teaching and Learning of Education for Sustainability will be of interest to geographers geography educators and professionals concerned with Education for Sustainability

Education and Natural Disasters David Smawfield, 2013-03-28 What is the relationship between education and natural disasters Can education play a role in ameliorating and mitigating them preparing people in how to respond and even helping to prevent them If so how Drawing on research carried out in a number of different countries including Australia China India Japan the UK and the USA the contributors consider the role of education in relation to natural disasters The case studies expand conceptual and empirical understandings of the understudied relationship between education and natural disasters and uncover the potential and the limitations of education for mitigating responding to and potentially preventing natural disasters The contributors also consider the extent to which so called natural disasters such as mudslides caused by deforestation and flooding areas built on known flood plains are linked to human behaviour and how education can impact on these

Environmental Hazards and Disasters Bimal Kanti Paul, 2011-11-30 Environmental Hazards and Disasters Contexts Perspectives and Management focuses on manifested threats to humans and their welfare as a result of natural disasters The book uses an integrative approach to address socio cultural political and physical components of the disaster process Human and social vulnerability

as well as risk to environmental hazards are explored within the comprehensive context of diverse natural hazards and disasters. In addition to scientific explanations of disastrous occurrences, people and governments of hazard-prone countries often have their own interpretations for why natural disasters occur. In such interpretations, they often either blame others in order to conceal their inability to protect themselves or they blame themselves, attributing the events to either real or imagined misdeeds. The book contains a chapter devoted to the neglected topic of such reactions and explanations. Includes chapters on key topics such as the application of GIS in hazard studies, resiliency, disasters and poverty, climate change and sustainability, and development. This book is designed as a primary text for an interdisciplinary course on hazards for upper-level undergraduate and Graduate students. Although not targeted for an introductory hazards course, students in such a course may find it very useful as well. Additionally, emergency managers, planners, and both public and private organizations involved in disaster response and mitigation could benefit from this book, along with hazard researchers. It not only includes traditional and popular hazard topics, e.g., disaster cycles, disaster relief and risk, and vulnerability, it also includes neglected topics such as the positive impacts of disasters, disaster myths, and different accounts of disasters and disasters and gender.
