Facing Modernity Ambivalence Reflexivity And Morality:

Facing Modernity Barry Smart, 1999-02-23 Barry Smart offers a wide ranging and critical discussion of how issues of reflexivity ethics and moral responsibility inform social and political thought Through a critical discussion of the ambivalent fruits of social analysis exemplified in particular by the work of Foucault Derrida Lyotard Baudrillard Vattimo Beck Bourdieu Goffman Giddens Levinas and Bauman this book submits that an important responsibility of social enquiry today is to engage critically with the moral difficulties and ethical dilemmas which have arisen in relation to modernity

Rationality and the Environment Bo Eling, 2012-05-04 Environmental assessment and management involve the production of scientific knowledge and its use in decision making processes The result is that within these essentially rational political assessment frameworks experts are creating and applying scientific knowledge for decision and management purposes that actually have strong ethical and aesthetic dimensions Yet these rational political frameworks lack the tools to provide guidance on ethical and aesthetic issues that affect the wider public This revolutionary work argues that ethical and aesthetic dimensions can only be brought into environmental politics and policies by citizens actively taking a stand on the specific matters in question The author draws on Habermas trisection of rationality as cognitive instrumental moral practical and aesthetic expressive to suggest that truly effective environmental policy needs to activate all three approaches and not favour only the rational To achieve this objective the author argues that public participation in environmental policy and assessment is necessary to counteract the dictatorship of technical and economic instrumentality in environmental policy the failure to take ethical and aesthetic rationalities into account and more importantly how such policy is applied on the ground to shape our natural and material world

Social Work in a Corporate Era Linda Davies, 2017-09-29 A striking new feature of the welfare systems in many Western countries is the extent to which market relations have permeated social services Conceptions of risk management now dominate the way parents and children are responded to while new technologies aim to measure their relationship with state service providers Bureaucratic control is increasing while resources are reduced These factors have led to the demise of the traditional role of the social worker as one who engages with the client in a supportive encounter Professional competence within social work is increasingly tied to mastering scientific knowledge and new technical skills The result of collaboration between authors from Canada Britain and Australia Social Work in a Corporate Era offers a critical overview of these developments and their implications It provides a re evaluation of the assumptions and practices of the critical social work tradition and explores the possibility of rebuilding an emancipatory social work The authors aim to disentangle the debate between Marxism feminism and anti racism in the context of both postmodern challenges and the corporate restructuring of the welfare state Calling for the development of a new politics of social work practice this book addresses many of the urgent issues facing welfare state practitioners in health and social services today

Neo-Socialist Property Rights Cheuk-Yuet Ho, 2015-07-15 Neo Socialist Property Rights The Predicament of Housing Ownership in China

examines how urban dwellers practices of acquiring and defending property rights reshape state property family relationality in China Ubiquitous housing ownership has emerged together with a pervasive yet particularized rights discourse and practice in the past two decades Ho Cheuk Yuet considers them to be a condensation and vindication of the principles of family values and emergent neo socialist governance However there are manifested and latent contradictions between rights as interests and rights as a moral principle This book concludes that private property rights are at once enabling and disabling when understood in the light of both the rigorous pursuit of well being in a market economy and the contestation by those who resist forced eviction or the infringement of owners rights In this book Ho provides rarely available ethnographic record of the encounters between evictees and evictors engaged in housing demolition and approaches the topic of urban housing ownership from the investing perspective in contrast to most anthropologists consumption focus analysis Neo Socialist Property Rights links property rights practice to the broader human rights discourse as both a working hypothesis and a historical question *After Foucault* Lisa Downing, 2018-06-07 Contributes to Foucauldian scholarship by contextualizing Foucault's key concepts and identifying current and emerging applications of his work **Relational Social Work** Fabio Folgheraiter, 2004 In this innovative book Fabio Folgheraiter presents a systematic introduction to networking and reflexive practice in social work The text explores how the interested parties in social care can acquire a shared power in care planning and decision making and that when this networking occurs the efficacy of caring initiatives increases

