Gambling Life Dealing In Contingency In A Greek City:

Gambling Life Thomas M. Malaby, 2010-10-01 The first ethnography devoted to the practice of gambling as its core subject Gambling Life considers the stakes of social action in one community on the island of Crete Backgammon caf s card clubs and hidden gambling rooms in the city of Chania provide the context for Thomas M Malaby to examine the ways in which people confront uncertainty in their lives He shows how the dynamics of gambling risk fate uncertainty and luck are reflected in other aspects of gamblers lives from courtship and mortality to state bureaucracy and national identity By moving beyond risk and fate as unexamined analytical categories Malaby presents a new model for research concerning indeterminacy seeing it as arising from stochastic performative and other sources Gambling Life questions the longstanding valorization of order and pattern in the social sciences

Qualitative Research in Gambling Rebecca Cassidy, Andrea Pisac, Claire Loussouarn, 2013-10-30 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license Gambling is both a multi billion dollar international industry and a ubiquitous social and cultural phenomenon It is also undergoing significant change with new products and technologies regulatory models changing public attitudes and the sheer scale of the gambling enterprise necessitating innovative and mixed methodologies that are flexible responsive and agile This book seeks to demonstrate that researchers should look beyond the existing disciplinary territory and the dominant paradigm of problem gambling in order to follow those changes across territorial political technical regulatory and conceptual boundaries The book draws on cutting edge qualitative work in disciplines including geography organisational studies sociology East Asian studies and anthropology to explore the production and consumption of risk risky places risk technologies the gambling industry and connections between gambling and other kinds of speculation such as financial derivatives In doing so it addresses some of the most important issues in contemporary social science including the challenges of studying deterritorialised social phenomena globalising technologies and local markets regulation as it operates across local regional and international scales and the rise of games virtual worlds and social media

Making Virtual Worlds Thomas Malaby, 2011-01-15 The past decade has seen phenomenal growth in the development and use of virtual worlds In one of the most notable Second Life millions of people have created online avatars in order to play games take classes socialize and conduct business transactions Second Life offers a gathering point and the tools for people to create a new world online Too often neglected in popular and scholarly accounts of such groundbreaking new environments is the simple truth that of necessity such virtual worlds emerge from physical workplaces marked by negotiation creation and constant change Thomas Malaby spent a year at Linden Lab the real world home of Second Life observing those who develop and profit from the sprawling self generating system they have created Some of the challenges created by Second Life for its developers were of a very traditional nature such as how to cope with a business that is growing more quickly than existing staff can handle

Others are seemingly new How for instance does one regulate something that is supposed to run on its own Is it possible simply to create a space for people to use and then not govern its use Can one apply these same free range free market principles to the office environment in which the game is produced Lindens as the Linden Lab employees call themselves found that their efforts to prompt user behavior of one sort or another were fraught with complexities as a number of ongoing processes collided with their own interventions Malaby thoughtfully describes the world of Linden Lab and the challenges faced while he was conducting his in depth ethnographic research there He shows how the workers of a very young but quickly growing company were themselves caught up in ideas about technology games and organizations and struggled to manage not only their virtual world but also themselves in a nonhierarchical fashion In exploring the practices the Lindens employed he questions what was at stake in their virtual world what a game really is and how people participate and the role of the unexpected in a product like Second Life and an organization like Linden Lab *The Cost of Living Crisis* Natalie Wood,2025-01-23 Set in the Northern English City of Leeds in the midst of Liz Truss 49 days in office what we are now calling The Cost of Living Crisis emerges as the most recent incantation of economic decline Challenging the ease with which this phrase has become commonplace this monograph provokes questions of when and for whom it became normal to discuss the cost of being alive The Cost of Living Crisis is both new and not new With a focus on how economic decline is temporally experienced Wood explores how consumption habits find solidarity with the past claim membership in the present and grasp at uncertain futures With a concern for where agency lies Wood ultimately asks us How is it that people deal engage and reclaim precarious futures in the shop Drawing from research conducted in a food pantry a food bank that simulates a shop Wood takes up a concept of provisioning as embodied knowledge and cultivated competence defined by the normalisation of economic recession However amidst hopelessness the food pantry also materialises everyday acts of hope care and play which in turn perhaps provoke a reimagination not just of what a food bank is but of what shopping could be This book is applicable to scholars of temporality political and economic anthropology the anthropology of Britain economic crisis and consumption *Perilous Wagers* Klaus K. Y. Hammering,2024-08-15 The lives of the men depicted in Perilous Wagers take place in the squalor of Tokyo s old day laborer district San ya where they can be found eking out a living from occasional construction work and welfare handouts permanently displaced from their hometowns to metropolitan Tokyo Although San ya has nearly vanished during the past twenty years its import persists as a black market where its small population of male day laborers can be contracted for the most undesirable of tasks without consideration for their health or safety In this context Hammering s book examines classic ethnographic themes of labor exchange value honor shame temporality desire gender and personhood It explores how one group of day laborers embodied a transgressive masculinity intimately intertwined with honorable mobster values of old and how they created dignity and sociality under abject conditions of life Perilous Wagers tracks these underdog values across construction sites non profit organizations hospitals

