Animal People Adam Reed,2025-01-15 Animal People introduces readers to the professionalized world of animal protection from the perspective of those who consider themselves to be moderate activists Adam Reed explores the interrelationships between moral cause and organizational culture including the ways in which expert roles such as investigator and lobbyist inform the practice and outlook of animal protection This book examines not only connections between forms of professionalism and everyday advocacy but also how those working to improve the welfare of animals can come to possess an expertise in public or mainstream ethics Reed explores these issues through the example of a Scottish based animal protection organization Animal People makes a distinctive contribution to anthropological debate and discussion relating to human and nonhuman animal interactions activism and the attributions and imperatives of moral action

Animals and Other People Heather Keenleyside,2016-11-21 In Animals and Other People Heather Keenleyside argues for the central role of literary modes of knowledge in apprehending animal life Keenleyside focuses on writers who populate their poetry novels and children s stories with conspicuously figurative animals experiment with conventional genres like the beast fable and write the lives of mice as well as men From such writers including James Thomson Daniel Defoe Jonathan Swift Laurence Sterne Anna Letitia Barbauld and others she recovers a key insight about the representation of living beings when we think and write about animals we are never in the territory of strictly literal description relying solely on the evidence of our senses Indeed any description of animals involves personification of a sort if we understand personification not as a rhetorical ornament but as a fundamental part of our descriptive and conceptual repertoire essential for distinguishing living beings from things Throughout the book animals are characterized by a distinctive mode of agency and generality they are at once moving and being moved at once individual beings and generic or species figures every cat is also The Cat Animals thus become figures with which to think about key philosophical questions

about the nature of human agency and of social and political community They also come into view as potential participants in that community as one sort of people among others Demonstrating the centrality of animals to an eighteenth century literary and philosophical tradition *Animals and Other People* also argues for the importance of this tradition to current discussions of what life is and how we might live together *Storytelling Magazine* ,2002 **The Voice of Animals** Margrit Coates,2017-08-11 Life can be so busy and demanding that many of us are looking for new ways to find harmony and what could be a better route to peace than by tuning into the wisdom of a much loved dog cat or horse In her new book world acclaimed animal communicator Margrit Coates shares 10 life healing lessons learnt from animals Using varied means of communication all animals domestic and wild have teachings to offer us that will enable us to realise our true potential With their example we too can find calm and contentment and discover our own life healing power Through many heart warming amazing true stories Margrit shows how the guidance and wisdom of animals can help us all live happier and more fulfilling lives *Teaching the Animal: The Social Sciences* , *Hunters and Bureaucrats* Paul Nadasdy,2011-11-01 Based on three years of ethnographic research in the Yukon this book examines contemporary efforts to restructure the relationship between aboriginal peoples and the state in Canada Although it is widely held that land claims and co management two of the most visible and celebrated elements of this restructuring will help reverse centuries of inequity this book challenges this conventional wisdom arguing that land claims and co management may be less empowering for First Nation peoples than is often supposed The book examines the complex relationship between the people of Kluane First Nation the land and animals and the state It shows that Kluane human animal relations are at least partially incompatible with Euro Canadian notions of property and knowledge Yet these concepts form the conceptual basis for land claims and co management respectively As a result these processes necessarily end up taking for granted and so helping to reproduce existing power relations First Nation peoples participation in land claim negotiations and co management have forced them at least in some contexts to adopt Euro Canadian perspectives toward the land and animals They have been forced to develop bureaucratic infrastructures for interfacing with the state and they have had to become bureaucrats themselves learning to speak and act in uncharacteristic ways Thus land claims and co management have helped undermine the very way of life they are supposed to be protecting This book speaks to critical issues in contemporary anthropology First Nation law and resource management It moves beyond conventional models of colonialism in which the state is treated as a monolithic entity and instead explores how state power is reproduced through everyday bureaucratic practices including struggles over the production and use of knowledge *In the Company of Animals* Pam Chamberlain,2014-10-17 Real life tales that explore the complexities of human animal relationships from domestic pets to farm animals to wildlife In this collection thirty seven writers from across Canada tell thought provoking stories of extraordinary encounters with a variety of animals from rats and salamanders to wolves and bears From tributes to a favorite cat or dog to tales of a chance encounter with a moose or a cougar these stories

are sure to entertain and enlighten The writers are people who spend time in the company of animals pet owners farmers veterinarians hunters artists landowners game wardens those who pay close attention to them and their natures and the lessons they can teach us

The Politics and Crisis Management of Animal Health Security John Connolly, 2016-03-09 *The Politics and Crisis Management of Animal Health Security* addresses the 2001 foot and mouth epidemic in the United Kingdom one of if not the most significant crises ever to face the UK farming industry Underpinned by interviews with politicians and bureaucrats and with significant primary documentary analysis the book shows that the crisis was a critical juncture in how disease outbreaks have been planned and managed ever since The author explores how this event affected policy and governance arrangements for managing subsequent disease induced threats such as avian influenza and bovine TB and concludes by considering the temporality of lesson learning by the UK government including the current and future challenges associated with managing incongruent risks e.g flood protection swine flu and Ebola This book

provides students of public policy and administration with a significant illustration of how key concepts and analytical lenses from public policy can be applied to the study of the contours of practical policy change
