race and class and the poor frequently found themselves trapped in deteriorating neighborhoods and exposed to dangerous levels of industrial pollution In telling the story of Gary Hurley reveals liberal capitalism s difficulties in reconciling concerns about social justice and quality of life with the imperatives of economic growth He also shows that the power to mold the urban landscape was intertwined with the ability to govern social relations

City in a Garden Andrew M. Busch,2017-05-16 The natural beauty of Austin Texas has always been central to the city s identity From the beginning city leaders residents planners and employers consistently imagined Austin as a natural place highlighting the region s environmental attributes as they marketed the city and planned for its growth Yet as Austin modernized and attracted an educated and skilled labor force the demand to preserve its natural spaces was used to justify economic and racial

segregation This effort to create and maintain a city in a garden perpetuated uneven social and economic power relationships throughout the twentieth century In telling Austin s story Andrew M Busch invites readers to consider the wider implications of environmentally friendly urban development While Austin s mainstream environmental record is impressive its minority groups continue to live on the economic social and geographic margins of the city By demonstrating how the city s midcentury modernization and progressive movement sustained racial oppression restriction and uneven development in the decades that followed Busch reveals the darker ramifications of Austin s green growth
