Lights Camera Democracy Selected Essays:

Lights, Camera, Democracy! Lewis Lapham, 2001-03-27 For fifteen years Lewis Lapham has written a monthly column in Harper's Magazine for which he won a 1995 National Magazine Award for his exhilarating point of view in an age of conformity This major collection of Lapham's essays defines his distinct view of the way the world really works through vivid analysis of media language culture and education Lapham brings an acute eye to the ways of Washington the manners of the money class and the stirrings of the global economy With originality and breadth he illuminates the quirks and essential truths of the American character *EBOOK: Critical Theories of Mass Media: Then and Now* Paul Taylor, Jan Harris, 2007-12-16 This is a welcome critical corrective to complacent mainstream accounts of the media's cultural impact Prof Slavoj Žižek International Director of the Birkbeck Institute for the Humanities at Birkbeck University of London A powerful and highly engaging re assessment of past critical thinkers including those not normally thought of as critical in the light of today's mediascape Jorge Reina Schement Distinguished Professor of Communications Penn State University With the exception of occasional moral panics about the coarsening of public discourse and the impact of advertising and television violence upon children mass media tend to be viewed as a largely neutral or benign part of contemporary life Even when criticisms are voiced the media chooses how and when to discuss its own inadequacies More radical external critiques are often excluded and media theorists are frequently more optimistic than realistic about the negative aspects of mass culture This book reassesses this situation in the light of both early and contemporary critical scholarship and explores the intimate relationship between the mass media and the disempowering nature of commodity culture The authors cast a fresh perspective on contemporary mass culture by comparing past and present critiques They Outline the key criticisms of mass culture from past critical thinkers Reassess past critical thought in the changed circumstances of today Evaluate the significance of new critical thinkers for today's mass culture The book begins by introducing the critical insights from major theorists from the past Walter Benjamin Siegfried Kracauer Theodor Adorno Marshall McLuhan and Guy Debord Paul Taylor and Jan Harris then apply these insights to recent provocative writers such as Jean Baudrillard and Slavoj Žižek and discuss the links between such otherwise apparently unrelated contemporary events as the Iraqi Abu Ghraib controversy and the rise of reality television *Critical Theories of Mass Media* is a key text for students of cultural studies communications and media studies and sociology *The Making of Saints* James F Hopgood, 2005-04-24 A multidisciplinary study of the commonalities between heroes icons saints and their institutions across several cultures *Rush to Judgment* Stephen F. Knott, 2014-08-01 George W Bush has been branded the worst president in history and forced to endure accusations that he abused his power while presiding over a lawless administration Stephen Knott however contends that Bush has been treated unfairly especially by presidential historians and the media He argues that from the beginning scholars abandoned any pretense at objectivity in their critiques and seemed unwilling to place Bush's actions into a broader historical context In this provocative book Knott

offers a measured critique of the professoriate for its misuse of scholarship for partisan political purposes a defense of the Hamiltonian perspective on the extent and use of executive power and a rehabilitation of Bush's reputation from a national security viewpoint He argues that Bush's conduct as chief executive was rooted in a tradition extending as far back as George Washington not an imperial presidency but rather an activist one that energetically executed its constitutional prerogatives Given that one of the main indictments of Bush focuses on his alleged abuse of presidential war power Knott takes on academic critics like Sean Wilentz and Arthur Schlesinger Jr and journalists like Charlie Savage to argue instead that Bush conducted the War on Terror in a manner faithful to the Framers' intent that in situations involving national security he rightly assumed powers that neither Congress nor the courts can properly restrain Knott further challenges Bush's detractors for having applied a relatively recent revisionist understanding of the Constitution in arguing that Bush's actions were out of bounds Ultimately Knott makes a worthy case that while Bush was not necessarily a great president his national security policies were in keeping with the practices of America's most revered presidents and for that reason alone he deserves a second look by those who have condemned him to the ash heap of history All readers interested in the presidency and in American history will find *Rush to Judgment* a deftly argued perhaps deeply unsettling yet balanced account of the Bush presidency and a clarion call for a reexamination of how scholars determine presidential greatness and failure

