Limits Of Stabilization Infrastructure Public Deficits And Growth In Latin America:

The Limits of Stabilization William Easterly, Luis Servén, 2003-10-01 Over the 1980s and 1990s most Latin American countries witnessed a retrenchment of the public sector away from infrastructure provision and an opening up of infrastructure activities to the private sector This book analyzes the consequences of these policy changes from two perspectives First it reviews in a comparative framework the major trends in infrastructure provision in Latin America over the last two decades Second it evaluates the implication of these trends for economic growth and public deficits in the region The book shows that in most countries private participation did not fully offset the public sector retreat The result was a slowdown in infrastructure accumulation which entailed a significant growth cost and weakened the intended impact of the infrastructure spending cuts on public sector insolvency *Infrastructure in Latin America and the Caribbean* Marianne Fay, Mary Morrison, 2007 This book reviews Latin America's experience with infrastructure reform over the last fifteen years It argues that the region's infrastructure has suffered from public retrenchment and unrealistic expectations about private involvement Poor infrastructure now hampers productivity growth and poverty reduction Addressing this requires more and better spending and acceptance that governments remain central to infrastructure provision and supervision although the private sector still has an important role to play *The State and the Private Sector in Latin America* M. Font, 2015-06-16 This book follows ten political economic histories since the 1970s showing how different forms of partnership have developed flourished or declined over the time The author's argument is supported by rich empirical material It places partnership schemes in a broader social context and provides a deep insight into the phenomenon *Fiscal Rules, Public Investment, and Growth* Luis Servén, **ECMT Round Tables Transport Services The Limits of (De)regulation** European Conference of Ministers of Transport, 2006-01-03 The ECMT Round Table examines the effects and limitations of regulating transport services and examines in particular the factors that necessitate regulation the role of transaction costs and the cost of regulation **Building regional infrastructure in Latin America (Working Paper IECI = Documento de Trabajo SITI ; n. 10)** Vito Tanzi, 2005 **The Oxford Handbook of Latin American Economics** José Antonio Ocampo, Jaime Ros, 2011-07-28 Latin America has been central to the main debates on development economics ranging from the relationships between income inequality and economic growth and the importance of geography versus institutions in development to debates on the effects of trade trade openness and protection on growth and income distribution Despite increasing interest in the region there are few English language books on Latin American economics This Handbook organized into five parts aims to fill this significant gap Part I looks at long term issues including the institutional roots of Latin America's underdevelopment the political economy of policy making the rise decline and re emergence of alternative paradigms and the environmental sustainability of the development pattern Part II considers macroeconomic topics including the management of capital account booms and busts the evolution and performance of exchange rate regimes the advances

and challenges of monetary policies and financial development and the major fiscal policy issues confronting the region including a comparison of Latin American fiscal accounts with those of the OECD Part III analyzes the region's economies in global context particularly the role of Latin America in the world trade system and the effects of dependence on natural resources characteristic of many countries of the region on growth and human development It reviews the trends of foreign direct investment the opportunities and challenges raised by the emergence of China as buyer of the region's commodities and competitor in the world market and the transformation of the Latin America from a region of immigration to one of massive emigration Part IV deals with matters of productive development At the aggregate level it analyzes issues of technological catching up and divergence as well as different perspectives on the poor productivity and growth performance of the region during recent decades At the sectoral level it looks at agricultural policies and performance the problems and prospects of the energy sector and the effects on growth of lagging infrastructure development Part V looks at the social dimensions of development it analyzes the evolution of income inequality poverty and economic insecurity in the region the evolution of labor markets and the performance of the educational sector as well as the evolution of social assistance programs and social security reforms in the region The contributors are leading researchers that belong to different schools of economic thought and most come from countries throughout Latin America representing a range of views and recognising the diversity of the region This Handbook is a significant contribution to the field and will be of interest to academics graduate students and policy makers interested in economics political economy and public policy in Latin America and other developing economies

Reforming Latin America's Economies Ricardo Ffrench-Davis, 2005-09-30 Provides a comprehensive analysis of why reforms in Latin America have failed in achieving growth and equity The book focuses on three strategic areas of reforms of the Washington Consensus Macroeconomics Trade and Finance

