**Boost Your Self-Esteem** Anthony Ekanem,2016-09-20 Esteem is a simple word It is worth and value that we apply to people places and situations It is the amount of respect we assess We have esteem for our world leaders We have esteem for places like church and synagogue We have esteem for an exemplary performance whether it is in sports acting or simply doing the right thing But the most important place we need to apply esteem is within ourselves We must maintain our self esteem in order to place value on ourselves as a worthy individual in the world Self esteem can affect every single part of our lives If that esteem is low our lives will be dull and gray Elevating esteem for ourselves could very well be the key to happiness in life Most people s feelings and thoughts about themselves fluctuate somewhat based on their daily experiences The grade you get on an exam how your friends treat you ups and downs in a romantic relationship all can have a temporary impact on your well being Your own self esteem however is something more fundamental than the normal ups and downs associated with situational changes For people with good basic self esteem normal ups and downs may lead to temporary fluctuations in how they feel about themselves but only to a limited extent In contrast for people with poor basic self esteem these ups and downs may make all the difference in the world People with poor self esteem often rely on how they are doing in the present to determine how they feel about themselves They need positive external experiences to counteract the negative feelings and thoughts that constantly plague them Even then the good feeling from a good grade etc can be temporary Healthy self esteem is based on our ability to assess ourselves accurately know ourselves and still be able to accept and to value ourselves unconditionally
