## **Hydrogen Halides In Nonaqueous Solvents Solubility Data S:**

*Solubility Data Series* R.W. Cargill, 2013-10-22 This volume in the Solubility Data Series contains tabulated collections and critical evaluations of original data for the solubility of carbon monoxide in a variety of liquid solvents The solvents include water aqueous and non aqueous salt solutions a variety of hydrocarbons a variety of oxygen containing halogen containing sulfur containing and nitrogen containing organic compounds and also some biological fluids with which carbon monoxide has an important interaction The data were gathered from a search of the world's chemical literature through to the end of 1988 and make up a unique and valuable historical survey of the solubility of carbon monoxide Their publication is timely in view of current concern about carbon monoxide as an atmospheric pollutant and in view of the role which carbon monoxide is likely to play in the future as chemical feedstocks may have to change in response to supply and demand patterns and as alternative energy sources are developed especially coal gasification technology For all of these applications and for numerous others this volume of well documented and critically evaluated gas solubility data will be of tremendous benefit

**Thermodynamic Data for Biochemistry and Biotechnology** Hans-Jürgen Hinz, 2012-12-06 The strong trend in the Biological Sciences towards a quantitative characterization of processes has promoted an increased use of thermodynamic reasoning This development arises not only from the well known power of thermodynamics to predict the direction of chemical change but also from the realization that knowledge of quantitative thermodynamic parameters provides a deeper understanding of many biochemical problems The present treatise is concerned primarily with building up a reliable data base particularly of biothermodynamic and related quantities such as partial specific volumes and compressibilities which will help scientists in basic and applied research to choose correct data in a special field that may not be their own Most chapters reflect this emphasis on data provision However it was also felt that the expert user deserved information on the basic methodology of data acquisition and on the criteria of data selection Therefore all tables are preceded by a critical evaluation of the techniques as well as a survey of the pertinent studies in the corresponding areas The surveys are usually self consistent and provide references to further sources of data that are important but not covered in the present volume The reader will realize that in different chapters different symbols have been used for the same properties This unfortunate situation is particularly obvious in those chapters where partial specific or molar quantities had to be introduced however it also occurs in those contributions concerning phase changes of macromolecules

*Ammonia, Amines, Phosphine, Arsine, Stibine, Silane, Germane and Stannane in Organic Solvents* C. L. Young, P. G. T. Fogg, 2013-10-22 This volume presents a comprehensive collection and critical evaluation of solubility data published prior to June 1983 for the compounds of the title A variety of techniques were used in the original determinations the merits of these have been considered in the evaluation of the data Emerging patterns of solubility behaviour for comparable systems are indicated The editors believe that the book will both draw attention to areas where good data are lacking and stimulate further experimental work

**Carbon Dioxide in Non-aqueous Solvents at Pressures Less Than 200 KPa** P.G.T. Fogg, 2017-05-17 Solubility Data Series Volume 50 Carbon Dioxide in Non Aqueous Solvents at Pressures Less Than 200 kPa contains evaluated data for the solubility in non aqueous solvents of carbon dioxide at a partial pressure not greater than 200 kPa The Solubility Data Series is a project of Commission V.8 Solubility Data of the International Union of Pure and Applied Chemistry IUPAC The text has as its goal the preparation of a comprehensive and critical compilation of data on solubilities in all physical systems including gases, liquids, and solids Chapters are devoted to providing data on the solubility of carbon dioxide in compounds such as alkanes, cyclic alkanes, and alkenes, alcohols, solvents other than alcohols, containing carbon, hydrogen, and oxygen, and animal and vegetable oils and fats Chemists will find the text extremely useful

**Solubility Data Series**, 1990 **Gases in Molten Salts** R.P.T. Tomkins, N.P. Bansal, 2016-01-22 This volume contains tabulated collections and critical evaluations of original data for the solubility of gases in molten salts gathered from chemical literature through to the end of 1989 Within the volume material is arranged according to the individual gas The gases include hydrogen halides, inert gases, oxygen, nitrogen, hydrogen, carbon dioxide, water vapor, and halogens The molten salts consist of single salts, binary mixtures, and multicomponent systems Included also is a special section on the solubility of gases in molten silicate systems focussing on slags and fluxes

Halogenated Benzenes, Toluenes and Phenols with Water Ari L. Horvath, Forrest W. Getzen, G. Jancso, 2013-10-22

Solubility Data Series Volume 20 Halogenated Benzenes Toluenes and Phenols with Water contains a comprehensive collection and critical evaluation of published solubility data for halogenated benzenes halogenated toluenes and halogenated phenols in water prior to 1983 This volume is concerned entirely with the solubility behavior for condensed systems such as solid or liquid solutes in liquid solvents including the general behavior of the evaluated solubilities of water in various organic constituents as a function of temperature This book focuses on liquid liquid liquid solid liquid and multicomponent organic water salt systems The solubilities of ordinary water and heavy water that have been determined in 29 organic liquids which in all cases the heavy water was found less soluble than the ordinary water are also elaborated The halogenated compounds outlined in this text have been organized according to the Hill System This publication is beneficial to chemists and students concerned with the solubility data for halogenated benzenes halogenated toluenes and halogenated phenols in water
