Limits To Debate A Revised Theory Of Semantic Presupposition:

The Limits to Debate Noel Burton-Roberts, 2009-01-08 Exponents and critics of semantic presupposition have almost invariably based their discussion on the Standard definition of presupposition implied by Frege and Strawson In this study Noel Burton Roberts argues convincingly against this definition that leads it to a three valued semantics He presents a very simple semantic definition which is weaker more general and leads to a semantics more easily interpreted as two valued with gaps The author shows that a wide range of intuitive facts that eluded the Standard definition follow directly from this Revised definition itself facts about the presuppositions of compound sentences and modal sentences about presuppositional conflict and about differences in the logical status of simple sentences suffering from presupposition failure The book includes a detailed argument that an ambiguity of natural language negation generally assumed to be necessary to the defence of semantic presupposition is neither possible nor necessary in a presuppositional semantics Noel Burton Roberts has made an authoritative contribution to a debate which has involved philosophers and linguists for many years His command of the issues his clarity of exposition and his theoretical insight may well serve to change the boundaries of that debate

The Cambridge Handbook of Pragmatics Keith Allan, Kasia M. Jaszczolt, 2012-01-12 Pragmatics is the study of human communication the choices speakers make to express their intended meaning and the kinds of inferences that hearers draw from an utterance in the context of its use This Handbook surveys pragmatics from different perspectives presenting the main theories in pragmatic research incorporating seminal research as well as cutting edge solutions It addresses questions of rational and empirical research methods what counts as an adequate and successful pragmatic theory and how to go about answering problems raised in pragmatic theory In the fast developing field of pragmatics this Handbook fills the gap in the market for a one stop resource to the wide scope of today s research and the intricacy of the many theoretical debates It is an authoritative guide for graduate students and researchers with its focus on the areas and theories that will mark progress in pragmatic research in the future

Oxford Studies in Metaethics, Volume 7 Russ

Shafer-Landau, 2012-06-28 Oxford Studies in Metaethics is the only publication devoted exclusively to original philosophical work in the foundations of ethics It provides an annual selection of much of the best new scholarship being done in the field Its broad purview includes work being done at the intersections of ethical theory with metaphysics epistemology philosophy of language and philosophy of mind The essays included in the series provide an excellent basis for understanding recent developments in the field those who would like to acquaint themselves with the current state of play in metaethics would do well to start here

[The Oxford Handbook of Negation](#) Viviane Déprez, Viviane M. Déprez, M. Teresa Espinal, Maria Teresa Espinal i Farré, 2020 This volume offers reviews of cross linguistic research on the major classic issues in negation as well as accounts of more recent results from experimental linguistics psycholinguistics and neuroscience The volume will be an essential reference on the topic of negation for students and researchers across a wide range of disciplines

Philosophical Insights into Pragmatics Piotr Stalmaszczyk, 2019-05-20 The book provides philosophical interpretations of pragmatic issues It concentrates on well established concepts such as presupposition entailment implicature speech acts subsentential speech acts different cases of meaning as use expressive meanings and expressive commitments as well as the relation between knowledge and belief The discussion goes beyond linguistic investigations and offers a wide philosophical perspective

Toward a Motivation Model of Pragmatics Rong Chen, 2022-07-18 With the discursive turn has come a distrust a complete rejection by some of theories that seek deeper reasons for surface phenomena Rong Chen argues that this distrust with its accompanying overemphasis on specificity and fluidity of linguistic meaning and social values is unwarranted and unhelpful Drawing on insights from social theories and various strands of pragmatics he proposes a motivation model of pragmatics MMP contending that language use can be adequately coherently and elegantly studied via the motivation behind it in its varied and dynamic contexts The model with its well laid out components is then applied to im politeness research cross cultural pragmatics diachronic pragmatics discourse and genre analysis conversation analysis identity construction and the study of metaphor sarcasm parody and lying MMP is thus a framework aimed at accounting for fluidity with stable notions specificity with general principles and differences with similar underlying factors As such the book should appeal to students of pragmatics im politeness conversation analysis sociolinguistics applied linguistics communication sociology and psychology

Drawing the Boundaries of Meaning Betty J. Birner, Gregory Ward, 2006-11-29 One of the most lively and contentious issues in contemporary linguistic theory concerns the elusive boundary between semantics and pragmatics and Professor Laurence R Horn of Yale University has been at the center of that debate ever since his groundbreaking 1972 UCLA dissertation This volume in honor of Horn brings together the best of current work at the semantics pragmatics boundary from a neo Gricean perspective Featuring the contributions of 22 leading researchers it includes papers on implicature Kent Bach inference Betty Birner presupposition Barbara Abbott lexical semantics Georgia Green Sally McConnell Ginet Steve Kleinedler Randall Eggert negation Pauline Jacobson Frederick Newmeyer Scott Schwenter polarity Donka Farkas Anastasia Giannakidou Michael Israel implicit variables Greg Carlson Gianluca Storto definiteness Barbara Partee reference Ellen Prince Andrew Kehler Gregory Ward and logic Jerrold Sadock Francis Jeffry Pelletier Andrew Hartline These original papers represent not only a fitting homage to Larry Horn but also an important contribution to semantic and pragmatic theory

