Perfect in Weakness Colin Heber-Percy, 2019-04-16 Three men go on a risky journey through a forbidden Zone in search of fulfillment They fail They come home The end The plot of Tarkovsky s *Stalker* is a joke Taking its title from 2 Corinthians *Perfect in Weakness* explores *Stalker* as a ludic parable And the subject of this parable is faith Faith as folly faith as a dangerous last ditch attempt to attain the unattainable To fail to fail again and to carry on regardless *Stalker* is about crossing borders boundaries conventions To transgress to disrupt to deconstruct is the dark impulse behind Tarkovsky s personal vision It is also the illicit revolutionary message at the heart of the gospel tear down this temple and have faith Like one of Deleuze s rhizomes or David Tracy s fragments *Perfect in Weakness* aims to throw out thoughts ideas and connections in unexpected even unintended directions drawing new and unlikely texts into the field of film theology Patristic thought Christian Neoplatonism and Renaissance literature *Perfect in Weakness* suggests we see cinema itself as the ultimate apocalyptic art form letting light into the darkness and then throwing it on a screen

Transcendence and Non-Naturalism in Early Chinese Thought Alexis McLeod, Joshua R. Brown, 2020-09-03 Contemporary scholars of Chinese philosophy often presuppose that early China possessed a naturalistic worldview devoid of any non natural concepts such as transcendence Challenging this presupposition head on Joshua R Brown and Alexis McLeod argue that non naturalism and transcendence have a robust and significant place in early Chinese thought This book reveals that non naturalist positions can be found in early Chinese texts in topics including conceptions of the divine

cosmogony and apophatic philosophy Moreover by closely examining a range of early Chinese texts and providing comparative readings of a number of Western texts and thinkers the book offers a way of reading early Chinese Philosophy as consistent with the religious philosophy of the East and West including the Abrahamic and the Brahmanistic religions Co written by a philosopher and theologian this book draws out unique insights into early Chinese thought highlighting in particular new ways to consider a range of Chinese concepts including tian dao li and you wu **Limits of Knowledge** Aa. Vv.,2016-03-29T00:00:00+02:00 Ignorabimus We will never know With this statement and his talk on the limits of natural knowledge in 1872 Emil du Bois Reymond stirred up a controversy the Ignorabimus Streit which spread widely beyond German speaking countries It concerned the very possibility to set boundaries to knowledge the development of the sciences their attainable results and concept formation In this volume the philosophical value of the Ignorabimus controversy is critically examined The historical matter and its theoretical implications are assessed with regard to the mutual relationships between philosophy and the sciences in the 19th century and beyond The Limit of the Useful Georges Bataille,2023-02-07 The first English language translation of an essential early work key to understanding the French philosopher s later thought In the decade prior to the publication of Inner Experience L exp rience int rieuse the twentieth century French philosopher Georges Bataille produced a nascent masterwork containing some of his most original and extensive reflections on a range of subjects With thoughts on ritual sacrifice and military conquest the nature of laughter and the mechanisms of capitalism The Limit of the Useful as Bataille had planned to title the work illuminates the philosopher s later corpus yet it remained unfinished and unpublished in his lifetime and untranslated until now This is the first English language translation of what Cory Austin Knudson and Tomas Elliott argue is one of Bataille s most structurally consistent works Paired with draft essays and plans for The Accursed Share along with over a hundred pages of appendixes and notes the volume distinctively elaborates Bataille s thought The Limit of the Useful spans a decade of rich intellectual ferment in Bataille s life as he first formulated his challenge to capitalism engaging with concepts and ideas in ways not seen in his other published works The volume bridges the gap between Bataille s surrealist literary writings and later scientific pretensions drawing attention to and filling in an overlooked lacuna in his oeuvre *History of the Problems of Philosophy* Paul Janet,Gabriel Séailles,1902 *History of the Problems of Philosophy: pt. II. Ethics. pt. III. Metaphysics. pt. IV. Theodicy* Paul Janet,Gabriel Séailles,1902 *Deleuze and the Immanent Sublime* Louis Schreel,2024-06-13 What becomes of the sublime today in a philosophy that discards the old oppositions between body and mind and embeds human reason in the creative evolution of life In this book Louis Schreel shows how Gilles Deleuze s life long engagement with the Kantian sublime grappled with just this question Its core argument centres on Deleuze s understanding of the sublime in terms of psychic individuation a creative self organizing process that animates cognitive systems from within Exploring Deleuze s transcendental philosophy through central concepts of self organization psychic individuation passibility and infinity this book shows how a new notion of the sublime emerges in

