Rosemary Joyce

Lightning Field:

Walter De Maria : the lightning field Kenneth Baker, 2007 The Lightning Field 1977 by the American sculptor Walter De Maria is recognized internationally as one of the late twentieth century's most profound works of American art. The piece is located in a remote and rugged area of southwestern New Mexico's high desert and is composed of 400 stainless steel poles installed in a grid measuring one mile east west by one kilometer north south. The poles average some twenty feet in height and are installed so that the tops form a level plane which according to De Maria could theoretically support an imaginary sheet of glass. Art critic Kenneth Baker began his encounter with The Lightning Field in 1978 shortly after its completion when he was commissioned by Dia Art Foundation which owns and maintains the work to write a study of it. The resulting essay, the shorter of two Baker essays that comprise the text of this book, is descriptive and reflective and acclaims The Lightning Field as the closest thing to a masterpiece to come out of minimalism. Together these writings offer a uniquely personal and probing assessment of this major work of art. Dia Art Foundation curator Lynne Cooke has contributed the introduction which places The Lightning Field in its art historical context. Beautifully illustrated with fifteen color photographs and ten black and white images, the book also includes a statement by the artist. The Lightning Field

Kenneth Baker, 2008 **White Sands** Geoff Dyer, 2016-05-03 From one of our most original writers Kathryn Schulz, New York magazine comes an expansive and exacting book firmly grounded but elegant, often hilarious and always inquisitive about travel, unexpected awareness and the questions we ask when we step outside ourselves. Geoff Dyer's restless search for what is unclear even to him continues in this series of fascinating adventures and pilgrimages with a tour guide who may not be a tour guide in the Forbidden City in Beijing with friends in New Mexico where D.H. Lawrence famously claimed to have had his greatest experience from the outside world with a hitchhiker picked up on the way from White Sands with Don Cherry or a photo of him at any rate at the Watts Towers in Los Angeles. Weaving stories about places to which he has recently traveled with images and memories that have persisted since childhood, Dyer tries to work out what a certain place, a certain way of marking the landscape means, what it's trying to tell us, what we go to it for. With 4 pages of full color illustrations. Summary Report, 1973

Public Art Cher Krause Knight, 2011-09-23 This book takes a bold look at public art and its populist appeal, offering a more inclusive guide to America's creative tastes and shared culture. It examines the history of American public art from FDR's New Deal to Christo's The Gates and challenges preconceived notions of public art, expanding its definition to include a broader scope of works and concepts. Expands the definition of public art to include sites such as Boston's Big Dig, Las Vegas Treasure Island and Disney World. Offers a refreshing alternative to the traditional rhetoric and criticism surrounding public art. Includes insightful analysis of the museum and its role in relation to public art.

The Future of Nuclear Waste Rosemary Joyce, 2020-01-24 How can nations ensure that buried nuclear waste goes undisturbed for thousands of years? The United States government tried to solve this problem with the help of experts; they

identified in communication materials science and futurism From the perspective of a contemporary archaeologist The Future of Nuclear Waste looks at what these experts suggested and what the government endorsed designs for a modern monument an artificial ruin a purpose built archaeological site that would escape future exploration One design selected for development argued that because specific archaeological sites and objects among them Stonehenge Serpent Mound the Rosetta Stone and rock art made long ago have endured and are seen as significant today contemporary engineers could build monuments that would be equally effective in conveying messages that last even longer An alternative proposal which government planners set aside was rooted in the idea that universal archetypes of design arouse similar human emotions in all times and places Both proposals used common sense assuming that human reactions and understandings are relatively predictable Employing an anthropology of common sense Rosemary Joyce explores why people chosen for their expertise relied on generalizations contradicted by the actual history of preservation and interpretation of archaeological sites and the closest analogues to archetype based designs which are the large scale installations produced in the Land Art movement The book reveals the underlying imagination shared by the experts government planners and artists in which the American West is an empty space available for projects like these It counters this with the dissenting voices of indigenous scholars and activists who document the presence on these nuclear landscapes of Native American people The result is an eye opening and unique demonstration of how a deep understanding of the remote past informs critical debates about the present

Christopher Howard, 2019-03-01 An examination of a 1970s Conceptual art project advertisements for fictional shows by fictional artists in a fictional gallery that hoodwinked the New York art world From the summer of 1970 to March 1971 advertisements appeared in four leading art magazines *Artforum* *Art in America* *Arts Magazine* and *ARTnews* for a group show and six solo exhibitions at the Jean Freeman Gallery at 26 West Fifty Seventh Street in the heart of Manhattan s gallery district As gallery goers soon discovered this address did not exist the street numbers went from 16 to 20 to 24 to 28 and neither did the art supposedly exhibited there The ads were promoting fictional shows by fictional artists in a fictional gallery The scheme eventually exposed by a New York Times reporter was concocted by the artist Terry Fugate Wilcox as both work of art and critique of the art world In this book Christopher Howard brings this forgotten Conceptual art project back into view Howard demonstrates that Fugate Wilcox s project was an exceptionally clever embodiment of many important aspects of Conceptualism incisively synthesizing the major aesthetic issues of its time documentation and dematerialization serialism and process text and image publishing and publicity He puts the Jean Freeman Gallery in the context of other magazine

based work by Mel Bochner Judy Chicago Yoko Ono and Ed Ruscha and compares the fictional artists projects with actual Earthworks by Walter De Maria Peter Hutchinson Dennis Oppenheim and more Despite the deadpan perfection of the Jean Freeman Gallery project the art establishment marginalized its creator and the project itself was virtually erased from art history Howard corrects these omissions drawing on deep archival research personal interviews and investigation of fine printed clues to shed new light on a New York art world mystery