Resisting McDonaldization Barry Smart, 1999-04-16 George Ritzer's McDonaldization thesis argued that contemporary life is succumbing to the standardization flexibility and practicability of fast food service This book brings together specially commissioned papers by leading social and cultural analysts to engage in a critical appraisal of the thesis The contributors discuss the roots of the thesis the rationalization of late modern life the effects of increasing cultural commodification the continuing prominence of American cultural and economic imperialism and the impact of globalization on social and cultural life The strengths and weaknesses of the McDonaldization thesis are clearly evaluated and the irrational consequences of rationalization are pinpointed and critically developed The book enlarges our understanding of how everyday life is structured by new standards of bureaucratic control and performance related criteria and plays a major role in illuminating how identity and practice are structured today The volume concludes with a response from George Ritzer *Extraordinary Cities* Peter J. Taylor, 2013-01-01 Peter J Taylor has produced a sweeping empirically grounded defense of cities as fundamental building blocks of long term large scale social structures a way of freeing social science from state centric bias and indeed mankind's hope However the single greatest strength of this complex seductive argument is the insistence on treating cities relationally as process Here the key to understanding the significance of cities is by studying them in terms of the dynamic networks they form and in their relations to states Richard E Lee Binghamton University US The founding father of the famous Globalization and World Cities research network and think tank on worldwide links between cities presents this

fascinating overview on cities in geohistory By moving cities to the centre stage Peter Taylor proposes that concern for states tell only part of the macro social story of humanity Cities have been and are the engines of innovation This impressive new book provides new insights into why cities succeed or fail The book is in the class with broadminded presentations like Jared Diamond's book *Guns Germs and Steel* Christian Matthiessen University of Copenhagen Denmark and President International Geographical Union's Commission on Urban Geography This is a big book by Peter Taylor It tells of the extraordinary world making powers of cities across the ages it explains why a state centric social science has constrained recognition of these powers over the last two centuries and it outlines a new indisciplinarity to help us make sense of a human condition increasingly forged out of the urban Anyone troubled by the social sciences as we know them ought to read this book Ash Amin Cambridge University UK and author *Land of Strangers* Accepting that cities are extraordinary this book provides an original city centred narrative of human creativity past present and future In this innovative ambitious and wide ranging book Peter Taylor demonstrates that cities are the epicenters of human advancement In exploring cities as sites through which economies flourish by harnessing the creative potential of myriad communication networks the author considers cities from varying temporal and spatial perspectives Four stories of cities are told the origins of city networks the domination of cities by world empires the genesis of a singular modern creative interval in which innovation culminates in today's globalised cities and finally the need for cities to act as centres for human creativity to produce a more resilient global society in the current crisis century Providing a long term view through which to consider the role of cities in attending to incipient crises of the twenty first century this closely argued thesis will prove essential for students and scholars of urban studies geography and sociology and all with a professional interest in or personal fascination for cities

Philosophy and Anthropology Ananta Kumar Giri, John Clammer, 2013-12-15 Philosophy and anthropology have many but largely unexplored links and interrelationships Historically they have informed each other in subtle ways This volume of original essays explores and enhances this relationship through anthropological engagement with philosophy and vice versa the nature sources and history of philosophical anthropology phenomenology and the practical methodological and theoretical implications of a dialogue between the two subjects *Philosophy and Anthropology Border Crossings and Transformations* seeks to enrich both the humanities and the social sciences through its informative and stimulating essays

Africana People in China C. Jama Adams, 2018-09-21 This book examines the psychosocial experiences of foreign workers from Africa and its diaspora in China within the context of international socio economic forces By exploring employment based migration from a psychoanalytic perspective this volume investigates the utility of adaptive ambivalence and the challenges that migrant workers face around issues of self development agency and identity Through a careful analysis of interviews with Africana people the author demonstrates that the capacity to be reflective and resilient alongside having a strong and diversified support network are crucial for the psychological well being of those living and working in unfamiliar

geographic and cultural conditions **Africa and Emerging Global Dynamics** Jamiu A. Oluwatoki, Adaora Osondu-Oti, 2019-03-18 This volume provides an in depth consideration of Africa and how it fares in today's globalised world. Its varied but interrelated perspectives touch on contemporary issues in international relations especially as they relate to Africa's development and global impacts. It highlights Africa's experiences and positions on nuclear proliferation, gender equality, foreign policies, health governance, war and changing power configurations with the economic emergence of China. It will appeal to historians, international relations experts, statesmen, policymakers and analysts, diplomats, students and general readers.