bunkhouses and illegal gambling dens giving imaginative life to a stigmatized forgotten social world **The Body Impolitic** Michael Herzfeld, 2004 The Body Impolitic is a critical study of tradition not merely as an ornament of local and national heritage but also as a millstone around the necks of those who are condemned to produce it Michael Herzfeld takes us inside a rich variety of small town Cretan artisans workshops to show how apprentices are systematically thwarted into learning by stealth and guile This harsh training reinforces a stereotype of artisans as rude and uncultured Moreover the same stereotypes that marginalize artisans locally also operate to marginalize Cretans within the Greek nation and Greece itself within the international community What Herzfeld identifies as the global hierarchy of value thus frames the nation's ancient monuments and traditional handicrafts as evidence of incurable backwardness Herzfeld's sensitive observations offer an intimately grounded way of understanding the effects of globalization and of one of its most visible offshoots the heritage industry on the lives of ordinary people in many parts of the world today *Secrets from the Greek Kitchen* David E. Sutton, 2014-09-19 Secrets from the Greek Kitchen explores how cooking skills practices and knowledge on the island of Kalymnos are reinforced or transformed by contemporary events Based on more than twenty years of research and the author's videos of everyday cooking techniques this rich ethnography treats the kitchen as an environment in which people pursue tasks display expertise and confront culturally defined risks Kalymnian islanders both women and men use food as a way of evoking personal and collective memory creating an elaborate discourse on ingredients tastes and recipes Author David E Sutton focuses on micropractices in the kitchen such as the cutting of onions the use of a can opener and the rolling of phyllo dough along with cultural changes such as the rise of televised cooking shows to reveal new perspectives on the anthropology of everyday living **Culture and Customs of Greece** Artemis Leontis, 2009-04-30 The Parthenon Plato Socrates and Aristotle Homer's epic poems Gods and goddesses lounging around indulging in pleasures on Mount Olympus All of these images bring to mind the traditional icons of Greece the cradle of Western Civilization But what do we know of modern Greece The answer to that question and more can be found in this comprehensive look at contemporary Greek culture This one stop reference source is packed with illustrative descriptions of daily life in Greece in the 21st century Ideal for high school students and even undergraduates interested in studying abroad this extensive volume examines topics such as religion social customs leisure life festivals language literature performing arts media and modern art and architecture among many other topics Woven into the text are beautiful and accurate vignettes of Greek life helping to illustrate how it is people live A crossroads between Europe Africa and the Middle East Greece is fighting to hold on to the culture of yesterday while still looking toward modernity Culture and Customs of Greece is a must have volume for all high school and public library shelves **Digital Anthropology** Heather A. Unpredictability of Gameplay explores the many forms of unpredictability in games and proposes a comprehensive theoretical framework for understanding and categorizing non deterministic game mechanics Rather than viewing all game mechanics with unpredictable outcomes as a single concept Mark R Johnson develops a three part typology for such mechanics distinguishing between randomness chance and luck in gameplay assessing games that range from grand strategy and MMORPGs to slot machines and card games He also explores forms of unanticipated unpredictability where elements of games fail to function as intended and create new forms of gameplay in the process Covering a range of game concepts using these frameworks The Unpredictability of Gameplay then explores three illustrative case studies 1 procedural generation 2 replay value and grinding and 3 player made practices designed to reduce the level of luck in non deterministic games Throughout Johnson demonstrates the importance of looking more deeply at unpredictability in games and game design and the various ways in which unpredictability manifests while offering an invaluable tool for game scholars and game designers seeking to integrate unpredictability into their work
