Central America in the Aftermath of Hurricane Mitch United States. Congress. House. Committee on International Relations. Subcommittee on the Western Hemisphere, 1999 **Hurricane Mitch**, 1999 The Legacy of Hurricane Mitch Marisa O.

Ensor, 2022-05-10 Around the world disaster vulnerability is on the rise The incidence and intensity of disasters have increased in recent decades with lives being shattered and resources being destroyed across broad geographic regions each year As it swept across the Honduran landscape the exceptional size power and duration of Hurricane Mitch abruptly and

brutally altered the already diminished economic social and environmental conditions of the population In the aftermath of the disaster a group of seven socio environmental scientists set out to investigate the root causes of the heightened vulnerability that characterized pre Mitch Honduras the impact of the catastrophe on the local society and the subsequent recovery efforts Edited by Marisa O Ensor this volume presents the findings of their investigation The Legacy of Hurricane Mitch offers a comprehensive analysis of the immediate and long term consequences of Hurricane Mitch in Honduras Based on longitudinal ethnographic fieldwork and environmental assessments this volume illustrates the importance of adopting an approach to disaster research and practice that places natural trigger events within their political cultural and socio economic contexts The contributors make a compelling case against post disaster recovery efforts that limit themselves to alleviating the symptoms rather than confronting the root causes of the vulnerability that prefigured the disaster

Natural Disasters in Latin America and the Caribbean June Carolyn Erlick, 2021-02-03 Natural Disasters in Latin America and the Caribbean Coping with Calamity explores the relationship between natural disasters and civil society immigration and diaspora communities and the long term impact on emotional health Natural disasters shape history and society and in turn their long range impact is determined by history and society This is especially true in Latin America and the Caribbean where climate change is increasing the frequency and intensity of these extreme events Ranging from pre Columbian flooding in the Andes to the devastation of Hurricane Maria in Puerto Rico this book focuses on long range recovery and recuperation rather than short term disaster relief Written in the time of the coronavirus pandemic the author shows how lessons learned about civil society governance climate change inequality and trauma from natural disasters have their echoes in the challenges of today s uncertain world This book is well suited to the classroom and will be an asset to students of Latin American history environmental history and historical memory

Crisis Management Beyond the Humanitarian-Development Nexus Atsushi Hanatani,Oscar A. Gómez,Chigumi Kawaguchi,2018-09-27 In addressing humanitarian crises the international community has long understood the need to extend beyond providing immediate relief and to engage with long term recovery activities and the prevention of similar crises in the future However this continuum from short term relief to rehabilitation and development has often proved difficult to achieve This book aims to shed light on the continuum of humanitarian crisis management particularly from the viewpoint of major bilateral donors and agencies Focusing on cases of armed conflicts and disasters the authors describe the evolution of approaches and lessons learnt in practice when moving from emergency relief to recovery and prevention of future crises Drawing on an extensive research project conducted by the Japan International Cooperation Agency Research Institute this book compares how a range of international organizations bilateral cooperation agencies NGOs and research institutes have approached the continuum in international humanitarian crisis management The book draws on six humanitarian crises case studies each resulting from armed conflict or natural disasters Timor Leste South Sudan the Syrian crisis Hurricane Mitch in Honduras the Indian Ocean earthquake and tsunami in Indonesia and Typhoon Yolanda The book concludes by proposing a common conceptual framework designed to appeal to different stakeholders involved in crisis management Following on from the World Humanitarian Summit where a new way of working on the humanitarian development nexus was highlighted as one of five major priority trends this book is a timely contribution to the debate which should interest researchers of humanitarian studies conflict and peace studies and disaster risk management

A Trip Too Far Rosaleen Duffy,2013-06-17 Environmentally sustainable tourism or ecotourism has become a major area of interest for governments the private sector and international lending institutions It is regarded as a way of allowing economic development whilst protecting against environmental degradation especially in those countries with fragile ecosystems However despite the beneficial intentions of ecotourism it tends to be regarded uncritically by environmental

organizations governments and the private sector alike Rosaleen Duffy presents this analysis of ecotourism linking it with environmental ideologies and the politics of North South relations By the extensive use of case study and interview material she formulates ideas and proposals that should be important for the development of ecotourism around the globe Latin American Development Julie Cupples,2013-07-18 Latin America s diverse political and economic struggles and triumphs have captured the global imagination The region has been a site of brutal dictators revolutionary heroes the Cold War struggle and as a place in which the global debt crisis has had some of its most lasting and devastating impacts Latin America continues to undergo rapid transformation demonstrating both inspirational change and frustrating continuities This text provides a comprehensive introduction to Latin American development in the twenty first century emphasizing political economic social cultural and environmental dimensions of development It considers key challenges facing the region and the diverse ways in which its people are responding as well as providing analysis of the ways in which such challenges and responses can be theorized This book also explores the region s historical trajectory the implementation and rejection of the neoliberal model and the role played by diverse social movements Relations of gender class and race are considered as well as the ways in which media and popular culture are forging new global imaginaries of the continent The text also considers the increasing difficulties that Latin America faces in confronting climate change and environmental degradation This accessible text gives an overarching historical and geographical analysis of the region and critical analysis of recent developments It is accompanied by a diverse range of critical historical and contemporary case studies from all parts of the continent providing readers with the conceptual tools required to analyse theories on Latin American development Each chapter ends with a summary section discussion topics suggestions for further reading websites and media resources This is an indispensable resource for scholars students and practitioners **Living with Hazards, Dealing with Disasters**

William L. Waugh,1999-12-30 This is the first concise introduction to emergency management the emerging profession that deals with disasters from floods and earthquakes to terrorist attacks Coverage includes The history of emergency management and its evolution from volunteer effort to trained intervention Organization of emergency management systems local state regional national international governmental for profit and nonprofit Managing natural disasters floods earthquakes hurricanes wildfires tornadoes avalanches etc Managing manmade disasters civil defense terrorism hazardous materials accidents fires structural failures nuclear accidents transportation disasters Policy issues in the management of risk emergencies and disasters Disaster management in the Twenty first Century technological and political challenges Twenty case studies illustrate the handling of actual disasters including the Northridge Earthquake and the Oklahoma City Bombing Discussion questions and guides to on line information sources facilitate use of the book in the classroom and professional training programs **State of Disaster** Maria Cristina Garcia,2022-08-10 Natural disasters and the dire effects of climate change cause massive population displacements and lead to some of the most intractable political and

humanitarian challenges seen today Yet as Maria Cristina Garcia observes in this critical history of U S policy on migration in the Global South there is actually no such thing as a climate refugee under current U S law Most initiatives intended to assist those who must migrate are flawed and ineffective from inception because they are derived from outmoded policies In a world of climate change U S refugee policy simply does not work Garcia focuses on Central America and the Caribbean where natural disasters have repeatedly worsened poverty inequality and domestic and international political tensions She explains that the creation of better U S policy for those escaping disasters is severely limited by the 1980 Refugee Act which continues to be applied almost exclusively for reasons of persecution directly related to politics race religion and identity Garcia contends that the United States must transform its outdated migration policies to address today s realities Climate change and natural disasters are here to stay and much of the human devastation left in their wake is essentially a policy choice
