Birth over 35 Sheila Kitzinger,2011-07-21 Birth statistics from the Office for National Statistics show that more women than ever before become mothers later in life The trend is also backed up by figures from other countries around the world In developed countries

there is an upsurge in the age of mothers giving birth for the first time and in the UK alone there are now more first time mothers giving birth in the 30-34 age group than in the 25-29 age group. There is also a 50% increase from 10 years ago in the number of women aged 40-44 who are having a baby. Women over 35 or even younger expecting a first baby are automatically assigned to a high risk category at risk for problems such as hypertension, pre-eclampsia, diabetes, difficult labour and caesarean section. Research however suggests that the mother's overall health is more important than age per se. This updated version of *Birth Over 35* Sheldon Press 1994. *Birth Over 30* Sheldon Press 1982 provides the specialist information needed by older mothers.

ELDERLY ALCOHOLISM Michael Beechem, 2002-01-01. This text is the first of its kind to substantively integrate alcoholism, aging and grief theories into an easy to understand format for interdisciplinary undergraduate and graduate students in the behavioral and physical sciences. Written to prepare students in working with an elderly clientele, the reader is provided with elder specific practice methodology derived from experiential and theoretical content. Chapters 1 through 4 alert the readers to the nature of elderly alcoholism and accompanying aging theories. Chapter 5 underscores the challenges faced by professionals in identifying elderly alcoholism because the symptoms often mimic other diseases, namely acute dementia. Chapter 6 is a comprehensive study of elder specific populations including people of color, lesbians, gays and the homeless. Chapters 7 through 13 are essentially practice intervention chapters that include in depth discussions of such issues as strategies to encourage elderly alcoholics to enter treatment, practice values and attitudes, intervention strategies, spirituality, relapse and suicide prevention strategies. Also provided are on site interviews with professional counselors at elder specific alcoholism treatment programs and summaries of these interviews appear in Chapter 13 as well as actual case studies. Each chapter includes study questions, the glossary of terms and a comprehensive bibliography of research specific to the issues. This book will also be useful to professionals who provide services to an elderly population including nurses, physicians, social workers and alcoholism counselors.

Families Bereaved by Alcohol or Drugs Christine Valentine, 2017-07-06. Individuals bereaved by the drug or alcohol related death of a family member represent a sizeable group worldwide. *Families Bereaved by Alcohol or Drugs* is the long awaited result of an important and ambitious research project into the experiences commonly encountered by members of this stigmatized and vulnerable group. Based on focus groups with the practitioners and service personnel who support grieving relatives following the loss of a loved one to alcohol or drugs as well as interviews with the largest qualitative sample of adults bereaved by substance use that has been reported to date, this much needed contribution to research on addiction and bereavement identifies four major reasons why grief following this tragic kind of death is particularly difficult. By examining the experiences of a wide range of stakeholders including practitioners and policymakers in health, social care and the criminal justice system, the research contained within this book underscores the large number of organizations that play a role in the implementation of official procedure following a drug or alcohol related death and identifies significant gaps in the system that bereaved individuals must negotiate.

Grounded in extensive and rigorous academic research *Families Bereaved by Alcohol or Drugs* is essential reading for academics researchers and postgraduate students in the fields of mental health and addiction social work and social studies psychology family studies and bereavement The book should also be of interest to anyone with a professional interest in bereavement or substance use [Resources in Education](#) ,1997 **Alcohol Education** Barbara Howe,2023-12-01 Alcohol education in the 1980s was receiving greater emphasis in the training and practice of a wide range of health and welfare professionals As we became more aware of the risks associated with excessive drinking this practical straightforward guide originally published in 1989 would have been essential reading for health and welfare workers who were keen to develop the alcohol education aspect of their work and enable their clients and patients to use alcohol in a harm free way Barbara Howe looks at alcohol education in context clarifying its role and place in the day to day work of health and welfare professionals at the time She also discusses common myths and misunderstandings about alcohol among professionals and their clients She describes various approaches to alcohol education and includes a series of practical exercises for use with individuals and families aimed at increasing professionals confidence and competence in broaching the subject of alcohol Although working practices may have changed since first publication much of this title will still be useful today
