Symbolism is cohesive It gathers heterogeneity over time across fields of human endeavor and systems of communication Non sequiturs paradox and tautology appear dissipative Yet they are highly productive in reticular and fractal ways Suffice it to look at the philosophical tautology of Parmenides s kind which suggests that being is at the practice of the koan which collapses dualistic thinking by way of incompatible propositions such as the Eastern hill keeps running on the water at logical paradoxes in which the operative logic is sabotaged by its own means as in Hempel s paradox at absurdist dramatic texts in which protagonists record empty time in order to mark the emptiness of the time they are recording as in Beckett s Krapp s Last Tape or at paradoxical games like Maciunas s Prepared Table Tennis played with paddles that have huge holes in them In all of these examples the existence apprehending processes occur via unexpected itineraries in vacant but nevertheless enunciative codes in seemingly futile yet calibrating performances and in a temporality that is the cumulative time s other They catapult the mind into the realm of the extra linguistic the para logical and the meta experiential or they transfigure it through a series of reticular iterations Forty years after Varela et al s groundbreaking work on the embodied emotional and environmentally embedded mind that marked a definitive departure from its former strictly rational conception there is a need to re examine the territory that lies beyond mind for a different reason the proliferation of algorithmic logics that rely on the idea of a rational agent human or algorithmic making logical self serving decisions This special issue explores neither rational nor irrational forms of thinking and making It sketches a cartography of a rational processes of meaning and knowledge production that operate across numerous sites practices and disciplines visual and media art literature art history music dance film intermedia and photography Part I Ahistoricity Assemblages and Interpretative Reversals focuses on the legacy of the neo avant garde and amodernism Part II Destinerrance Labyrinths and Folds investigates the ways in which the Derridian delays detours and the Deleuzian folding function as concrete ways of embodied knowledge production Part III Immanent Transcendence offers a glimpse into the reticular and iterative structuring of transcendence that does not pre exist immanence but is its residue

Silverman, 2009-06-29 In 1960 at the age of twenty seven the author Sidney B Silverman started his own law practice He began by tackling corporate giants and never stopped until he retired in 2001 He was an aggressive street smart trial lawyer Upon his retirement Silverman enrolled in graduate school at Columbia University Concentrating in philosophy he received a masters degree in 2007 He was as competitive in the classroom as he was in the courtroom After graduating he looked for another challenge He had played chess for many years Now he wanted to play in tournaments and become a chess master Although he tried hard to become an expert chess player he failed A Happy Life chronicles Silvermans adventures before during and after his long and successful career What pieces of wisdom can he share that will help readers to find their best most successful retirement years Read on **New York Magazine** ,1984-06-11 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea *Finding One's Way Through Wittgenstein's Philosophical Investigations* Emmanuel Bermon, Jean-Philippe Narboux, 2017-10-20 This volume sheds a new light on Philosophical Investigations Ludwig Wittgenstein s master opus by taking a new approach to its first stretch sections 1 88 with special emphasis on its atypical opening The methodological conviction that subtends the volume is that the highly unconventional form assumed by the book is internal to its content and crucial to its reconception of the relation between logic and language This disconcerting form is dictated by the new modes of criticism deployed by Wittgenstein as he engages the philosophical tradition in the new terms afforded by the revolutionary method of language games In the essays collected here seven authors including some of the most influential figures in the field offer close and often unorthodox readings of pivotal passages from the beginning of the book These readings are also shaped by the conviction that the Philosophical Investigations are hardly intelligible apart from an appreciation of the concerns that they inherit from Wittgenstein s early work the Tractatus Logico Philosophicus The authors contend that we need to consider the continuities between the early and the later works if we are to disclose the true discontinuities between them *Notes of Studies on the Tempest* Shakspeare Society of Philadelphia, 1866 **U.S. Navy Fundamentals of War Gaming** Francis J. McHugh, 2013-07 Offers a historical perspective on military gaming and the evolution of the tools and tactics used in ancient times up through modern computer simulations and includes examples of one and multi sided games as well as free play and rigid style games
