
The Failed Promise of Nuclear Power

◆
WILLIAM BEAVER

For the past two decades, the nuclear power industry has been predicting a revival of the technology, and after all these years a revival may finally be emerging. The Southern Company, a Georgia utility, has ordered two new reactors. Moreover, utilities across the country have applied to the Nuclear Regulatory Commission for permission to construct at least twenty-six additional nuclear plants, and nuclear advocates have called for the construction of one hundred new reactors, which would nearly double the number of plants in operation (Wald 2010). The public also seems to support nuclear power. A recent Gallop Poll found 62 percent favor the technology—reportedly an all-time high. The Obama administration has altered its stance. At first, the president was somewhat ambiguous, stating only that nuclear power had a place in an overall energy strategy. However, in an attempt to gain bipartisan support for a comprehensive energy bill that would include a cap on carbon emissions, the White House announced plans to triple the amount currently allocated for loan guarantees available to utilities for construction of new reactors. Indeed, loan guarantees are seen as crucial, considering that the current price tag for a large nuclear plant is estimated to be between \$6 billion and \$8 billion (Farrow 2010).

The degree to which a nuclear revival is likely to occur is open to debate. Those promoting the technology point out that nuclear is the only carbon-free technology capable of replacing large coal-fired plants, whereas those who question the idea of a nuclear-power resurgence maintain that the costs of constructing large reactors are prohibitive. Perhaps the latter factor helps to explain why the U.S. Department of

Rosenbaum,2019-07-17 Walter A Rosenbaum s classic Environmental Politics and Policy provides definitive coverage of environmental politics and policy lively case material and a balanced assessment of current environmental issues The first half of the book sets needed context and describes the policy process while the second half

covers specific environmental issues such as air and water toxic and hazardous substances energy and a global policymaking chapter focused on climate change and trans boundary politics The eleventh edition includes updates on the Trump administration s initiatives and controversies with regard to environmental policy offering the currency and relevancy needed for any environmental politics course Destined for Failure Nicolás Sánchez,Christopher F. Kopp Jr.,Francis Sanzari,2010-08-19 This book provides a historical background of the American business cycle challenges the validity of conventional Keynesian ideology and presents a bold alternative theory of how production leads to wealth in our modern economy The United States is mired in the aftermath of booming economic prosperity resembling the trouble recently experienced by the Japanese economy due partially to similar Keynesian bailouts and subsidies Now more than two years into the current financial crisis Americans are starting to wonder if we can ever escape the consequences of past mistakes If our recovery plan continues along the previous paths that generated economic bubbles and unemployment then we are destined for failure Destined for Failure American Prosperity in the Age of Bailouts provides a conceptual framework previously available only to those with formal university training It explains the effects of government regulation political interference in the housing and job markets misallocation of resources in health and education moral hazard environmental constraints and excessive taxation The authors provide insight into their view of Keynesian economics as an outdated detrimental ideology and take the Bush and Obama administrations to task for budget deficits and cronyistic subsidies and bailouts **Energy and the Politics of the North Atlantic** George A. Gonzalez,2013-01-01 Documents how energy resource acquisition has been the driving motivator for European and American international relations Transforming Power Dietrich Kebschull,2017-09-08 In 1934 Lewis Mumford critiqued the industrial energy system as a key source of authoritarian economic and political tendencies in modern life Recent debate continues to engage issues of energy authoritarianism focusing on the contest between energy driven globalization the spread of energy deregulation and the simultaneous consolidation of the oil coal and gas industries and the so called sustainable energy strategy that celebrates the local and community scale characteristics of renewable energy Including theoretical inquiries and case studies by distinguished writers Transforming Power is divided into three parts Energy Environment and Society The Politics of Conventional Energy and The Politics of Sustainable Energy It interrogates current contemporary energy assumptions exploring the reflexive relationship between energy environment and society and examining energy as a social project Some of these have promised a prosperous future founded upon technological advances that further modernize the modern energy system such as inherently safe nuclear power environmentally friendly coal gasification and the advent of a wealthier cleaner world powered by fuel cells and the green technologies said by advocates to prefigure a revival of human scale development local self determination and a commitment to ecological balance br This volume offers a timely engagement of the social issues surrounding energy conflicts and contradictions It will be of interest to policymakers energy and environmental experts

sociologists and historians of technology **Energy** Joseph Russell Rudolph,1995 A road map for the novice researcher contemplating the broad field affected by and concerned with energy *Public-private Policy Partnerships* Pauline Vaillancourt Rosenau,2000 The first book to evaluate public private partnerships in a broad range of policy areas

Environmental Policy in the European Union Andrew Jordan,2012 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy Comprising five comprehensive parts it includes in depth case studies of contemporary policy issues such as climate change genetically modified organisms and trans Atlantic relations as well as an assessment of how well the EU is responding to new challenges such as enlargement environmental policy integration and sustainability The book s aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors *American Energy* Walter A. Rosenbaum,2013-01-01 There are rapid and sometimes radical changes now transforming energy production and consumption in the United States Utilizing contemporary examples throughout his narrative Rosenbaum captures this transformation while analyzing how important actors institutions and issues impact American energy policymaking With clear explanations of relevant energy technologies from controversial fracking to mountain top mining to nuclear waste storage the book first looks at the policy options available in governing the energy economy and then discusses specific resources petroleum and natural gas coal nuclear power electricity renewable energy conservation and the global energy challenges associated with climate change *The Triumph of Broken Promises* Fritz Bartel,2022-08-09 A powerful case that the economic shocks of the 1970s hastened both the end of the Cold War and the rise of neoliberalism by forcing governments to impose austerity on their own people Why did the Cold War come to a peaceful end And why did neoliberal economics sweep across the world in the late twentieth century In this pathbreaking study Fritz Bartel argues that the answer to these questions is one and the same The Cold War began as a competition between capitalist and communist governments to expand their social contracts as they raced to deliver their people a better life But the economic shocks of the 1970s made promises of better living untenable on both sides of the Iron Curtain Energy and financial markets placed immense pressure on governments to discipline their social contracts Rather than make promises political leaders were forced to break them In a sweeping narrative *The Triumph of Broken Promises* tells the story of how the pressure to break promises spurred the end of the Cold War In the West neoliberalism provided Western leaders like Ronald Reagan and Margaret Thatcher with the political and ideological tools to shut down industries impose austerity and favor the interests of capital over labor But in Eastern Europe revolutionaries like Lech Walesa in Poland resisted any attempt at imposing market discipline Mikhail Gorbachev tried in vain to reform the Soviet system but the necessary changes ultimately presented too great a challenge Faced with imposing economic discipline antithetical to communist ideals Soviet style governments found their legitimacy

irreparably damaged But in the West politicians could promote austerity as an antidote to the excesses of ideological opponents setting the stage for the rise of the neoliberal global economy
