Forbes,2008-08-01 It is not hard to argue that every black performer in show business owes something to Bert Williams Discovered in California in 1890 by a minstrel troupe manager Williams swiftly became a regular player in the troupe Traveling on from the rough and ready medicine shows that then dotted the West he rose through the ranks of big time vaudeville in New York City and finally ascended to the previously all white pinnacle of live stage success the fabled Ziegfeld Follies on Broadway Inspite of his triumphs he brought the first musical with an all black cast to Broadway in 1903 he was often viewed by the black community with more critical suspicion than admiration because of his controversial decision to perform in blackface Modest private and conservative in his personal life Williams left political activism and soapbox thumping to others More than the simple narration of a remarkable life Introducing Bert Williams offers a fascinating window into the fraught issues surrounding race and artistic expression in American culture The story of Williams s long and varied career is a whirlwind of inner turmoil racial tension glamour and striving nothing less than the birth of American show business **Medicine and Moral Reasoning** K. *Cancer in Children* International Union against Cancer, 2013-06-29

With the fall in mortality from infectious diseases the impact of childhood cancer in the Western World has increased to become the second commonest cause of death in the age group 1-14 years being surpassed only by accidents However even in those countries in which paediatric cancer is attracting increasing interest the disease is relatively uncommon and the number of cases seen by any one physician even in a large general hospital is often limited to one or two a year The widely held view by parents and even by many doctors that cancer in childhood is usually untreatable and inevitably fatal is no longer tenable With improvement in the therapeutic response or in the actual survival rates of children with such lesions as Wilms tumour brain tumours rhabdomyosarcomas Ewing's sarcoma retinoblastoma lymphoma and even leukaemia there is a real hope of achieving a substantial reduction in the mortality of childhood cancer Paediatric oncology is in fact providing a vigorous stimulus to the much wider field of cancer treatment and research and is demonstrating the advantages of a multi-disciplinary cooperation in the management of this disease