a timely and novel way In this way Deleuze and the Immanent Sublime opens up an innovative perspective on transcendental philosophy shedding new light on Deleuze's transcendental empiricism both in relation to Kant and to contemporary cognitive science Engagement with previously untranslated writings from thinkers including Jean Petitot Gilbert Simondon Henri Maldiney and Erwin Straus adds further breadth to the development of Deleuze's ideas on the sublime in this systematic study *Aesthetic Conflict and Contradiction* Samuel Cuff Snow, 2023-10-04 The central claim of this comparative study of Kant and Kierkegaard is that the aesthetic experience of the sublime is both autonomous and formative for extra aesthetic ends Aesthetic autonomy is thus inseparable from aesthetic heteronomy In Part I through an examination of Kant's Critique of Judgement and his essays on the French Revolution the Kantian sublime is shown to conflict with our existing cognitive moral and political frames of meaning at the same time that the engagement of the aesthetic judge Chapter 1 or the enthusiastic spectator Chapter 2 with this conflict furthers our pursuit of cognitive moral and political ends The Kantian sublime is built on the autonomy of aesthetic judgement which nevertheless has non aesthetic value Part II argues that certain aesthetic and ethical religious figures in Kierkegaard's work can be shown to be transfigurations of the Kantian sublime despite the absence of the term Antigone and the silhouettes from Either Or embody what I coin the tragic sublime and sublime grief The God man in Practice in Christianity is interpreted as a sublime image of contradiction The figures are submitted to aesthetic representation while their contradictory interior lives are unrepresentable The Kierkegaardian sublime is built on a radical critique of aesthetic autonomy whose failure serves the end of ethico religious self formation

History of Medieval Philosophy Maurice Wulf, 1909 Places in their proper historical setting the numerous philosophical systems of Middle Ages and traces their mutual doctrinal relations *Fichte's Vocation of Man* Daniel Breazeale, Tom Rockmore, 2013-10-31 New perspectives on Fichte's best known and most popular work Written for a general audience during a period of intense controversy in the German philosophical community J G Fichte's short book The Vocation of Man 1800 is both an introduction to and a defense of his philosophical system and is one of the best known contributions to German Idealism This collection of new essays reflects a wide and instructive variety of philosophical and hermeneutic approaches which combine to cast new light upon Fichte's familiar text The contributors highlight some of the overlooked complexities and implications of The Vocation of Man and situate it firmly within the intellectual context within which it was originally written relating it to the positions of Kant Hegel Schelling Schlegel Jacobi and others In addition the essays relate the text to issues of contemporary concern such as the limits of language the character of rational agency the problem of evil the relation of theoretical knowledge to practical belief and the dialectic of judgment Foundations of Natural Right Johann Gottlieb Fichte, 2000 A complete translation into English of Fichte's most important work of political philosophy

Cultural Boundaries of Science Thomas F. Gieryn, 1999-01-15 Why is science so credible Usual answers center on scientists objective methods or their powerful instruments In his new book Thomas Gieryn argues that a better explanation

for the cultural authority of science lies downstream when scientific claims leave laboratories and enter courtrooms boardrooms and living rooms On such occasions we use maps to decide who to believe cultural maps demarcating science from pseudoscience ideology faith or nonsense Gieryn looks at episodes of boundary work Was phrenology good science How about cold fusion Is social science really scientific Is organic farming After centuries of disputes like these Gieryn finds no stable criteria that absolutely distinguish science from non science Science remains a pliable cultural space flexibly reshaped to claim credibility for some beliefs while denying it to others In a timely epilogue Gieryn finds this same controversy at the heart of the raging science wars Transactions of the American Philosophical Society American Philosophical Society,1863
