Managing Institutional Complexity Sebastian Oberthür, Olav Schram Stokke, 2011 The book a product of the Institutional Dimensions of Global Environmental Change research project IDGEC offers both theoretical and empirical perspectives **Toward a North American Legal System** J. McHugh, 2012-10-31 Toward a North American Legal System is a collection of scholarship that looks at a timely issue in public policy Two decades after NAFTA the team assembled by James T McHugh works through both philosophical and practical questions related to a possibly more integrated legal system on the North American continent *Global Justice* James Christensen, 2020-02-01 Do we have moral duties to people in distant parts of the world If so how demanding are these duties And how can they be reconciled with our obligations to fellow citizens Every year millions of people die from poverty related causes while countless others are forced to flee their homes to escape from war and oppression At the same time many of us live comfortably in safe and prosperous democracies Yet our lives are bound up with those of the poor and dispossessed in multiple ways our clothes are manufactured in Asian sweatshops the oil that fuels our cars is purchased from African and Middle Eastern dictators and our consumer lifestyles generate environmental changes that threaten Bangladeshi peasants with drought and famine These facts force us to re evaluate our conduct and to ask whether we must do more for those who have less Helping students to grapple with big questions surrounding justice human rights and equality this comprehensive yet accessible textbook features chapters on a variety of pressing issues such as Immigration International Trade War and Climate Change Suitable for undergraduate and graduate students alike the book also serves as a philosophical primer for politicians activists and anyone else who cares about justice **International Trade in Services and Domestic Regulations** Panagiotis Delimatsis, 2007-12-27 This book examines the regulation of services within the WTO It examines the problem of reconciling a liberal system of trade in services with national governments ability to protect social values through service regulation The book analyses the existing legal framework and assesses the potential of ongoing trade negotiations **A Purposive Approach to Labour Law** Guy Davidov, 2016-05-06 The mismatch between goals and means is a major cause of crisis in labour law The regulations that we use the legal instruments and techniques are no longer in sync with the goals they are supposed to advance This mismatch leads to a problem of coverage where many workers who need the protection of labour law are not covered by it as well as a problem of obsolescence as labour laws are not sufficiently updated in light of dramatic changes in the labour market Adopting a purposive approach to interpretation and legislative reform this volume addresses this crisis of mismatch It first

articulates the goals of labour law both general and specific through an in depth normative discussion and a consideration of critiques The book then proceeds to reconsider our means asking what we need to change or improve in the laws themselves in order to better advance the goals Some of the proposed solutions are at the level of judicial interpretation others at the legislative level The book offers several examples of the way a purposive analysis should be performed in concrete cases It also recommends institutional structures that are suited to ongoing adaptation of the law to ensure that our goals are advanced even when circumstances frequently change Finally in response to the crisis of enforcement in this field which frustrates the achievement of labour law s goals several proposals to improve compliance and enforcement are considered

Technical Bulletin ,1999 , **Ricardo's Gauntlet** Vishaal Kishore,2014-09-01 Ricardo s Gauntlet advances a critique of the mainstream economic case for international free trade While the core of the case for free trade is David Ricardo s principle of comparative advantage the book argues that this case relies on a cluster of interconnected and mutually enforcing economic fictions economic theories or doctrines that pretend to be fact but which upon examination turn out to be mirages Exposing the layers of fiction nested in the subfields of mainstream economics empties comparative advantage of its persuasiveness bringing down the case for free trade **Environment, Human Rights and International Trade** Francesco Francioni,2001-07-13 After the completion of the Uruguay Round and the adoption of the 1994 agreement establishing the WTO the place of international trade in the context of the international legal order has radically changed International trade law has become a subject of wide spread interest cutting across traditional boundaries and engaging diverse political and legal concerns One consequence of this development is increasing concern with the legitimacy of the WTO process which in turn has led to the WTO becoming the focus of rancorous protest by among others environmental NGOs trade unions and human rights activists This collection of essays by leading scholars and lawyers engaged in the policy making process addresses the underlying tensions and dilemmas of the WTO process and its impact upon the environment and human rights in particular The contributors search for a balance between on the one hand legitimate free trade interests and on the other the role and limits of unilateral measures as an instrument to protect non commercial values The essays thus range over a host of topical questions including trade in GMOs biosafety in intellectual property rights technology transfer and environmental protection trade and labour rights child labour standards the EU and WTO MERCOSUR and many other topics The contributors include Thomas Schoenbaum Andrea Bianchi Chris McCrudden Michael Spence Sarah Cleveland Patricia Hansen Riccardo Pavoni and Francesco Francioni **Free Markets and Social Regulation:A Reform Agenda of the Global Trading System Toward a New International Economic Law** Sungjoon Cho,2003-01-01 Free Markets and Social Regulation A Reform Agenda of the Global Trading System has a twofold purpose to consider what has so far been accomplished in this vital mission in the field of international economic law and to prescribe some solutions to continuing problems This latter endeavor amounts to a coherent and integrated plan that will enhance the acceptability of

