Game of mirrors Francisco Letamendia,2000 **Game of Mirrors: Centre-Periphery National Conflicts** Francisco Letamendia,2019-07-30 This title was first published in 2000 Nationalism and the national question have represented a problem since the early years of the 19th century Understanding these phenomena represents a challenge for political science because the nation is not a natural phenomenon rather it is the consequence of nationalism Attempts to reduce nationalism to one or several factors have been unsuccessful it has multiple factors that are variable in space and time Nationalism is a problem of beliefs and conscience linked to the historical action of nationalist groups A second difficulty derives from the distinction between nationalism of the dominant and nationalism of the oppressed The majority of political theorists now believe that these centre and periphery nationalisms are different and therefore adversaries Using first hand experience of Basque separatism as a starting point the author adds to it with the main manifestations of this phenomenon around the world **Comparing Peace Processes** Alpaslan Özerdem,Roger Mac Ginty,2019-03-18 This book offers a comparative survey of 18 contemporary peace processes conducted by leading international scholars There is no standard model of peace processes and all will vary according to the context type of conflict timing national and global economic climate and factors like natural disasters Therefore making comparisons between peace processes is difficult but it is beneficial indeed imperative and is the principal motivation behind this volume What works in one context may not work in another but it can be modified and adapted to fit another context The book is structured to maximise comparison between processes and the case studies chosen are topical and span the major regions of the world The concluding chapter systematically compares the case studies around 11 variables that cover the conflict context peace process procedures the responsiveness of the peace process to demands and levels of participation and inclusion Each peace process is then given a numeric score according to each of these variables and the book thereby reaches judgements on whether each case can be termed a success or a failure This book will be essential reading for students of peace studies conflict resolution war and conflict studies security studies and IR **Bibliographie Internationale de Science Politique** ,2002-12 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences European Identity Kenneth Keulman,Agnes Katalin Koós,2014-08-20 The further evolution of the European Union is mainly dependent on how its citizens relate to their fellow Europeans speaking a score of languages and belonging to a variety of cultures This book addresses the question of whether a new sense of collective self identification labeled European identity a special form of socio territorial identities is emerging Collective identities are works in progress they entail a salient strategic activist and future oriented dimension Divergent strategic goals of the constituent groups induce a perpetual contestation and negotiation of the group identity a process that in the case of the EU is intensified by the continuously changing boundaries and institutional structure

of the super polity To confront these challenges this book has a double focus The first part weighs in on the feasibility of a European identity in light of what the two main paradigms in the field primordialism and constructivism can predict The second part maps the social forces that are either favorable or inimical to the creation of a common social identity on the continent Both parts develop hypotheses about the processes we witness and test them with the available empirical data Part II distinguishes between passive and active supporters of the integration project besides the Euroskeptical segment of the public Provision of public goods by regional integration is believed to explain passive permissiveness while the main impetus for integration comes from those who may reap above average benefits from it This book contends that the groups of active supporters have historically been changing within the Union namely the political Left and Right are changing their roles in negotiating future developments Yet the evolution of the EU is also shaped by the solutions adopted to accommodate ethnic and cultural diversity The empirical tests involve opinion survey data taken from the Eurobarometer series World Value and European Social Surveys and the International Social Survey Programme expert ratings as well as party elite documents from the Manifesto Project Database

Nationalist-Irish Republican Relations Niall Cullen,2023-12-14 This volume explains the genesis and development of the nexus between radical Basque nationalists and Irish republicans how they have learnt from each other historically and how they have utilised this relationship at times to their benefit From medieval tales of shared origins to the violent conflicts largely wrought by ETA and the IRA the Basque Country and Ireland have long been associated in popular imagination Despite this little is known of historical Basque Irish relations and in particular the web of party political military and social movement connections between radical Basque nationalists and Irish republicans since the Irish Revolutionary Period 1916 23 Drawing on extensive archival research undertaken in Spain Ireland and the UK and more than 70 interviews conducted with politicians former paramilitaries and grassroots activists this is the first study to comprehensively document and analyse the emergence evolution and implications of this mythified transnational relationship Radical Basque Nationalist Irish Republican Relations A History will appeal to students and scholars of Irish republicanism Basque nationalism terrorism studies and social movements studies as well as those interested in the contemporary history of Western Europe s two most volatile regions Self-Determination and Collective Responsibility in the Secessionist Struggle Costas

Laoutides,2016-03-03 The often violent emergence of new independent states following the end of the Cold War generated discussion about the normative grounds of territorial separatism A number of opposing approaches surfaced debating whether and under which circumstances there is a right for a community to secede from its host country Overwhelmingly these studies placed emphasis on the right to secession and neglected the moral stance of secessionist movements as agents in international relations In this book Costas Laoutides explores the collective moral agency involved in secessionist struggles offering a theoretical model for the collective responsibility of secessionist groups Case studies on the Kurds and the people of Moldova Transdnistria illustrate the author s theoretical arguments as he seeks to establish how although the principle of self determination was envisaged as a means of gradually bestowing political power upon the people it never managed to realize its full potential because it was interpreted strictly within a framework of exclusionary politics of identity A Clean Sweep? T. David Curp,2006 An examination of how the Polish state and its people worked together to ethnically cleanse and colonize eastern Germany after 1945 A Clean Sweep The Politics of Ethnic Cleansing in Western Poland 1945 1960 examines the long term impact of ethnic cleansing on postwar Poland focusing on the western Polish provinces of Poznan and Zielona G ra Employing archival materials from multiple sources including newly available Secret Police archives it demonstrates how ethnic cleansing solidified Communist rule in the short term while reshaping and nationalizing that rule The Poles of Poznan played a crucial role in the postwar national revolution in which Poland was ethnically cleansed by a joint effort of the