Pragmatics, Truth and Underspecification , 2018-06-12 The concept of meaning since Frege initiated the linguistic turn in 1884 has been the subject of numerous theories hypotheses methodologies and distinctions One distinction of considerable strategic value relates to the location of meaning some aspects of meaning can be found in language and are modelled with semantic values of various kinds some aspects of meaning can be found in communicative processes and are modelled with pragmatic inferences of one sort or another One hypothesis of great heuristic utility concerns the relationship that is assumed between the semantic and the pragmatic This

collection of especially commissioned papers examines current thinking on the plausible nature of the semantic the possible character of the pragmatic and the mechanics of their intersection International Encyclopedia of Linguistics William J. Interdisciplinary Studies in Pragmatics, Culture and Society Alessandro Capone, Jacob L. Mey, 2015-07-31 This volume is part of the series Pragmatics Philosophy and Psychology edited for Springer by Alessandro Capone It is intended for an audience of undergraduate and graduate students as well as postgraduate and advanced researchers This volume focuses on societal pragmatics One of the main concerns of societal pragmatics is the world of language users We are interested in the investigation of linguistic practices in the context of societal practices praxis to use a term used in the Wittgensteinian and other traditions It is clear that the world of users including their practices their culture and their social aims has to be taken into account and seriously investigated when we deal with the pragmatics of language It is not enough to discuss principles

of language use solely in the guise of abstract theoretical tools. Consequently the present volume focuses explicitly on the interplay of abstract theoretical principles and the necessities imposed by societal contexts often requiring a more flexible use of such theoretical tools. The volume includes articles on pragmatics, politeness and anti politeness, dialogue, joint utterances, discourse markers, pragmatics and the law, institutional discourse, critical discourse analysis, pragmatics and culture, cultural scripts, argumentation theory, connectives and argumentation, language games and psychotherapy, slurs, the analysis of funerary rites as well as an authoritative chapter by Jacob L. Mey on societal pragmatics. *Pragmatics and Autolexical Grammar* Etsuyo Yuasa, Tista Bagchi, Katharine P. Beals, 2011. This book presents papers in honor of Jerry Sadock's rich legacy in pragmatics and Autolexical Grammar. Highlights of the pragmatics section include Larry Horn on almost barely and assertoric inertia, William Lycan on Sadock's resolution of the Performadox with truth₁ and truth₂ and Jay Atlas on Moore's Paradox and the truth value of propositions of belief. Highlights of the Autolexical Grammar section include Fritz Newmeyer's comparison of the minimalist autolexical and transformational treatments of English nominals, Barbara Abbott's extension of Sadock's PRO-less syntax to a PRO-less semantics of the infinitival complements of know-how and Haj Ross's syntactic connections between semantically related English pseudoclefts. Encompassing a range of languages: Aleut, Bangla, Greenlandic, Japanese and a home-based sign language and extending into psycholinguistics, language acquisition, sentence processing and autism, this volume will interest a range of readers from theoretical linguists and philosophers of language to applied linguists and exotic language specialists. Linguistics and Language Behavior Abstracts, 1993. **Linguistics Meets Philosophy** Daniel Altshuler, 2022-10-13. Linguistics and philosophy while being two closely related fields are often approached with very different methodologies and frameworks. Bringing together a team of interdisciplinary scholars, this pioneering book provides examples of how conversations between the two disciplines can lead to exciting developments in both fields from both a historical and a current perspective. It identifies a number of key phenomena at the cutting edge of research within both fields such as reporting and ascribing, describing and referring, narrating and structuring, locating in time and space, typologizing and ontologizing, determining and questioning, arguing and rejecting and implying and pre-supposing. Each chapter takes on a phenomena and explores it through a set of questions which are posed and answered at the outset of each chapter. An accessible and engaging resource, it is essential reading for researchers and students in both disciplines and will empower exciting and illuminating conversations for years to come. **Pragmatic Meaning and Cognition** Sophia S. A. Marmaridou, 2000-01-01. Encompasses a variety of topics under the umbrella of pragmatic meaning and cognition. This includes theoretical perspectives on pragmatic meaning. Deixis, speech acts and implicature are also covered. Presuppositions and Cognitive Processes Filippo Domaneschi, 2016-07-29. This book breaks new ground towards an understanding of the mental processes involved in presupposition: the comprehension of information taken for granted. Various psycholinguistic experiments are discussed to support the idea that involved in ordinary language comprehension are

complex and demanding cognitive processes The author demonstrates that these processes exist not only at the explicit level of an utterance but also at a deeper level of computing where the background information taken for granted as already known and shared between interlocutors is processed The author shows that experimental research can suggest new theoretical models for presupposition thus this book will be of interest to researchers and students of psycholinguistics the philosophy of language and experimental pragmatics

