Hypnosis And False Memories:

Hypnosis and False Memories Ronald L. Stephens,1996 The Effects of Hypnosis and Time on False Memories Joshua L. Harrison,2004 **The Science of False Memory** C. J. Brainerd,V. F. Reyna,2005-05-05 Findings from research on false memory have major implications for a number of fields central to human welfare such as medicine and law Although many important conclusions have been reached after a decade or so of intensive research the majority of them are not well known outside the immediate field To make this research accessible to a much wider audience The Science of False Memory has been written to require little or no background knowledge of the theory and techniques used in memory research Brainerd and Reyna introduce the volume by considering the progenitors to the modern science of false memory and noting the remarkable degree to which core themes of contemporary research were anticipated by historical figure such as Binet Piaget and Bartlett They continue with an account of the varied methods that have been used to study false memory both inside and outside of the laboratory The first part of the volume focuses on the basic science of false memory revolving around three topics old and new theoretical ideas that have been used to explain false memory and make predictions about it research findings and predictions about false memory in normal adults and research findings and predictions about age related changes in false memory between early childhood and adulthood Throughout Part I Brainerd and Reyna emphasize how current opponent processes conceptions of false memory act as a unifying influence by integrating predictions and data across disparate forms of false memory The second part focuses on the applied science of false memory revolving around four topics the falsifiability of witnesses and suspects memories of crimes including false confessions by suspects the falsifiability of eyewitness identifications of suspects false memory reports in investigative interviews of child victims and witnesses particularly in connection with sexual abuse crimes false memory in psychotherapy including recovered memories of childhood abuse multiple personality disorders and recovered memories of previous lives Although Part II is concerned with applied research Brainerd and Reyna continue to emphasize the unifying influence of opponent processes conceptions of false memory The third part focuses on emerging trends revolving around three expanding areas of false memory research mathematical models aging effects and cognitive neuroscience False Memory will be an invaluable resource for professional researchers practitioners and students in the many fields for which false memory research has implications including child protective services clinical psychology law criminal justice elementary and secondary education general medicine journalism and psychiatry *Pseudoscience and the Paranormal* Terence Hines,2010-09-30 Television the movies and computer games fill the minds of their viewers with a daily staple of fantasy from tales of UFO landings haunted houses and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary or they never learn to make the distinction in the first place In this thorough review of

pseudoscience and the paranormal in contemporary life psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence Hines devotes separate chapters to psychics life after death parapsychology astrology UFOs ancient astronauts cosmic collisions and the Bermuda Triangle faith healing and more New to this second edition are extended sections on psychoanalysis and pseudopsychologies especially recovered memory therapy satanic ritual abuse facilitated communication and other questionable psychotherapies There are also new chapters on alternative medicine which is now marketed in our drug stores and on environmental pseudoscience with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer Finally Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary This valuable highly interesting and completely accessible analysis critiques the whole range of current paranormal claims

The Mythomanias Michael S. Myslobodsky,2013-06-17 Recently there has been a renewal of interest in the broad and loosely bounded range of phenomena called deception and self deception This volume addresses this interest shared by philosophers social and clinical psychologists and more recently neuroscientists and cognitive scientists Expert contributors provide timely reliable and insightful coverage of the normal range of errors in perception memory and behavior They place these phenomena on a continuum with various syndromes and neuropsychiatric diseases where falsehood in perception self perception cognition and behaviors are a peculiar sign Leading authorities examine the various forms of mythomania deception and self deception ranging from the mundane to the bizarre such as imposture confabulations minimization of symptomatology denial and anosognosia Although the many diverse phenomena discussed here share a family resemblance they are unlikely to have a common neurological machinery In order to reach an explanation for these phenomena a reliable pattern of lawful behavior must be delineated It would then be possible to develop reasonable explanations based upon the underlying neurobiological processes that give rise to deficiencies designated as the mythomanias The chapters herein begin to provide an outline of such a development Taken as a whole the collection is consistent with the emerging gospel indicating that neither the machinery of nature nor the forces of nurture taken alone are capable of explaining what makes cognition and behaviors aberrant
