**Development for Leaders and Managers of Self-Governing Schools** David Gamage, 2006-08-05 Current Context Currently self governing schools SGS or school based site based management SBM or local management of schools LMS identifies the individual school as the primary unit of improvement It relies on the redistribution of decision making authority to stimulate and sustain improvements in a school For this purpose varying degrees of formal authority to make decisions in the domains of school's mission goals priorities and school policies relating to financial material and human resources are not simply delegated but transferred by legislation to a representative governing body called the school council or board Accordingly it is the position of the principal or the head teacher previously at the apex of the hierarchical structure of the school which undergoes the most radical reform Under the new concept authority is shifted to the corporate body that is to the council or board while the principal becomes an ex officio member of that body and the chief executive officer CEO of the school Traditionally and legally the principal or the head teacher was vested with the full authority for the total management of the school But in terms of SGS or SBM the principal becomes a partner with the representatives of other relevant stakeholders in a democratic structure When the bureaucratic model of a school gets modified with the school governing body occupying the apex of the school hierarchy it becomes the key power centre with legal authority **District of**

Hoy, 2003-04-01 This volume provides a mix of beginning and established scholars and a range of theoretical perspectives Eight separate but related analyses were selected for publication this year The book begins with a chapter by Sims and Miskel which examines national reading policy as part of a broader federal government agenda on children's literacy Using a model of punctuated equilibrium they trace the peaks of congressional and media attention to literacy Their findings reveal that the broad level of literacy has remained a rather active and durable policy issue for more than three decades When however the analysis shifts to different targets that is from elementary and secondary school students to adults and youth to LEP individuals there are distinct patterns of punctuation and equilibrium The researchers conclude that the specific issue of

children's literacy in the 1990s is the latest version or episode of literacy policy produced by shifting images and venues
