Pompili, 2022-12-19 This book explores suicide prevention perspectives from around the world considering both professionals points of view as well as first person accounts from suicidal individuals Scholars around the globe have puzzled over what makes a person suicidal and what is in the minds of those individuals who die by suicide Most often the focus is not on the motives for suicide nor on the phenomenology of this act but on what is found from small cohorts of suicidal individuals This book offers a tentative synthesis of a complex phenomenon and sheds some light on models of suicide that are less frequently encountered in the literature Written by international experts it makes a valuable contribution to the field of suicidology that appeals to a wide readership from mental health professionals to researchers in suicidology and students **Managing**

Suicidal Risk, Second Edition David A. Jobes, 2016-08-16 Revised edition of the author's *Managing suicidal risk* 2006

Psychiatry and the Law Tobias Wasser, Rocksheng Zhong, 2024-03-29 This book is designed to help new psychiatrists and other medical professionals confront the complicated legal and ethical issues that arise at the intersection of the mental health and judicial systems The law provides the boundaries in which clinical care operates Appreciating these boundaries is particularly important when working with individuals whose rights may already be curtailed forensic settings for example Understanding how psychiatry and the law interface provides students and trainees with a foundation for building their skills and attitudes through training and beyond This text can guide or supplement education on the legal regulation of psychiatry the use of psychiatry to answer legal questions and the treatment of individuals with criminal justice involvement In the second edition of this text the editors have updated several chapters with new information and added chapters covering topics not addressed in the first edition Each chapter begins with a clinical case vignette that brings the topic to life through a clinical encounter the majority of which are based on landmark legal cases that set a historical precedent The text presents

details of the legal case historical significance and the precedent it set before discussing the core principles of the subject area Each chapter reviews the existing literature and reinforces the most salient points Topics include risk assessment substance misuse and the law legal issues within child and adolescent psychiatry involuntary medication considerations and other challenges that are often not sufficiently addressed in training Psychiatry and the Law Basic Principles covers a wide range of topics that would be suitable for use as the basis of a course in forensic psychiatry for psychiatry residents and is an excellent resource for new psychiatrists psychologists social workers students and other professionals navigating medical and legal boundaries in clinical practice

The International Handbook of Suicide Prevention Rory C. O'Connor, Jane Pirkis, 2016-10-31 The International Handbook of Suicide Prevention 2nd Edition presents a series of readings that consider the individual and societal factors that lead to suicide it addresses ways these factors may be mitigated and presents the most up to date evidence for effective suicide prevention approaches An updated reference that shows why effective suicide prevention can only be achieved by understanding the many reasons why people choose to end their lives Gathers together contributions from more than 100 of the world's leading authorities on suicidal behavior many of them new to this edition Considers suicide from epidemiological psychological clinical sociological and neurobiological perspectives providing a holistic understanding of the subject Describes the most up to date evidence based research and practice from across the globe and explores its implications across countries cultures and the lifespan

Pediatric Firearm Injuries and Fatalities Lois K. Lee, Eric W. Fleegler, 2021-02-05 Pediatric firearm injuries are a significant public and medical community issue Clinicians are on the front line caring for children adolescents and their families after a firearm injury or death They also represent the best hopes for preventing firearm injuries to children and adolescents in the future In circumstances of injury and violence they provide medical mental health and rehabilitative care They also provide anticipatory guidance to prevent firearm injuries and deaths and should have a strong voice in the local state and national discussions about firearm policies for injury prevention This book provides an overview of the epidemiology and risk factors for firearm injuries in children and adolescents It will serve as a practical clinical guide for firearm injury prevention at the individual state and national levels The beginning of the book focuses on the epidemiology of firearm injuries primarily centered in the United States but also including an international perspective It addresses the role of firearms in suicide homicide and domestic violence and examines mass shootings as well The second half of the book focuses on preventive measures for firearm injuries including primary care and hospital based interventions community interventions and state and federal legislation It concludes with a background on the history of firearm research in the United States and future directions for decreasing firearm injuries The book's overall focus is on public policy and the role of clinicians and public health advocates while simultaneously offering practical tools and information about the clinician's role in intervention Written by experts in the field Pediatric Firearm Injuries and Fatalities is an ideal resource for pediatric adolescent medicine emergency medicine

primary care and family medicine clinicians At the same time it appeals to all clinicians and public health advocates wishing to develop a better understanding of pediatric firearm injuries and a path forward to decreasing them *Adolescent Gun Violence Prevention* Nancy A. Dodson,2021-10-29 Each year gun violence kills approximately 2 700 and injures approximately 14 500 children in the U S the overwhelming majority of child gun deaths are among teenagers who die by homicide or suicide Gun violence is the leading cause of death for Black teens A recent spate of high profile tragedies involving children such as the Newtown mass shooting in 2012 and the Parkland mass shooting in 2018 have reinvigorated a national debate about the role of guns in our private and public spaces Physicians and in particular pediatricians have become increasingly vocal about the need to address the epidemic of gun violence in the U S This book serves as an in depth comprehensive guide to adolescent gun violence prevention It describes the epidemiology of teen gun violence in the U S by focusing on the parallel epidemics that claim the most lives gun suicide among rural white males and gun homicide among urban Black males It offers in depth reviews of key concepts that are crucial to reaching a meaningful understanding of gun violence The text also addresses specific methods of intervention at various levels of society from the individual to the local community and finally to the entire nation This first of its kind book is a valuable reference for physicians public health scientists policy makers gun reform advocates and anyone interested in working towards a safer future for young people