Left Behind Renos Vakis, Jamele Rigolini, Leonardo Lucchetti, 2016-07-26 One out of every five Latin Americans or around 130 million people have never known anything but poverty subsisting on less than US \$4 a day throughout their lives These are the region's chronically poor who have remained so despite unprecedented inroads against poverty in Latin America and the Caribbean since the turn of the century Left Behind Chronic Poverty in Latin America and the Caribbean takes a closer look at the region's entrenched poor who and where they are and how existing policies need to change in order to effectively assist them The book shows significant variations of rates of chronic poverty both across and within countries Within a single country some regions show incidence rates up to eight times higher than the lowest Despite the higher rates of chronic poverty in rural areas chronic poverty is as much an urban as a rural issue In fact considering absolute numbers urban areas in many countries including Chile Brazil Mexico Colombia and the Dominican Republic have more chronic poor than rural areas Undoubtedly the region has come a long way during the decade in terms of poverty reduction guided by a mix of sustained growth and increased levels in amounts and quality of public spending and programs targeted directly or indirectly to the

chronic poor While improving endowments and the context where the chronic poor live is a necessary condition going forward the decade s experience suggests that it may not be enough to reach the chronic poor The book posits that refinements to the existing policy toolkit as opposed to more programs may come a long way in helping the remaining poor These refinements include intensifying efforts to improve coordination between different social and economic programs which can boost the income generation process and deal with the intergenerational transmission of chronic poverty by investing in early childhood development Equally important though there is an urgent need to adapt programs to directly address the psychological toll of chronic poverty on people s mindset and aspirations which currently undermines the effectiveness of the existing policy efforts

The Impact of Private Sector Participation in Infrastructure

Luis A. Andres,J. Luis Guasch,Thomas Haven,Vivien Foster,2008-07-25 Infrastructure plays a key role in fostering growth and productivity and has been linked to improved earnings health and education levels for the poor Yet Latin America and the Caribbean are currently faced with a dangerous combination of relatively low public and private infrastructure investment Those investment levels must increase and it can be done If Latin American and Caribbean governments are to increase infrastructure investment in politically feasible ways it is critical that they learn from experience and have an accurate idea of future impacts This book contributes to this aim by producing what is arguably the most comprehensive privatization impact analysis in the region to date drawing on an extremely comprehensive dataset

Public Capital and Growth

Mr.Serkan Arslanalp,Fabian Bornhorst,Mr.Sanjeev Gupta,Ms.Elsa Sze,2010-07-01 This paper estimates the impact of public capital on economic growth for forty eight OECD and non OECD countries during 1960 2001 Using the production function and its extensions it finds a positive but concave elasticity of output with respect to public capital which is robust to changes in time intervals and varying depreciation rates Furthermore in non OECD countries the growth impact of public capital is higher once longer time intervals are considered

Public-Private Partnership Infrastructure Project: Case Studies from the Republic of Korea Jay-Hyung Kim,Jungwook Kim,Sunghwan Shin,Seung-yeon Lee,2011-05-01 The Republic of Korea has rich experience in implementing public private partnership PPP projects for almost a decade This experience provides valuable lessons for most developing member countries DMCs and that merits wider dissemination This report prepared by the Korea Development Institute KDI presents an in depth assessment of the different components of PPP framework of the Republic of Korea including comparing and contrasting the success factors of the Korean PPP model with the experience of other countries through invited presentations on PPP frameworks and multisector case studies This publication aims to support the efforts of DMCs engaged in the development of appropriate institutional PPP framework and regulatory reforms along with a well defined and transparent financial assistance and risk sharing framework for facilitating private sector involvement through PPPs

Public-Private Partnership Infrastructure: Case Studies from the Republic of Korea Projects

Asian Development Bank,2011-05-01 The Republic of Korea has rich experience in implementing PPP projects for almost a decade

