**Change the World** David Bornstein, 2007-09-17 Now published in more than twenty countries David Bornstein's How to Change the World has become the bible for social entrepreneurship in which men and women around the world are finding innovative solutions to a wide variety of social and economic problems Whether delivering solar energy to Brazilian villagers expanding work opportunities for disabled people across India creating a network of home care agencies to serve poor people with AIDS in South Africa or bridging the college access gap in the United States social entrepreneurs are pioneering problem solving models that will reshape the 21st century How to Change the World provides vivid profiles of many such individuals and what they have in common The book is an In Search of Excellence for social initiatives intertwining personal stories anecdotes and analysis Readers will discover how one person can make an astonishing difference in the world The case studies in the book include Jody Williams who won the Nobel Peace Prize for the international campaign against landmines she ran by e mail from her Vermont home Roberto Baggio a 31 year old Brazilian who has established eighty computer schools in the slums of Brazil and Diana Propper who has used investment banking techniques to make American corporations responsive to environmental dangers The paperback edition will offer a new foreword by the author that shows how the concept of social entrepreneurship has expanded and unfolded over the last few years including the Gates Buffetts charitable partnership the rise of Google and the increased mainstream coverage of the subject The book will also update the stories of individual social entrepreneurs that appeared in the cloth edition **The Consciousness Network** Cyriel

Pennartz, 2024-06-06 What is the relationship between consciousness and our brain Are they one and the same Who are we really The Consciousness Network presents a novel account of one of the greatest scientific challenges of the twenty first century understanding the connection between brain and mind The book explores remarkable cases of patients who demonstrate how our impression of reality is created by the brain Age old questions about dreams colour perception phantom sensations and hallucinations are illuminated by surprising discoveries from the latest brain research How does

consciousness differ from memory emotions and behaviour How did it develop during the evolution of life on earth and does it serve a purpose Does the brain leave room for free will In this unique blend of philosophy history psychology and neuroscience Cyriel Pennartz breaks new ground by presenting an original theory of brain and mind substantiated by brain research in patients and healthy people This theory inspired by the seventeenth century philosopher Spinoza goes significantly deeper than current thinking based on computer models or artificial intelligence The Consciousness Network is essential reading for students working at the interface of neuroscience cognitive psychology philosophy of mind and cognitive science as well as anyone interested in consciousness and the brain **Postcolonial People** Christoph

Kalter, 2022-05-26 Having built much of their wealth power and identities on imperial expansion how did the Portuguese and by extension Europeans deal with the end of empire Postcolonial People explores the processes and consequences of decolonization through the histories of over half a million Portuguese settlers who returned following the 1974 Carnation Revolution from Angola Mozambique and other parts of Portugal's crumbling empire to their country of origin and citizenship itself undergoing significant upheaval Looking comprehensively at the returnees history and memory for the first time this book contributes to debates about colonial racism and its afterlives It studies migration refugeeness and integration to expose an apparent paradox The end of empire and the return migrations it triggered belong to a global history of the twentieth century and are shaped by transnational dynamics However they have done nothing to dethrone the primacy of the nation state If anything they have reinforced it **Global Cities and Global Order** Simon Curtis, 2016-11-24 The re

emergence of the city from the long shadow of the state in the late twentieth century was facilitated by the state itself The unprecedented size and scale of today's global cities and mega cities owe their conditions of possibility to a fundamental shift in the character of political order at the level of the international system This book argues that we must understand the rise of the global city as part of a wider process of the transformation of international political order and of the character of international society Global cities are an inscription of the ideals of a market society in space constructed and defended at the level of international society They embody the ascendance of a set of liberal principles at a certain moment in history a moment related to the hegemonic status of leading states in the second half of the twentieth century and the ability of those states to shape international norms But the evolution of these urban forms has also reflected the tendency for deregulated markets to generate inequality and polarisation these features are also inscribed in the spaces of global cities Global cities focus and amplify the tensions and contradictions within the contemporary international system and become key strategic sites for struggles over social justice and the character of political life in the twenty first century Global Cities and Global Order demonstrates the significance of the re emergence of cities from the long shadow of the nation state is far reaching Only by examining the mechanisms by which cities have become empowered in the last few decades can we understand their new functions and capabilities in global politics **Dark Side of the Tune: Popular Music and Violence** Professor Bruce

Johnson, Professor Martin Cloonan, 2013-01-28 Written against the academically dominant but simplistic romanticization of popular music as a positive force this book focuses on the dark side of the subject It is a pioneering examination of the ways in which popular music has been deployed in association with violence ranging from what appears to be an incidental relationship to one in which music is explicitly applied as an instrument of violence A preliminary overview of the physiological and cognitive foundations of sounding hearing which are distinctive within the sensorium discloses in particular their potential for organic and psychic violence The study then elaborates working definitions of key terms including the vexed idea of the popular for the purposes of this investigation and provides a historical survey of examples of the nexus between music and violence from pre Biblical times to the late nineteenth century The second half of the book concentrates on the modern era marked in this case by the emergence of technologies by which music can be electronically augmented generated and disseminated beginning with the advent of sound recording from the 1870s and proceeding to audio internet and other contemporary audio technologies Johnson and Cloonan argue that these technologies have transformed the potential of music to mediate cultural confrontations from the local to the global particularly through violence The authors present a taxonomy of case histories in the connection between popular music and violence through increasingly intense forms of that relationship culminating in the topical examples of music and torture including those in Bosnia Darfur and by US forces in Iraq and Guant namo Bay This however is not simply a succession of data but an argumentative synthesis Thus the final section debates the implications of this nexus both for popular music studies itself and also in cultural policy and regulation the ethics of citizenship and arguments about human rights     Let's Go Barcelona 3rd Edition Let's Go

*Ancient Artifact* Amalia Avramidou, Denise Demetriou, 2014-08-25 This volume consists consists of forty contributions written by an internationally renowned selection of scholars The authors adopt an interdisciplinary methodology examining both literary and archaeological sources and a comparative perspective that transgresses national chronological and cultural boundaries in order to investigate the nature of the links between text and image This multifaceted approach to the study of ancient artifacts enables the authors to treat art and artistic production as activities that do not merely mirror social or

cultural relationships but rather and more significantly as activities that create social and cultural relationships The essays in this book are motivated by their authors belief that there is no simple direct link between art and myths art and text or art and ritual and that art should not be delegated to the role of a by product of a literate culture Instead the contextual and symbolic analyses of artifacts and representations offered in this volume elucidate how art actively shaped myth how it changed texts how it transformed ritual and how it altered the course of local regional and Mediterranean histories