This open access handbook provides a comprehensive treatment of Vision Zero an innovative policy on public road safety developed in Sweden Covering all the major topics of the subject the book starts out with a thorough examination of the philosophy ideas and principles behind Vision Zero It looks at conditions for the effectiveness of the policy principles of safety and responsibility as well as critique on the policy Next the handbook focuses on how the Vision Zero ideas have been received and implemented in various legislations and countries worldwide It takes into account the way Vision Zero is looked at in the context of international organizations such as the WHO the UN and the OECD This allows for a comparison of systems models and effects The third part of the handbook discusses the management and leadership aspects including ISO standards equity issues other goals for traffic and transportation and opportunities for the car industry Part four delves into tools technologies and organizational measures that contribute to the implementation of Vision Zero in road traffic Examples of specific elements discussed are urban and rural road designs human factor designs and avoiding drunk and distracted driving The final part of the handbook offers perspectives on the transfer of Vision Zero policy to other areas ranging from air traffic to suicide prevention and nuclear energy Vision Zero is a public road safety policy including both a long term goal that no one shall be killed or seriously injured as a consequence of accidents in road traffic and a safety principle stating that the design and function of the road transport system shall be adapted to meet the requirements that follow from that goal It is a new road safety paradigm which has resulted in new types of responsibilities among stakeholders technological innovations and new strategies and organizational measures to achieve a safe system The road safety work based on Vision Zero has shown promising results and although Sweden has not yet reached a safe system the number of fatalities and severe injuries has decreased substantially This is an open access book [Returning Home from Iraq and Afghanistan](#) Institute of Medicine, Board on the Health of Select Populations, Committee on the Assessment of Readjustment Needs of Military Personnel, Veterans, and Their Families, 2013-04-12 As of December 2012 Operation Enduring Freedom OEF in Afghanistan and Operation Iraqi Freedom OIF in Iraq have resulted in the deployment of about 2.2 million troops there have been 2,222 US fatalities in OEF and Operation New Dawn OND 1 and 4,422 in OIF The numbers of wounded US troops exceed 16,000 in Afghanistan and 32,000 in Iraq In addition to deaths and morbidity the operations have unforeseen consequences that are yet to be fully understood In contrast with previous conflicts the all volunteer military has experienced numerous deployments of individual service members has seen increased deployments of women parents of young children and reserve and National Guard troops and in some cases has been subject to longer deployments and shorter times at home between deployments Numerous reports in the popular press have made the public aware of issues that have pointed to the difficulty of military personnel in readjusting after returning from Iraq and Afghanistan Many of those who have served in OEF and OIF readjust with few difficulties but others have problems in readjusting to home reconnecting with family members finding employment and returning to school In response to the return of large numbers of veterans from Iraq and Afghanistan with physical

health and mental health problems and to the growing readjustment needs of active duty service members veterans and their family members Congress included Section 1661 of the National Defense Authorization Act for fiscal year 2008 That section required the secretary of defense in consultation with the secretary of veterans affairs to enter into an agreement with the National Academies for a study of the physical health mental health and other readjustment needs of members and former members of the armed forces who were deployed in OIF or OEF their families and their communities as a result of such deployment The study consisted of two phases The Phase 1 task was to conduct a preliminary assessment The Phase 2 task was to provide a comprehensive assessment of the physical psychologic social and economic effects of deployment on and identification of gaps in care for members and former members their families and their communities The Phase 1 report was completed in March 2010 and delivered to the Department of Defense DOD the Department of Veterans Affairs VA and the relevant committees of the House of Representatives and the Senate The secretaries of DOD and VA responded to the Phase 1 report in September 2010 Returning Home from Iraq and Afghanistan Assessment of Readjustment Needs of Veterans Service Members and Their Families fulfills the requirement for Phase 2 **Suicide** Danuta Wasserman,2016-01-14

Approximately one million people worldwide commit suicide each year and at least ten times as many attempt suicide A considerable number of these people are in contact with members of the healthcare sector and encounters with suicidal individuals form a common part of the everyday work of many healthcare professionals Suicide An unnecessary death examines the pharmacological psychotherapeutic and psychosocial measures adopted by psychiatrists GPs and other health care staff and emphasizes the need for a clearer psychodynamic understanding of the self if patients are to be successfully recognized diagnosed and treated Drawing on the latest research by leading international experts in the field of suicidology this new edition provides clinicians with an accessible summary of the latest research into suicide and its prevention The abundance of new literature can make it difficult for those whose clinical practice involves daily contact with suicidal patients to devote sufficient time to penetrating the research and accordingly apply new findings in their clinical practice In light of the WHO Mental Health Action Plan 2013 2020 this new edition is a timely contribution to the field and a vital and rapid overview that will increase awareness of suicide prevention methods **Suicide Prevention** Tatiana Falcone,Jane

Timmons-Mitchell,2018-05-18 This volume is a guide for the hospital workforce related to suicide prevention Written by experts in the field this text is the only one that also includes the revised DSM 5 guidelines It is also the first to cover both prevention in one concise guide offering a well rounded approach to long and short term prevention The book begins by establishing the neurobiology of suicide before discussing the populations at risk for suicide and the various environments where they may present The book addresses the epidemiology including groups at heightened risk etiology including several types of risk factors prevention including large scale community based activities and postvention including the few evidence based approaches that are currently available Unlike any other text on the market this book does not simply focus on one

particular demographic rather the book covers a wide range of populations and concerns including suicide in youths racial minorities patients suffering from serious mental and physical illnesses psychopharmacological treatment in special populations and a wide array of challenging scenarios that are often not addressed in the very few up to date resources available Suicide Prevention is an outstanding resource for psychiatrists psychologists hospitalists primary care doctors nurses social workers and all medical professionals who may interface with suicidal patients