Critical Analysis of Organizations Catherine Casey, 2002-01-23 Catherine Casey has written an excellent book that provides a lucid and comprehensive critical analysis of organizations. It extends in reach and relevance beyond the specific field of organization studies and the sociology of organizations to encompass broader intellectual developments that have had a significant impact on contemporary sociology and cultural studies. Barry Smart, Professor of Sociology, University of Portsmouth. I anticipate that it will prove to be an attractive book in organization studies, industrial sociology and general sociology. I am sure that this will be a book that will make a major impact. Mike Reed, Professor of Organization Theory, Lancaster University. In this comprehensive and scholarly book, the essential critical strands in organizational analysis are explained. It examines how central traditions have realigned in relation to the challenge of postmodernism and the new reflexive turn in organizational studies. Judicious, innovative and written with the needs of students in mind, this book offers a renewed and revitalized critical accent in organization studies, one that focuses on existing and emerging social tendencies, contestations and struggles. It will be essential reading for senior students of organization studies and sociology.

Eccentricity and the Cultural Imagination in Nineteenth-Century Paris Miranda Gill, 2009-01-15 What did it mean to call someone eccentric in 19th century Paris? Drawing on etiquette manuals, fashion magazines, newspapers, novels and psychiatric treatises, this interdisciplinary study illuminates figures of Parisian modernity from the courtesan and Bohemian to the female dandy and circus freak.

Routledge Handbook of Tennis Robert Lake, 2019-02-05 Tennis is one of the world's most popular sports, as levels of participation and spectatorship demonstrate. Moreover, tennis has always been one of the world's most significant sports, expressing crucial fractures of social class, gender, sexuality, race and ethnicity, both on and off court. This is the first book to undertake a survey of the historical and socio-cultural sweep of tennis, exploring key themes from governance, development and social inclusion to national identity and the role of the media. It is presented in three parts: historical developments, culture and representations, and politics and social issues, and features contributions by leading tennis scholars from North America, Europe, Asia and Australia. The most authoritative book published to date on the history, culture and politics of tennis, this is an essential reference for any course or program examining the history, sociology, politics or culture of sport.

The Bottom Line: Unfortunate Side Effects of Capitalist Culture Arthur McGovern, 2020-10-06 This monograph explores the role of culture in modern societies and the side effects that result when that role is distorted.

The basic premise of this book is that many of the dominant cultural characteristics of modern life like the ideologies and values associated with materialism and consumer capitalism are cultural phenomena with influences that are in many ways problematic and in some ways downright detrimental to our sustained societal well being I argue in this book that the globalized capitalist economic system has become increasingly efficient in terms of scale and scope but has also become less humane in many regards less connected to human needs and concerns Of particular concern is the encroachment of economic interests into areas of human society that traditionally have been free from profit motives or at least only minimally influenced by them areas such as scientific research the justice system and even family relationships I suggest that there is a slow but steady intrusion into these areas of human life that were once considered off limits to naked economic incentives and calculations This intrusion puts the idea of America as a free and democratic society increasingly at risk when private economic stakeholders meddle in the political and cultural areas of society in ever more insidious ways to further their own enrichment at the expense of the public Furthermore the vast capitalist economic system is in many ways increasingly disconnected or disembedded from the contexts and regulations of traditional social relations as in the past

Making Digital Cultures Martin Hand, 2016-05-13 Many people in the West or global North now live in a culture of 24/7 instant messaging iPods and MP3s streamed content blogs ubiquitous digital images and Facebook But they are also surrounded by even more paper books telephone calls and material objects of one kind or another The juxtaposition and proliferation of older and newer technologies is striking Making Digital Cultures brings together recent theorizing of the digital age with empirical studies of how institutions embrace these technologies in relation to older established technological objects processes and practices It asks how relations between analogue and digital are conceptualized and configured both in theory and inside the public library the business organization and the archive With its direct engagement with new media theory science and technology studies and cultural sociology this volume will be of interest to scholars and students in the areas of media and communication and science and technology studies

Critical Practice in Social Work Robert Adams, Lena Dominelli, Malcolm Payne, 2009-04-16 What do social workers need to know in order to practise skilfully and effectively Edited by three Social Work's leading scholars the second edition of this highly respected textbook helps bridge the gap between social work theory and the challenges of day to day practice Versatile and thoughtful the book's simultaneous accessibility and depth make it essential reading suited for both social work students at undergraduate and post qualifying level Practitioners too will learn and benefit from the insights collected together in this valuable addition to their bookshelf