Employment with a Human Face John W. Budd,2018-07-05 John W Budd contends that the

turbulence of the current workplace and the importance of work for individuals and society make it vitally important that employment be given a human face Contradicting the traditional view of the employment relationship as a purely economic transaction with business wanting efficiency and workers wanting income Budd argues that equity and voice are equally important objectives The traditional narrow focus on efficiency must be balanced with employees entitlement to fair treatment equity and the opportunity to have meaningful input into decisions voice he says Only through a greater respect for these human concerns can broadly shared prosperity respect for human dignity and equal appreciation for the competing human rights of property and labor be achieved Budd proposes a fresh set of objectives for modern democracies efficiency equity and voice and supports this new triad with an intellectual framework for analyzing employment institutions and practices In the process he draws on scholarship from industrial relations law political science moral philosophy theology psychology sociology and economics and advances debates over free markets globalization human rights and ethics He applies his framework to important employment related topics such as workplace governance the New Deal industrial relations system comparative industrial relations labor union strategies and globalization These analyses create a foundation for reforming employment practices social norms and public policies In the book's final chapter Budd advocates the creation of the field of human resources and industrial relations and explores the wider implications of this renewed conceptualization of industrial relations

Human Rights Obligations of Non-State Actors Andrew Clapham, 2006-03-02 The threats to human rights posed by non state actors are of increasing concern Human rights activists increasingly address the activity of multinational corporations the policies of international organizations such as the World Bank and the World Trade Organization and international crimes committed by entities such as armed opposition groups and terrorists This book presents an approach to human rights that goes beyond the traditional focus on states and outlines the human rights obligations of non state actors Furthermore it addresses some of the ways in which these entities can be held legally accountable for their actions in various jurisdictions The political debate concerning the appropriateness of expanding human rights scrutiny to non state actors is discussed and dissected For some extending human rights into these spheres trivializes human rights and allows abusive governments to distract us from ongoing violations For others such an extension is essential if human rights are properly to address the current concerns of women and workers The main focus of the book however is on the legal obligations of non state actors The book discusses how developments in the fields of international responsibility and international criminal law have implications for building a framework for the human rights obligations of non state actors in international law In turn these international developments have drawn on the changing ways in which human rights are implemented in national law A selection of national jurisdictions including the United States South Africa and the United Kingdom are examined with regard to the application of human rights law to non state actors The book s final

part includes suggestions with regard to understanding the parameters of the human rights obligations of non state actors Key to understanding the legal obligations of non state actors are concepts such as dignity and democracy While neither concept can unravel the dilemmas involved in the application of human rights law to non state actors a better understanding of the tensions surrounding these concepts can help us to understand what is at stake Governance in "Cyberspace": Access and Public Interest in Global Communications Klaus Grewlich, 1999-11-09 Cyberspace is the emerging invisible intangible world of electronic information and processes stored at multiple interconnected sites The digital revolution leads to convergence of telecommunications computer Internet and broadcasting and to dynamic multimedia value chains Deregulation and competition are major driving forces in the new interactive electronic environment This volume contains normative proposals for cyber regulation including self regulation grounded on developments in the EU US and the Far East in international organisations WTO OECD WIPO ITU in business fora in NGOs in the Internet community and in academic research The multi actor government business civil society and multi level analysis subsidiarity pertains e g to ex ante and ex post access regulation competition network economics external effects essential facilities public interest principles human dignity free speech privacy security development and culture consumer protection cryptography domain names and copyright Lawyers regulators business executives investment bankers diplomats and civil society representatives need shared essentials of plurilateral governance to safeguard both competition and public interest objectives at a scale congruent to cyberspace in the transition to an international law of cooperation *Global Unions?* Jeffrey Harrod, Robert O'Brien, 2012-10-02 This edited collection examines the interaction between industrial relations and international relations in the global economy The role of trade unions has changed significantly in the era of economic globalization and this book analyzes the key developments in union strategy on a local national regional and global level