This experience provides valuable lessons for most DMCs and that merits wider dissemination The two volume report prepared by the Korea Development Institute KDI presents an in depth assessment of the different components of PPP framework of the Republic of Korea including comparing and contrasting the success factors of the Korean PPP model with the experience of other countries through invited presentations on PPP frameworks and multisector case studies This publication aims to support the efforts of DMCs engaged in the development of appropriate institutional PPP framework and regulatory reforms along with a well defined and transparent financial assistance and risk sharing framework for facilitating private sector involvement through PPPs

Physical Infrastructure Development W. Ascher,C. Krupp,2010-05-24 This book addresses the key challenges of balancing economic growth poverty alleviation and environmental protection in the development of major physical infrastructure ranging from transport to energy *The World Bank Research Observer* ,2007

The Rise of Post-Hegemonic Regionalism Pía Riggirozzi,Diana Tussie,2012-01-07 This book offers a timely analysis and a novel and nuanced argument about post neoliberal models of regional governance in non European contexts It provides the first in depth empirically driven analysis of current models of regional governance in Latin America that emerged out of the crisis of liberalism in the region It contributes to comparative studies of the contemporary global political economy as it advances current literature on the topic by analysing distinctive overlapping and conflicting trajectories of regionalism in Latin America The book critically explores models of transformative regionalism and specific dimensions articulating those models beyond neoliberal consensus building As such it contests the overstated case of integration as converging towards global capitalism It provides an analytical framework that not only examines the what how who and why in the emergence of a specific form of regionalism but sets the ground for addressing two relevant questions that will push the study of regionalism further What factors enable or constrain how transformative a given regionalism is or can be with respect to the powers and policies of states encompassed by it and What factors govern how resilient a given regionalism is likely to be under changing political and economic conditions

The Quality of Life in Latin American Cities Eduardo Lora,Andrew Powell,Bernard M.S. van Praag,Pablo Sanguinetti,2010-05-04 A growing number of cities around the world have established systems for monitoring the quality of urban life Many of those systems combine objective information with subjective opinions and cover a wide variety of topics This book assesses a method that takes advantage of both types of information and offers criteria to identify and rank the issues of potential importance for urban dwellers This method which combines the so called hedonic price and life satisfaction approaches to value public goods was tested in pilot studies in six Latin American cities Bogot Buenos Aires Lima Medell n Montevideo and San Jos of Costa Rica It provides valuable insights to address key questions such as Which urban problems have the greatest impact on people s opinions of city management and the most widespread effects on their lives Do gaps between perception and reality vary from one area of the city to another especially between high and low income neighborhoods Where can homebuilders most feasibly seek solutions to problems such as

inadequate road infrastructure a lack of recreational areas or poor safety conditions Which problems should government authorities address first in light of their impact on the well being of various groups of individuals and given private actors abilities to respond Which homeowners benefit the most from public infrastructure or services When can or should property taxes be used to finance the provision of certain services or the solution of certain problems The Quality of Life in Latin American Cities Markets and Perception proposes a monitoring system that is easy to operate and that entails reasonable costs but also has a solid conceptual basis Long the ideal of many scholars and practitioners such a system may soon become a reality and have the potential to make a significant contribution to the decision making processes in any city concerned with the well being of its residents Sustainable Infrastructure: Breakthroughs in Research and Practice Management Association, Information Resources,2019-11-01 The continued growth of any nation depends largely on the development of their built infrastructures and communities By creating stable infrastructures countries can more easily thrive in competitive international markets Sustainable Infrastructure Breakthroughs in Research and Practice examines sustainable development through the lens of transportation waste management land use planning and governance Highlighting a range of topics such as sustainable development transportation planning and regional and urban infrastructure planning this publication is an ideal reference source for engineers planners government officials developers policymakers legislators researchers academicians and graduate level students seeking current research on the latest trends in sustainable infrastructure

Latin American Economic Outlook 2009 OECD,2008-10-28 The 2009 edition of the Latin American Economic Outlook shows that governments in the region could do much more to exploit the ability of fiscal policy to boost economic growth and combat poverty and inequality infrastructure and economic growth in east asia ,
