These requirements are checked in the bidding process ending with the decision which city succeeds in getting the right of staging the event Integrating the success of an Olympic City in terms of urban development and in terms of the bidding process the main question from an urban planning perspective is What is the relevance of Urban Development in the Bidding Process for Olympic Games To answer the definition of the city s success in terms of urban development and the Olympic Games bidding process it is helpful to investigate the role of Olympic Infrastructure with a view towards urban sustainability As such it is believed that respecting specific planning principles in the bidding process can help to 1 ensure sustainable urban development and 2 enhance the quality of the bid The first aspect is relevant for the success of the city in terms of urban development to benefit from the Games in a long time perspective The second aspect is relevant for the city s success in the bidding process to acquire the right for staging the Games The aim of this thesis is to examine how the quality of the bid may respond to principles
