the Contest for East Asia Joshua Haste, 2023-04-28 This book explores China's use of faits accomplis in its periphery and offers the first formal model for the use of faits accomplis by rising powers. With growing attention to great power competition and conflict in the gray zone between war and peace, this book explains China's use of faits accomplis to revise the maritime status quo in the South and East China Seas. Using formal modelling and case study analysis, the book argues that while power shifts provide rising states with opportunities to impose faits accomplis to revise the status quo, the use of faits accomplis also increases the likelihood of war with the dominant state. The book surveys existing understandings of how power shifts incentivize interstate competition in general and in the case of Sino-American competition in particular and brings existing theory and novel modelling to explain China's differing strategies in the South and East China Seas in the first two decades of the 21st century. The book concludes by using the lessons from these cases to assess the strategic options available to both states and conditions that make a peaceful resolution more likely. This book will be of much interest to students of Chinese politics, Asian security studies, and International Relations.

Harknett, 2022 A bold re conceptualization of the fundamentals driving behavior and dynamics in cyberspace Most cyber operations and campaigns fall short of activities that states would regard as armed conflict In *Cyber Persistence Theory* Michael P Fischerkeller Emily O Goldman and Richard J Harknett argue that a failure to understand this strategic competitive space has led many states to misapply the logic and strategies of coercion and conflict to this environment and thus suffer strategic loss as a result The authors show how the paradigm of deterrence theory can neither explain nor manage the preponderance of state cyber activity They present a new theory that illuminates the exploitive rather than coercive dynamics of cyber competition and an analytical framework that can serve as the basis for new strategies of persistence Drawing on their policy experience they offer a new set of prescriptions to guide policymakers toward a more stable secure cyberspace
