**The Hungry Ocean** Linda Greenlaw, 2001-08-01 The term fisherwoman does not exactly roll trippingly off the tongue and Linda Greenlaw the world's only female swordfish boat captain isn't flattered when people insist on calling her one I am a woman I am a fisherman I am not a fisherwoman fisherlady or fishergirl If anything else I am a thirty seven year old tomboy It's a word I have never outgrown Greenlaw also happens to be one of the most successful fishermen in the Grand Banks commercial fleet though until the publication of Sebastian Junger's *The Perfect Storm* nobody cared Greenlaw's boat the *Hannah Boden* was the sister ship to the doomed *Andrea Gail* which disappeared in the mother of all storms in 1991 and became the focus of Junger's book *The Hungry Ocean* Greenlaw's account of a monthlong swordfishing trip over 1 000 nautical miles out to sea tells the story of what happens when things go right proving in the process that every successful voyage is a study in narrowly averted disaster There is the weather the constant danger of mechanical failure the perils of controlling five sleep women and booze deprived young fishermen in close quarters not to mention the threat of a bad fishing run If we don't catch fish we don't get paid period In short there is no labor union Greenlaw's straightforward uncluttered prose underscores the qualities that make her a good captain regardless of gender fairness physical and mental endurance obsessive attention to detail But ultimately Greenlaw proves that the love of fishing in all of its grueling isolating suspenseful glory is a matter of the heart and blood not the mind I knew that the ocean had stories to tell me all I needed to do was listen Svenja Soldovieri

them More broadly this study illustrates ways to manage commonly held natural resources around the world land water oil and so on in sustainable ways

**Swordfish** Richard Ellis, 2013-04-15 A perfect fish in the evolutionary sense the broadbill swordfish derives its name from its distinctive bill much longer and wider than the bill of any other billfish which is flattened into the sword we all recognize And though the majesty and allure of this warrior fish has commanded much attention from adventurous sportfishers eager to land one to ravenous diners eager to taste one no one has yet been bold enough to truly take on the swordfish as a biographer Who better to do so than Richard Ellis a master of marine natural history Swordfish A Biography of the Ocean Gladiator is his masterly ode to this mighty fighter The swordfish whose scientific name means gladiator can take on anyone and anything including ships boats sharks submarines divers and whales and in this book Ellis regales us with tales of its vitality and strength Ellis makes it easy to understand why it has inspired so many to take up the challenge of epic sportfishing battles as well as the longline fishing expeditions recounted by writers such as Linda Greenlaw and Sebastian Junger Ellis shows us how the bill is used for defense contrary to popular opinion it is not used to spear prey but to slash and debilitate like a skillful saber fencer Swordfish he

explains hunt at the surface as well as thousands of feet down in the depths and like tuna and some sharks have an unusual circulatory system that gives them a significant advantage over their prey no matter the depth in which they hunt Their adaptability enables them to swim in waters the world over tropical temperate and sometimes cold and the largest ever caught on rod and reel was landed in Chile in 1953 weighing in at 1 182 pounds and this heavyweight fighter like all the largest swordfish was a female Ellis s detailed and fascinating fact filled biography takes us behind the swordfish s huge cornflower blue eyes and provides a complete history of the fish from prehistoric fossils to its present day endangerment as our taste for swordfish has had a drastic effect on their population the world over Throughout the book is graced with many of Ellis s own drawings and paintings which capture the allure of the fish and bring its splendor and power to life for armchair fishermen and landlocked readers alike

the effects of each of these issues they will incorporate case studies of different species of fish Overall the authors present a hopeful view of the future of fisheries Most of the world s fisheries are not overfished and many once overfished stocks are now rebuilding In fact we can learn from the management failures and successes to ensure that fisheries are sustainable and contribute to national wealth and food security Concise and clear this book presents a compelling big picture of the state of oceans and the solutions to ending overfishing What Everyone Needs to Know is a registered trademark of Oxford University Press