Glancing Visions Zachary Tavlin, 2023-06-13 The sweeping vantages that typify American landscape painting from the nineteenth century by Thomas Cole and other members of the Hudson School are often interpreted for their geopolitical connotations as visual attempts to tame the wild alleviating fears of a savage frontier through views that subdue the landscape to the eye Zachary Tavlin's *Glancing Visions* challenges the long standing assumption that visuality in nineteenth century art and literature was inherently imperialistic or possessive While there is much to be said for both material economic and theological impulses to clear the wilderness superimpose a national identity and usher in a Puritanical idyll many literary figures of the era display a purposeful disdain for the possessive gaze signaling instead a preference for subtle glances often informed by early photography Impressionism new techniques in portraiture and soon after the dawn of cinema The visual subjectivities and contingencies introduced by these media made room for a visual counter narrative one informed by a mode of seeing that moves fast and lightly across the surface of things Tavlin probes Nathaniel Hawthorne's idea of the imagination one that derives from both the camera obscura in *The Custom House* and the daguerreotype in *The House of the Seven Gables* each in its way an instance of the glance and entirely dependent on temporal moments The poetry of Frances Ellen Watkins Harper toggles between gazes and glances unsettling two competing forms of racialized seeing as they pertain to nineteenth century Black life and racial hierarchies the sentimental gaze and the slave trader's glance highlighting the life and death stakes of both looking anyone squarely in the eye and looking away Emily Dickinson's certain slant of light syntactical oddities and her stitching of scraps and fragments into the fascicles that constitute her corpus all derive from a commitment to contingency the ungrounded life's only defense against the abyss of non being Tavlin investigates as well Henry James's vexed but entirely dependent relationship to literary and painterly impressionism and William Carlos Williams's imagist poetics as a response to early cinema's use of the cut as the basis for a new visual grammar Each of these literary

artists Tavlin argues via their own distinctive sensibilities and the artistic or technological counterparts that informed them refuse the authoritative all possessive gaze in favor of the glance a mode of seeing thinking and being that made way for what we now think of as commonplace namely modernity **A Social History of the Media** Asa Briggs, Peter Burke, 2009

Horrorism Adriana Cavarero, 2009 In this brilliant book one of the world's most provocative feminist theorists and political philosophers introduces a new word horrorism to capture the experience of violence Unlike terror horrorism is a form of violation grounded in the offense of disfiguration and massacre Numerous outbursts of violence fall within Adriana Cavarero's category of horrorism especially when the phenomenology of violence is considered from the perspective of the

victim rather than that of the warrior Through her searing analysis Cavarero proves that violence against the helpless claims a specific vocabulary one that has been known for millennia and not just to the Western tradition Essays of Woodrow Wilson Woodrow Wilson,2023-11-17 In Essays of Woodrow Wilson the 28th President of the United States presents a meticulous collection of essays that reflect his profound engagement with democratic ideals international relations and the evolving nature of governance Written in an eloquent yet accessible style these essays are woven together by Wilson s conviction that democracy is not merely a political system but a moral obligation His reflections on American society during a time of unprecedented change in the early 20th century resonate with contemporary discussions on leadership civic responsibility and the role of the state in promoting the common good Wilson s writing not only contributes to the political discourse of his time but also establishes a literary context that bridges theory and practice in the American political landscape Woodrow Wilson a scholar political scientist and statesman drew upon his extensive academic background and passionate belief in the power of democracy to shape this collection Before entering politics Wilson served as a professor and later as president of Princeton University experiences that deeply influenced his worldview His tenure in office demonstrated his commitment to reforming American government and international relations particularly evident in his advocacy for the League of Nations revealing the depth of his engagement with global politics Readers seeking an insightful analysis of democracy and governance will find Wilson s essays not only thought provoking but essential to understanding the evolution of American political thought These writings offer a rare glimpse into the intellectual underpinnings of one of America s most notable presidents recommending this collection for scholars and general readers alike who wish to explore the intersection of political theory and practical governance *Photography and the USA* Mick Gidley,2010-11-15 From Ansel Adams to Carleton Watkins Diane Arbus to Weegee Richard Avedon to James VanDerZee American photographers have recorded their vast multicultural nation in images that for more than a hundred years have come to define the USA In *Photography and the USA* Mick Gidley explores not only the medium of photography and the efforts to capture key events and moments through photographs but also the many ways in which the medium has played a formative role in American culture *Photography and the USA* encompasses the major movements figures and works that are crucial to understanding American photography but also pays attention to more obscure aspects of photography s history Focusing on works that reveal many different facets of America its landscapes and its people Gidley explores the ambiguities of American history and culture We encounter images that range from an anti lynching demo in 1934 to Dorothea Lange s poster All races serve the crops in California an early photographic view of Niagara Falls against the painstaking detail of Edward Weston s *Pepper No 30* a fireman s fight in the San Francisco earthquake of 1906 to the Ground Zero images of 2001 by Joel Meyerowitz an 1890s *Wanted* image to Elliot Erwitt s shot of the Nixon Kruschchev Kitchen Debate Organizing his narrative around the themes of history technology the document and the emblem Mick Gidley not only presents a history of photography but also reveals the complexities inherent
