*Man* James R. Hansen, 2012-11-27 On July 20 1969 the world stood still to watch American astronaut Neil A. Armstrong become the first person ever to step on the surface of another heavenly body Upon his return to Earth Armstrong was celebrated for his monumental achievement He was also as NASA historian Hansen reveals in this authorized biography misunderstood Armstrong's accomplishments as an engineer a test pilot and an astronaut have long been a matter of record but Hansen's access to private documents and unpublished sources and his interviews with more than 125 subjects including more than fifty hours with Armstrong himself yield the first in depth analysis of this elusive reluctant hero *Inventing the*

*American Astronaut* Matthew H. Hersch, 2012-10-08 Who were the men who led America's first expeditions into space Soldiers Daredevils The public sometimes imagined them that way heroic military men and hot shot pilots without the capacity for doubt fear or worry However early astronauts were hard working and determined professionals organization men who were calm calculating and highly attuned to the politics and celebrity of the Space Race Many would have been at home in corporate America and until the first rockets carried humans into space some seemed to be headed there Instead they strapped themselves to missiles and blasted skyward returning with a smile and an inspiring word for the press From the early days of Project Mercury to the last moon landing this lively history demystifies the American astronaut while

revealing the warring personalities raw ambition and complex motives of the men who were the public face of the space program *Media, NASA, and America's Quest for the Moon* Harlen Makemson, 2009 When Apollo 11 landed on the moon in July 1969 it capped not only the most remarkable engineering feat in history but also a decade long battle over how much access the press and public should have to the manned space program Now forty years after an awed world watched Neil Armstrong and Buzz Aldrin bounce across the surface of the moon this book tells the behind the scenes story of how NASA and the U S media were often at odds but ultimately showed extraordinary cooperation in bringing the story of lunar conquest to the world Drawing upon rich historical sources from NASA journalists and television networks this book sheds new light on how media shaped how we saw America s great adventure in space and raises contemporary questions about the role of information in a free society United States Naval Institute Proceedings ,2004 **America, Sea Power, and the World** James C. *Freedom 7* Colin Burgess, 2013-09-27 Inevitably there are times in a nation s history when its hopes fears and confidence in its own destiny appear to hinge on the fate of a single person One of these pivotal moments occurred on the early morning of May 5 1961 when a 37 year old test pilot squeezed himself into the confines of the tiny Mercury spacecraft that he had named Freedom 7 On that historic day U S Navy Commander Alan Shepard carried with him the hopes prayers and anxieties of a nation as his Redstone rocket blasted free of the launch pad at Cape Canaveral hurling him upwards on a 15 minute suborbital flight that also propelled the United States into the bold new frontier of human space exploration This book tells the enthralling story of that pioneering flight as recalled by many of the participants in the Freedom 7 story including Shepard himself with anecdotal details and tales never before revealed in print Although beaten into space just three weeks earlier by the Soviet cosmonaut Yuri Gagarin Alan Shepard s history making mission aboard Freedom 7 nevertheless provided America s first tentative step into space that would one day see its Apollo astronauts including Alan Shepard walk on the Moon

**Encyclopedia of the Sixties** Abbe A. Debolt, James S. Baugess, 2011-12-12 Comedian Robin Williams said that if you remember the 60s you weren t there This encyclopedia documents the people places movements and culture of that memorable decade for those who lived it and those who came after *Encyclopedia of the Sixties A Decade of Culture and Counterculture* surveys the 1960s from January 1960 to December 1969 Nearly 500 entries cover everything from the British television cult classic *The Avengers* to the Vietnam War and the civil rights movement The two volume work also includes biographies of artists architects authors statesmen military leaders and cinematic stars concentrating on what each individual accomplished during the 1960s with brief postscripts of their lives beyond the period There was much more to the

Sixties than flower power and LSD and the entries in this encyclopedia were compiled with an eye to providing a balanced view of the decade. Thus unlike works that emphasize only the radical and revolutionary aspects of the period to the exclusion of everything else, these volumes include the political and cultural. Right taking a more academic than nostalgic approach and helping to fill a gap in the popular understanding of the era.

**Moon Bound** Colin Burgess, 2013-03-12

Often lost in the shadow of the first group of astronauts for the Mercury missions, the second and third groups included the leading figures for NASA's activities for the following two decades. *Moon Bound* complements the author's recently published work *Selecting the Mercury Seven* (2011), extending the story of the men who helped to launch human spaceflight and broaden the American space program. Although the initial 1959 group became known as the legendary pioneering Mercury astronauts, the astronauts of Groups 2 and 3 gave us many household names. Sixteen astronauts from both groups traveled to the Moon in Project Apollo, with several actually walking on the Moon, one of them being Neil Armstrong. This book draws on interviews to tell the astronauts' personal stories and recreate the drama of that time. It describes the process by which they were selected as astronauts and explains how the criteria had changed since the first group. *Moon Bound* is divided into two parts, recounting the biographies relating to the nine astronauts from NASA's Group 2 in the first part and the fourteen finalists in Group 3 in the second part. The stories of both selection groups are narrated through the experiences of four finalists with interesting backgrounds. One of these men is Al Rupp of the USAF, who as a West Point cadet cheekily helped to steal the Navy mascot goat prior to the annual Army versus Navy game in 1953, thus achieving legendary status in the game's history. Rupp was killed in a plane crash just two years after being named as a finalist for Group 3. The service career of naval aviator John Yamnicky was also very much the equal of other finalists, but he was killed on September 11, 2001, as he was a passenger on hijacked Flight 77, which was flown into the Pentagon. At the end of the work, there are several chapters on how these candidates were prepped for their missions.
