Light From Genesis To Modern Physics:

Esoteric Cosmology and Modern Physics Bodo Balsys,2020-03-04 This book endeavours to integrate the concepts gleaned through modern physics with those of the esotericist hence with the lore derived from meditative penetration of high dimensions of perception This incorporates the n and chakra system via which all phenomena is derived and of the nature of the projection of thought forms from the subjective domains to the phenomenal world This book consequently endeavours to show how the laws discovered by physicists derive from those of the subjective universe Many abstruse ideas therefore need to be discussed which the scientifically minded are unaware as well as unfamiliar concepts for most religionists and philosophers Hopefully this syncretic approach will evoke many revelations in all these schools of thought Readers should not dismiss the ideas presented out of hand but rather should rationalise what is logically correct as a valid basis for further research and enquiry into the origin and nature of things *Understanding Scientific Theories of Origins* Robert C.

Bishop,Larry L. Funck,Raymond J. Lewis,Stephen O. Moshier,John H. Walton,2018-12-04 From five authors with over two decades of experience teaching origins together in the classroom this is the first textbook to offer a full fledged discussion of the scientific narrative of origins from the Big Bang through humankind from biblical and theological perspectives This work gives the reader a detailed picture of mainstream scientific theories of origins along with how they fit into the story of God s creative and redemptive action [Ancient and Modern Physics](#) Thomas E. Faith Physics Nathan V. Hoffman,2021-03-15 FFaith Physics is a new Theory of Everything ToE combining ancient spiritual wisdom and modern quantum physics findings to deliver a belief system that is both intellectually sound and spiritually satisfying It maintains an ineffable Supreme Consciousness is the catalyst of all material creation as a great thought through pure white light in zero point morphogenetic quantum fields Faith Physics claims that consciousness is the

cornerstone of base reality existing in a timeless state of now By using the natural cause and effect laws of classical physics the uncertainty principle of quantum mechanics and dark matter energy Faith Physics posits pure consciousness manifests physical creation in a remarkable myriad of forms In the wave particle duality paradigm revealed by quantum mechanics conscious observation transforms light energy into particulate physical matter as condensed or frozen light in accordance with Albert Einstein's famous $E=mc^2$ equation Faith Physics teaches us we exist and thrive in a unified participatory universe emanating from an eternal Supreme Consciousness source and we are not just a product of random chance evolution In the 21st century religion and science are reaching an enlightened consensus that pure metaphysical consciousness is perpetually painting a picture on the space time continuum canvas depicting a miraculous cycle of physical creation entropy and cosmic rebirth

The Guide to the Perplexed Moses Maimonides, 2024-05-28 A landmark new translation of the most significant text in medieval Jewish thought Written in Arabic and completed around 1190 the Guide to the Perplexed is among the most powerful and influential living texts in Jewish philosophy a masterwork navigating the straits between religion and science logic and revelation The author Rabbi Moses ben Maimon commonly known as Maimonides or as Rambam was a Sephardi Jewish philosopher jurist and physician He wrote his Guide in the form of a letter to a disciple But the perplexity it aimed to cure might strike anyone who sought to square logic mathematics and the sciences with biblical and rabbinic traditions In this new translation by

philosopher Lenn E Goodman and historian Phillip I Lieberman Maimonides warm conversational voice and clear explanatory language come through as never before in English Maimonides knew well the challenges facing serious inquirers at the confluence of the two great streams of thought and learning that Arabic writers labeled aql and naql reason and tradition The aim of the Guide he wrote is to probe the mysteries of physics and metaphysics But mysteries to Maimonides were not conundrums to be celebrated for their obscurity They were problems to be solved Maimonides methods and insights resonate throughout the work of later Jewish thinkers rationalists and mystics and in the work of philosophers like Thomas Aquinas Spinoza Leibniz and Newton The Guide continues to inspire inquiry discovery and vigorous debate among philosophers theologians and lay readers today Goodman and Lieberman s extensive and detailed commentary provides readers with historical context and philosophical enlightenment giving generous access to the nuances complexities and profundities of what is widely agreed to be the most significant textual monument of medieval Jewish thought a work that still offers a key to those who hope to harmonize religious commitments and scientific understanding

The Metaphysics of Light in the Hexaemeral Literature Isidoros C. Katsos, 2023-02-14 This volume critically re evaluates the received interpretation of the nature of light in the ancient sources Isidoros C Katsos contests the prevalent view in the history of optics according to which pre modernity theorized light as subordinate to sight oculocentrism by examining in depth the contrary textual evidence found in early Christian texts It shows that from Philo of Alexandria and Origen to Basil of Caesarea and Gregory of Nyssa the Jewish Christian commentary tradition on the hexaemeral literature the biblical creation narrative reflected deeply on the nature and physicality of light for the purposes of understanding the structure and purpose of material creation Contemplation of nature allowed early Christian thinkers to conceptualize light as the explanatory principle of vision rather than subordinated to it Contrary to the prevalent view the hexaemeral literature necessitates a luminocentric interpretation of the theory of light of Plato s Timaeus in its reception history in the context of late antique cosmology Hexaemeral luminocentrism invites the reader of Scripture to grasp not only the sensible properties of light but also their causal principle as the first manifestation of the divine Logos in creation The hexaemeral metaphysics thus provides the missing ground of meaning of the early Christian language of light

Lectures on Torah and Modern Physics (the Lectures in Kabbalah Series) Rabbi Yitzchak Ginsburgh,2013-04-28 Modern physics has forever changed the way we view and understand physical reality With a wide spectrum of theories from general relativity to quantum mechanics our conceptions of the very big and the very small are no longer intuitively obvious Many philosophers even scientists have expressed the opinion that the counterintuitive conclusions posited in modern physics are best understood using spiritual terminology In the 11 lectures in this volume Harav Ginsburgh one of our generation s foremost scholars innovators and teachers of Kabbalah reveals how modern physics reflects foundational concepts in the Torah s inner dimension A wide range of topics from relativity special and general quantum mechanics and string theory are addressed Elegantly and gracefully Harav Ginsburgh s exposition of the topics switches back and forth between the scientific and Torah perspectives With his deep insight Harav Ginsburgh gives even well known physical concepts a refreshing and new treatment Apart from carefully drawing parallels and correspondences between the Torah s inner dimension and modern physics in these lectures Harav Ginsburgh proposes new directions for scientific research into important areas such as a unified field theory CPT symmetry the relationship between acceleration and gravitation and the

possibility of uncovering additional dimensions in physical reality demonstrating how the Torah's depth can be used to fertilize science and further our understanding of nature **The Ages of the World (1811)** F. W. J. Schelling, 2019-02-14

In 1810 after establishing a reputation as Europe's most prolific philosopher F W J Schelling embarked on his most ambitious project *The Ages of the World*. For over a decade he produced multiple drafts of the work before finally conceding its failure a failure in which Heidegger Jaspers Voegelin and many others have discerned a pivotal moment in the history of philosophy Slavoj Žižek calls this text the vanishing mediator the project that even while withheld and concealed from view connects the epoch of classical metaphysics that stretches from Plato to Hegel with the post metaphysical thinking that began with Marx and Kierkegaard. Although drafts of the second and third versions from 1813 and 1815 have long been available in English this translation by Joseph P Lawrence is the first of the initial 1811 text. In his introductory essay Lawrence argues for the importance of this first version of the work as the one that reveals the full sweep of Schelling's intended project and he explains its significance for concerns in modern science history and religion.