people and state A resulting national solidarity provided the Communist dominated regime with an underlying stability while it transformed what had been a militantly internationalist Polish Communism This book addresses the legacy of Polish German conflict that led to ethnic cleansing in East Central Europe the ramifications within the context of Polish Stalinism s social and cultural revolutions and the subsequent anti national counterrevolutionary effort to break the bonds of national solidarity Finally it examines how the Poznan milieu undermined and then reversed Stalinist efforts at socioeconomic and cultural revolution In the aftermath of the Poznan revolt of June 1956 the regime s leadership re embraced hyper nationalist politics and activists and by 1960 Polish authorities had succeeded in stabilizing their rule at the cost of becoming an increasingly national socialist polity T David Curp is Assistant Professor in the Department of History at Ohio University

Fatal Future? Richard M. Pearlstein, 2009-06-03 The nature and goals of terrorist organizations have changed profoundly since the Cold War standoff among the U S Soviet and Chinese superpowers gave way to the current polyplex global system in which the old rules of international engagement have been shattered by a new struggle for power among established states non state actors and emerging nations In this confusing state of global disorder terrorist organizations that are privately funded and highly flexible have become capable of carrying out incredibly destructive attacks anywhere in the world in support of a wide array of political religious and ethnic causes This groundbreaking book examines the evolution of terrorism in the context of the new global disorder Richard M Pearlstein categorizes three generations of terrorist organizations and shows how each arose in response to the global conditions of its time Focusing extensively on today s transnational i e privately funded and internationally operating terrorist organizations he devotes thorough attention to the two most virulent types ethnoterrorism and radical Islamic terrorism He also discusses the terrorist race for weapons of mass destruction and the types of attacks including cyberterrorism that are likely to occur in coming years Pearlstein concludes with a thought provoking assessment of the many efforts to combat transnational terrorism in the post September 11 period

The British National Bibliography Arthur James Wells, 2002 **The Ways of Federalism in Western Countries**

and the Horizons of Territorial Autonomy in Spain Alberto López - Basaguren, Leire Escajedo San Epifanio, 2013-06-13

Territorial autonomy in Spain has reached a crossroads. After over thirty years of development, the consensus regarding its appropriateness has started to crumble. The transformation project embodied by the reform of Statute of Catalonia 2006 has failed to achieve its most significant demands. Although the concept of Spain as a Federation is disputed more within the country than beyond, the evolution of the Spanish system needs to follow a markedly federalist path. In this perspective, reference models assume critical importance. This edition gathers the works of a broad group of European, American, and Spanish experts who analyse the present-day challenges of their respective systems. The objective thus is to contribute ideas which might help to address the evolution of the Spanish system in the light of the experience of more established Federations. This second volume focuses its attention on the difficulties and challenges faced in two particular fields. On the one hand, the field of intergovernmental relations and on the other, questions related to the integration and acknowledgement of diversity and of Fundamental Rights with special reference to the cases of Canada and Spain. Finally, there is analysis of other specific aspects of the system of territorial autonomy in Spain.

Europe's Old States in the New World Order Joseph Ruane, Jennifer Todd, Anne Mandeville, 2003. Much attention has been paid to globalization yet little has been focused on the relationship between the national and sub-national levels of politics. This publication has separate sections on the state in transition, on regionalism, nationalism and separatism, and on the security forces and the maintenance of order. The three states chosen, Britain, France, and Spain, have historical similarities as ex-imperial Atlantic seaboard states with weighty historical and institutional traditions. But they also differ in their institutions, in their centre-periphery relations, and in their varying responses to the new phase of change. The authors assess the new constitutional configurations in each state: decentralisation, devolution, or autonomous governments, and analyse the effect on the peripheries and the maintenance of order. The book also includes chapters on conflict in Northern Ireland and the Spanish Basque country, and discussion of nationalist identity and assertion in the three countries.

Crisis and Reform in Eastern Europe Ferenc Fehér, Andrew Arato. Communism in Eastern Europe is in crisis. Its dimensions are social and economic; its manifestation is political. This volume, a collection of essays by leading authorities, describes the symptoms of the crisis, diagnoses the causes of the malady, and offers alternative scenarios for therapy. A unique dimension of this collection is its avoidance of one-dimensional explanations. The contributors approach the subject from very different angles and start from very distinct sociopolitical premises. The volume includes original accounts of unexplored aspects of East European communism as well as classic interpretations of the economic crisis and social stagnation that characterize the area. Contributions not only examine the sociopolitical behavior of the ruling apparatus but also analyze its strategies, political culture, and the opposition. Both the professional and the general reader seeking more information about Eastern Europe will

find this volume an extensive in depth portrait of the current situation in what many observers predict may develop into the major area of tension in post World War II Europe Ferenc Feher a collaborator and friend of George Lukacs was a leading member of the Budapest School Forced into exile in 1977 he was taught in Australia and is now in New York at the New School for Social Research He has published widely in several languages on the philosophy of art political theory and history
