**Youth Ministry** Malan Nel, 2018-12-01 This book aims at contributing to the scientific and academic discourse as regards to the what and why of youth ministry Too often youth ministry has been approached from a mainly practical point of view almost asking how we keep young people off the streets Its methodology has often not included the theological and theoretical presuppositions that lie behind this ministry Previous scientific reflection has been determined by a one dimensional and almost exclusive point of view In comparison with existing literature this book does not focus so much on the how of youth ministry It innovates a different approach The book challenges the existing exclusive approach and develops an inclusive congregational and missional understanding of and approach to youth ministry From a particular perspective on the understanding the main objectives of Practical Theology the author endorses the so called movement of what is supposed to be going on He adds the outcome of an empirical round table discussion with some 16 leaders in this field on the descriptive and interpretive movements within the subject field what is going on and why is it going on The book will form the standard for any new research with regard to youth ministry The book's contribution lies on the level of sound theological reasoning and argumentation supported by many scholars for an inclusive congregational understanding of ministry as an integral part of every congregation being missional in being and doing Youth children adolescents and

emerging adults are just as integral a part of every congregation within which they live and serve     Theology, Disability, and Spiritual Transformation Michael Hryniuk, 2010 In this study Michael Hryniuk develops a full phenomenological psychological and theological account of spiritual transformation in the context of L Arche a federation of Christian communities that welcome persons with learning disabilities The book begins with a critical examination of current perspectives on spiritual transformation in theology and Christian spirituality and constructs a new foundational formulation of transformation as a shift in consciousness identity and behavior Through extensive analysis of the narratives of the caregiver assistants who share life with those who are disabled this case study reveals an alternative vision of the three fold way that unfolds through a series of profound awakenings in relationships of mutual care and presence an awakening to the capacity to love to bear inner anguish and darkness and to experience radical human and divine acceptance The book examines the psychological dimensions of spiritual transformation through the lens of contemporary affect theory and explores how care givers experience a profound healing of shame in their felt sense of identity and self worth

Transforming Spirituality F. LeRon Shults, Steven J. Sandage, 2006-06 Explores the concept of spiritual transformation through the lenses of theology and psychology
