Problematizing Religious Freedom Arvind Sharma,2011-08-08 The concept of religious freedom is the favoured modern human rights concept with which the modern world hopes to tackle the phenomenon of religious pluralism as our modern existence in an electronically shrinking globe comes to be increasingly characterised by this phenomenon To begin with the concept of religious freedom as embodied in Article 18 of the Universal Declaration of Human Rights seems self evident in nature It is the claim of this book however that although emblematic on the one hand the concept is also problematic on the other and the implications of the concept of religious freedom are far from self evident despite the ready acceptance the term receives as embodying a worthwhile goal This book therefore problematizes the concept along legal constitutional ethical and theological lines and especially from the perspective of religious studies so that religious freedom in the world could be enlarged in a way which promotes human flourishing

[The Routledge International Handbook of Religious Education](#) Derek Davis, Elena Miroshnikova, 2013-02-01 How and what to teach about religion is controversial in every country The Routledge International Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions It discusses how three models in particular seem to dominate the landscape Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where instruction is provided only in the tenets of the majority religion often to the detriment of other religions and their adherents Countries with traditions that differentiate church and state tend to adopt a separation model thus either offering instruction in a wide range of religions or in some cases teaching very little about religion intentionally leaving it to religious institutions and the home setting to provide religious instruction Still other countries attempt managed pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught Inevitably there are countries which do not fit any of these dominant models and the range of methods touched upon in this book will surprise even the most enlightened reader Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country These chapters discuss Legal parameters in terms of subjective versus objective instruction in religion Constitutional statutory social and political contexts to religious approaches Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning Regional assessments which provide a welcome overview and comparison This comprehensive and authoritative volume will appeal to educators scholars religious leaders politicians and others interested in how religion and education interface around the world

The Status of Religion and the Public Benefit in Charity Law Barry W. Bussey,2020-02-29 The Status of Religion and the Public Benefit in Charity Law is an apologetic for maintaining the presumption of public benefit for the charitable category advancement of religion in democratic countries within the English common law tradition In response to growing academic and political pressure to reform charity law including recurring calls to remove tax exemptions granted to religious charities the scholars in this volume analyse the implications of legislative and legal developments in Canada the UK Australia New Zealand and South Africa In the process they also confront more fundamental sociological or philosophical questions on the very nature and role of religion in a secular society that would deny any space for religious communities outside their houses of worship In other words this book is concerned with the place of religion and religious institutions in contemporary society It represents a series of concerns about the proper role of the state in relation to the differing beliefs of citizens some of which will quite rightly manifest in actions to benefit the wider society This debate then naturally engages with broader issues related to secularism civic engagement and liberal democratic freedoms