Where Semantics meets Pragmatics Klaus von Heusinger, Ken Turner, 2021-10-25 The Current Research in the Semantic Pragmatics Interface series has carved out a new and vibrant area of research This volume offers the reader a state of the art record of new and established research in this area Von Heusinger and Turner's careful selection of topics and contributors ensures that each chapter integrates semantic and pragmatic facts into a single theory that each finds an adequate division of theoretical labour and that each attempts to design and corroborate an elegant account of meaning and use that would be compatible with other aspects of human behaviour Importantly each paper in the volume focuses on linguistic detail not merely abstract discussions of a theoretical nature Thus each paper makes extensive reference to the semantic and pragmatic facts of English and also other languages This reference gives each of the proposed analyses a more adequate empirical edge and a sharper theoretical focus This book is a must for all scholars and students interested in the new and vibrant discipline of semantics pragmatics and to anyone who is fascinated by the prospect of working beyond the traditional disciplinary boundaries of linguistics and the philosophy of language The chapters in this volume originate from a workshop at the Linguistic Society of America Summer Institute held at Michigan State University

Meaning and Relevance Deirdre Wilson, Dan Sperber, 2012-03-22 When people speak their words never fully encode what they mean and the context is always compatible with a variety of interpretations How can comprehension ever be achieved Wilson and Sperber argue that comprehension is a process of inference guided by precise expectations of relevance What are the relations between the linguistically encoded meanings studied in semantics and the thoughts that humans are capable of entertaining and conveying How should we analyse literal meaning approximations metaphors and ironies Is the ability to understand speakers meanings rooted in a more general human ability to understand other minds How do these abilities interact in evolution and in cognitive development *Meaning and Relevance* sets out to answer these and other questions enriching and updating relevance theory and exploring its implications for linguistics philosophy cognitive science and literary studies

Theory and Data in Cognitive Linguistics Nikolas Gisborne, Willem B. Hollmann, 2014-09-24 Cognitive linguistics has an honourable tradition of paying respect to naturally occurring language data and there have been fruitful interactions between corpus data and aspects of linguistic structure and meaning More recently dialect data and sociolinguistic data collection methods theoretical concepts have started to generate interest There has also been an increase in several kinds of experimental work However not all linguistic data is simply naturally occurring or derived from experiments with statistically robust samples of speakers Other traditions

especially the generative tradition have fruitfully used introspection and questions about the grammaticality of different strings to uncover patterns which might otherwise have gone unnoticed The divide between generative and cognitive approaches to language is intimately connected to the kinds of data drawn on and the way in which generalisations are derived from these data The papers in this volume explore these issues through the lens of synchronic linguistic analysis the study of language change typological investigation and experimental study Originally published in *Studies in Language* Vol 36 3 2012

Inside Arguments Henrique Jales Ribeiro, 2012-04-25 This volume includes a collection of eighteen essays that provide a decisive input to the study of logic and argumentation theory by some of the finest specialists in these areas covering the main schools of thought and contemporary trends at the beginning of the 21st century In these essays the authors clarify the status of what we currently call ambiguously and problematically logic and argumentation theory and discuss the no less controversial issue of the relationship between these two concepts when applied to the study of argumentation and its problems At the same time they take stock of the most recent developments of argumentation theory considered as an ongoing research subject It is the first time in the last few decades that a work this comprehensive and up to date on such matters has been published This volume is an essential tool for all of those interested in the study of the relations between logic and argumentation particularly at the university level It provides not only an introduction to these subjects but also the necessary framework for further specialised research development in the future

Perspectives on Negation and Polarity Items Jack Hoeksema, Hotze Rullmann, Víctor Sánchez-Valencia, Ton van der Wouden, 2001-05-17 *Perspectives on Negation and Polarity Items* contains a selection of papers on the semantics acquisition and licensing behavior of negation Negation being one of the prevalent features of any human language has many facets of interest to linguists psychologists and philosophers alike In recent years much attention has been paid to the complicated distributional patterns of polarity items Many of the contributions in this volume are devoted to the study of one or more of these items in languages such as English Laurence Horn Anita Mittwoch Chris Kennedy Dutch Jack Hoeksema and Hotze Rullmann Henny Klein Gertjan Postma German Gabriel Falkenberg Hindi Utpal Lahiri and Greek Anastasia Giannakidou In addition some general issues surrounding negation are addressed such as the characterization of the notion strength of negation Jay Atlas the problem of NEG raising Lucia Toveni the interaction of negation and modality Johan van der Auwera and the acquisition of negation Kenneth Drozd
