How do game characters contribute to shaping the playing experience What kinds of design tools are available for character based games that utilize methods from dramatic writing and game research Writer Petri Lankoski has a theory for this There is a need to tether character design to game design more tightly than has been the case in the past as well as to pay attention to social networks of characters by the means of finding useful design patterns The use of Lajos Egri's bone structure for a three dimensional character and of Murray Smith's three levels of imaginative engagement with characters allows the candidate to expose the full complexity of the imaginary persons represented and controlled in a single player game What makes his design center approach even more interesting is that game play is an integral part of it Comments Bernard Perron Associate Professor of Universit de Montr al on Lankoski's work

Lights! Camera! Action! Gregory G. Sarno, 2005 Action action yet more action No action film worthy of genre would be caught dead without its fair share of red hot lead and no holds barred fistcuffs high octane pursuits and gravity defying gymnastics Then again nonstop action soon wears thin absent a rooting interest in Last Man Standing First Woman to Cross Finish Line Rooting interest inheres not in overt action no matter how artfully choreographed or breathtakingly executed Rather rooting interest comes from empathy for the protagonist and more precisely from the dramatic action embodied by the protagonist's struggle to accomplish a worthy goal opposed by a formidable foe Action is a double edged blade overt action being a necessary but insufficient condition to sustain viewer interest which soars and ebbs to extent that dramatic action intersects with injects meaningfulness into gunplay and fistfest acrobatics and pyrotechnics Lights Camera Action spotlights the essential elements of action comedy action romance and action adventure It underscores the crucial distinction between overt and dramatic action which a screenwriter must weave together in order for an action script to hum and shimmer pulsate and zing
