## **Galileo Courtier:**

**Galileo Courtier** Mario Biagioli, 2018-12-01 Informed by currents in sociology cultural anthropology and literary theory Galileo Courtier is neither a biography nor a conventional history of science In the court of the Medicis and the Vatican Galileo fashioned both his career and his science to the demands of patronage and its complex systems of wealth power and prestige Biagioli argues that Galileo's courtly role was integral to his science the questions he chose to examine his methods even his conclusions Galileo Courtier is a fascinating cultural and social history of science highlighting the workings of power patronage and credibility in the development of science *How Shall We Practice History?* Michael H. Shank, 1996

Galileo's Muse Mark A. Peterson, 2011-10-17 Mark Peterson makes an extraordinary claim in this fascinating book focused around the life and thought of Galileo it was the mathematics of Renaissance arts not Renaissance sciences that became modern science Painters poets musicians and architects brought about a scientific revolution that eluded the philosopher scientists of the day **Galileo's Thinking Hand** Horst Bredekamp, 2019-04-01 Contemporary biographies of Galilei emphasize in several places that he was a masterful draughtsman In fact Galilei studied at the art academy which is where his friendship with Ludovico Cigoli developed who later became the official court artist The book focuses on this formative effect it tracks Galilei's trust in the epistemological strength of drawings It also looks at Galilei's activities in the world of art and his reflections on art theory ending with an appreciation of his fame after all he was revered as a rebirth of Michelangelo For the first time this publication collects all aspects of the appreciation of Galilei as an artist contemplating his art not only as another facet of his activities but as an essential element of his research **When Science &**

**Christianity Meet** David C. Lindenberg, Ronald L. Numbers, 2024-05-31 This book in language accessible to the general reader investigates twelve of the most notorious most interesting and most instructive episodes involving the interaction between science and Christianity aiming to tell each story in its historical specificity and local particularity Among the events treated in *When Science and Christianity Meet* are the Galileo affair the seventeenth century clockwork universe Noah's ark and flood in the development of natural history struggles over Darwinian evolution debates about the origin of the human species and the Scopes trial Readers will be introduced to St Augustine Roger Bacon Pope Urban VIII Isaac Newton Pierre Simon de Laplace Carl Linnaeus Charles Darwin T H Huxley Sigmund Freud and many other participants in the historical drama of science and Christianity Taken together these papers provide a comprehensive survey of current thinking on key issues in the relationships between science and religion pitched as the editors intended at just the right level to appeal to students Peter J. Bowler Isis Galileo's Instruments of Credit Mario Biagioli, 2007-06-01 In six short years Galileo Galilei went from being a somewhat obscure mathematics professor running a student boarding house in Padua to a star in the court of Florence to the recipient of dangerous attention from the Inquisition for his support of Copernicanism In that brief period Galileo made a series of astronomical discoveries that reshaped the debate over the physical nature of the heavens he

deeply modified the practices and status of astronomy with the introduction of the telescope and pictorial evidence proposed a radical reconfiguration of the relationship between theology and astronomy and transformed himself from university mathematician into court philosopher Galileo's *Instruments of Credit* proposes radical new interpretations of several key episodes of Galileo's career including his early telescopic discoveries of 1610 the dispute over sunspots and the conflict with the Holy Office over the relationship between Copernicanism and Scripture Galileo's tactics during this time shifted as rapidly as his circumstances argues Mario Biagioli and the pace of these changes forced him to respond swiftly to the opportunities and risks posed by unforeseen inventions further discoveries and the interventions of his opponents Focusing on the aspects of Galileo's scientific life that extend beyond the framework of court culture and patronage Biagioli offers a revisionist account of the different systems of exchanges communication and credibility at work in various phases of Galileo's career Galileo's *Instruments of Credit* will find grateful readers among scholars of science studies historical epistemology visual studies Galilean science and late Renaissance astronomy

### **Jewish Books and their Readers** Scott

Mandelbrote, Joanna Weinberg, 2016-05-23 *Jewish Books and their Readers* discusses the transformative effect of the circulation and readership of sacred and secular texts written by Jews on Christian as well as Jewish readers in early modern Europe Its twelve essays challenge traditional paradigms of Christian Hebraism and undermine simplistic visions of the unchanging nature of Jewish cultural life They ask what constituted a Jewish book how it was presented disseminated and understood within both Jewish and Christian environments and how its meanings were contested and what effect such understanding had on contemporary views of Jews and their intellectual heritage They demonstrate how the involvement of Christians in the production and dissemination of Jewish books played a role in the shaping of the intellectual life of Jews and Christians Contributors are Michela Andreatta Andrew Berns Theodor Dunkelgr n Federica Francesconi Anthony Grafton Alessandro Guetta William Horbury Yosef Kaplan Scott Mandelbrote Piet van Boxel Joanna Weinberg Benjamin Williams

*Galileo's Inquisition Trial Revisited* Jules Speller, 2008 This book shows that the known accounts of Galileo's trial leave many important facts unexplained or even clash with them A most careful reading of the relevant documents and treatises backs an interpretation which has Pope Urban VIII sue Galileo for denying God's omnipotence or His omniscience by admitting the absolute truth of Copernicanism The Pope's opinion results from an argument he fully trusts together with his belief that Galileo failed to fulfill a condition to which the publication of the *Dialogue* was subjected That the trial does not end with a conviction for Urban's awful formal heresy but merely for vehement suspicion of heresy with the heresy consisting in the pseudo heretical belief in a doctrine contrary to the Bible all this is due to the existence of a Galileo friendly party inside the Holy Office led by Cardinal Francesco Barberini and powerful enough to wring a compromise from the Pope

*Galileo's Pendulum* Dusan I. Bjelic, 2003-10-09 Examines the history of science in light of recent theories of sexuality and the body

**The Copernican Question** Robert S. Westman, 2011-07-28 In 1543 Copernicus defended his hypothesis that

the Earth is a planet and the sun a body resting near the centre of a finite universe This volume reframes this pivotal moment in the history of science centring the story on a conflict over the credibility of astrology that erupted in Italy just as Copernicus arrived in 1496      *Court and Its Critics* Paola Ugolini,2020-03-18 The Court and Its Critics focuses on the disillusionment with courtliness the derision of those who live at court and the open hostility toward the court themes common to Renaissance culture      *Secrets of Nature* William R. Newman,Anthony Grafton,2001 A fresh look at the role of astrology and alchemy in Renaissance thinking and everyday life      **Pioneering Participatory Art Practices** Annemarie Kok,2024-05-06 Participatory art practices allow members of an audience to actively contribute to the creation of art Annemarie Kok provides a detailed analysis and explanation of the use of participatory strategies in art in the so called long sixties starting around 1958 and ending around 1974 in Western Europe Drawing on extensive archival materials and with the help of the toolbox of the actor network theory she maps out the various actors of three case studies of participatory projects by John Dugger and David Medalla Piotr Kowalski and telewissen all of which were part of documenta 5 Kassel 1972
